New Sources Of Self:

Sources of the Self Charles Taylor,1992-03-01 Taylor shows that the modern turn inward is not disastrous but is in fact the result of our long efforts to define and reach the good At the heart of this definition he finds the affirmation of ordinary life a value that has decisively if not completely replaced an older conception of reason as connected to a hierarchy based on birth and wealth

Affect Imagery Consciousness Silvan Tomkins,1963-01-15 Tomkins magnum opus Affect Imagery Consciousness was published by Springer Publishing Company in four volumes over 30 years When Tomkins began writing the book in the 1950 s American psychology was dominated by psychoanalytic and behaviorist theories neither of which placed much importance on the role of basic emotions in everyday human behavior Tomkins challenged the status quo by developing over the span of nearly 2 000 pages a theory of consciousness and motivation that placed emotion at the core of the human experience Because so few psychologists were studying emotion at that time Tomkins drew liberally from other academic disciplines to help formulate his ideas and support his arguments evolutionary biology ethology cybernetics literature philosophy psychoanalysis and neurophysiology among others In the process Tomkins practically invented the field of nonverbal behavior through close observation of emotional expressions in people including his own infant son His work was a brilliantly eccentric pastiche of ideas that adhered to no strict disciplinary or ideological boundaries In time however AIC came to prominence through the research of his disciples notably Paul Ekman and Carroll Izard who went on to become major researchers in the psychology of emotion Today Tomkins s book is influential not just in psychology but in philosophy sociology communication studies even in affective computing Springer Publishing Company is pleased to continue to offer this magisterial work in four volumes

The End of Love Eva Illouz, 2021-09-15 Western culture has endlessly represented the ways in which love miraculously erupts in people's lives the mythical moment in which one knows someone is destined for us the feverish waiting for a phone call or an email the thrill that runs down our spine at the mere thought of him or her Yet a culture that has so much to say about love is virtually silent on the no less mysterious moments when we avoid falling in love where we fall out of love when the one who kept us awake at night now leaves us indifferent or when we hurry away from those who excited us a few months or even a few hours before In *The End of Love* Eva Illouz documents the multifarious ways in which relationships end She argues that if modern love was once marked by the freedom to enter sexual and emotional bonds according to one's will and choice contemporary love has now become characterized by practices of non choice the freedom to withdraw from relationships Illouz dubs this process by which relationships fade evaporate dissolve and break down unloving While sociology has classically focused on the formation of social bonds *The End of Love* makes a powerful case for studying why and how social bonds collapse and dissolve Particularly striking is the role that capitalism plays in practices of non choice and unloving The unmaking of social bonds she argues is connected to contemporary capitalism which is characterized by practices of non commitment and non choice practices that enable the quick withdrawal from a transaction and the quick realignment of prices and the breaking of loyalties Unloving and non choice have in turn a profound impact on society and economics as they explain why people may be having fewer children increasingly living alone and having less sex *The End of Love* presents a profound and original analysis of the effects of capitalism and consumer culture on personal relationships and of what the dissolution of personal relationships means for capitalism

Theories of the Self, Race, and Essentialization in Buddhism Ryan Anningson, 2021-07-29 This book analyzes Buddhist discussions of the Aryan myth and scientific racism and the ways in which this conversation reshaped Buddhism in the United States and globally The book traces the development of notions of Aryanism in Buddhism through Buddhist publications from 1899 1957 focusing on this so called yellow peril or historical racist views in the United States of an Asian other During this time period in America the Aryan myth was considered to be scientific fact and Buddhists were able to capitalize on this idea throughout a global publishing network of books magazines and academic work which helped to transform the presentation of Buddhism into the Aryan religion Following narratives regarding colonialism and the development of the Aryan myth Buddhists challenged these dominant tropes they combined emic discussions about the Aryan myth and comparisons of Buddhism and science in order to disprove colonial tropes of Western dominance and suggest that Buddhism represented a superior tradition in world historical development The author argues that this presentation of a Buddhist tradition of superiority helped to create space for Buddhism within the American religious landscape The book will be of interest to academics working on Buddhism race and religion and American religious history

Theology, Psychology and the Plural Self Léon Turner, 2016-02-17 Is the human self singular and unified or essentially plural This book explores the seemingly disparate ways that Christian theology and the secular human sciences have approached this complex question The latter have largely embraced the idea of the plural self as an inescapable even adaptive feature of psychological life Contemporary Christian theology by contrast has largely neglected recent psychological accounts of the naturalness of self plurality and has sought to reaffirm the self s unity in opposition to those postmodern theorists who would dismantle it Through an original analysis of recent theological and secular accounts of self and personhood this book examines the extent of the intertheoretical disparity and its broader implications for theology s dialogue with the human sciences in general and psychology in particular It explains why theologians ought to take questions about the plurality of self very seriously and how they overlap with many of the central concerns of contemporary theological anthropology including the notions of relationality particularity and human sinfulness Introducing a novel psychological framework to distinguish various

understandings of self disunity the author argues that contemporary theology's blanket condemnation of self multiplicity is misconceived and identifies a possible means of reconciling theological and human scientific accounts
