New Mannew World:

The New Man and the New World Richard Di Giacomo, 2003 This book explains the emergence of the idea of a new world The collective discoveries of Christopher Columbus Amerigo Vespucci John and Sebastian Cabot and Giovanni da Verrazzano constitute a distinct Italian Era of Discovery which laid the groundwork for all other voyages which followed The Italian discoverers deserve a place alongside the well known Humanists in the history of art literature philosophy and government by virtue of their research and accomplishments The explorers also made original contributions to the fields of science navigation and cartography The world view of the Italian explorers evolved to include the concept of a new world They had to reevaluate their cosmography and change the maps to reflect their new knowledge The concept of a New World was equally profound as that of a new age The most important contribution of the Italian explorers was not what they found but the change in thinking that took place when they tried to explain their discoveries This book has been read by those with an interest in the Age of Discovery Renaissance Humanism and the history of the New World It has been used in university classes as required reading in classes related to these topics

The Art and Science of Making the New Man in Early 20th-Century Russia Yvonne Howell, Nikolai Kremmentsov, 2021-12-02 The idea that morally mentally and physically superior new men might replace the currently existing mankind has periodically seized the imagination of intellectuals leaders and reformers throughout history This volume offers a multidisciplinary investigation into how the new man was made in Russia and the early Soviet Union in the first third of the 20th century The traditional narrative of the Soviet new man as a creature forged by propaganda is challenged by the strikingly new and varied case studies presented here The book focuses on the interplay between the rapidly developing experimental life sciences such as biology medicine and psychology and countless cultural products ranging from film and fiction dolls and museum exhibits to pedagogical projects sculptures and exemplary agricultural fairs With contributions from scholars based in the United States Canada the UK Germany and Russia the picture that emerges is emphatically more complex contradictory and suggestive of strong parallels with other new man visions in Europe and elsewhere In contrast to previous interpretations that focused largely on the apparent disconnect between utopian new man rhetoric and the harsh realities of everyday life in the Soviet Union this volume brings to light the surprising historical trajectories of new man visions their often obscure origins acclaimed and forgotten champions unexpected and complicated results and mutual interrelations In short the volume is a timely examination of a recurring theme in modern history when dramatic advancements in science and technology conjoin with anxieties about the future to fuel dreams of a new and improved mankind

Think to New Worlds Joshua Blu Buhs, 2024 This book is about Charles Fort his followers and the surprising influence they have had on science fiction the avant garde UFOlogy and more broadly on the role of spirituality and conspiracy in the modern world Fort was an author and maverick philosopher who wrote four non fiction books about anomalies rains of frogs mysterious disappearances unexplained lights in the sky for which he offered

hypotheses that even he did not always accept as true His books developed into a monistic philosophy that denounced science as a machine for generating truth In his view science was a small part of a larger system in which truth and falsity were constantly transforming one into the other This was not a rejection of the modern world but instead its fulfillment Fort prophesied the next stage in intellectual evolution after the scientific era He inspired four overlapping groups members of the Fortean Society science fiction fans and writers avant garde artists and flying saucer enthusiasts First We Must Think to New Worlds takes up each of these groups in turn to ask How can the human imagination be expanded What is the fundamental structure of the universe And how does power move As they developed their responses Fort's followers mixed Forteanism with Fundamentalism New Agery and conspiracy as well as a host of other forms of modern enchantments such as the ironic imagination scientific wonder and Theosophical syncretism Each chapter is interrupted by and concludes with shorter sections that focus on particular Forteans or Fortean events as a way to deepen themes *The Holocaust and Latin America* Daniela Gleizer, Emmanuel Kahan, Yael Siman, 2025-06-13 This book explores the history of the Holocaust in relation to Latin America It is estimated that about 100 000 Jewish refugees immigrated to the region between 1933 and 1945 Despite the critical role Latin America played in sheltering Jewish refugees from Nazism the region has remained largely on the margins of Holocaust studies The volume adopts a global perspective examining the Holocaust's connections to Latin America both as a region and as a mosaic of distinct national contexts Structured around three key themes migration settlement and memory the book not only addresses the immigration policies of Latin American governments but also amplifies the experiences and voices of Jewish survivors who found refuge in this culturally diverse region **Bulletin**, 1916

New Worlds of Work Ulrich Jürgens, Martin Krzywdzinski, 2016-04-15 New industrial centres are emerging in the so called BRIC countries Brazil Russia India and China where large numbers of plants have been constructed in recent years creating many manufacturing jobs But what does industrial work look like in these locations Up until now much of the interest in developing country industrialization has concentrated on the poor working conditions that characterize some export oriented sectors in emerging economies most notoriously in the garment industry In contrast the concern of this book is with the modern facilities of multinational or local manufacturers that reflect aspirations for a process of industrial upgrading that might foreshadow the future for these countries The book provides an analysis of work its context and the situation of employees in plants in the BRICs focussing on three main questions What differences and common features can be ascertained in a comparison both of countries and firms in terms of workplace HR management and production systems What evidence is there for either a high road or low road developmental path in the BRICs How are corporate standards implemented in these local contexts The book addresses an academic audience as well as managers and trade unionists For the former it offers a systematic comparison of the four countries and the companies under study For the latter it offers a vivid account of challenges the companies face in the BRIC countries as well as the solutions adopted by the companies

John Henry Newman and the Imagination Bernard Dive, 2018-05-17 For John Henry Newman religion is animated by an imaginative master vision which supplies the mind with spiritual life and peace All his life Newman reflected on this master vision His reflections on the moral imagination developed out of his understanding of practical wisdom as characterized by Aristotle the wisdom that the good man has in living a good life For Newman the vision at the core of religion completes and perfects the intuitions of the conscience John Henry Newman and the Imagination looks at how Newman s understanding of the moral and visionary imagination developed over the course of his life and it relates his ideas about the imagination to his portrayals of religious experience and vision in his novels and poetry *Coleridge and Newman* Philip C. Rule, 2004 By examining Samuel Taylor Coleridge s and John Henry Newman s parallel approaches to the central question of Christian apologetics the existence of God Coleridge and Newman *The Centrality of Conscience* documents more fully than ever before the extent of Coleridge s influence on Newman Both men sought to develop an argument for God s existence by understanding conscience as the moral self awareness that makes us human The study provides fresh readings of three texts by Coleridge and three by Newman The result of these comparative readings is a rhetoric that both informs and invites the reader to personal reflection [Goethe's Faust I](#) David W. Lovell, Heinz-Uwe Haus, 2017-01-06 In March 2014 the University of Delaware s Resident Ensemble Players staged the first Part of Goethe s *Faust* adapted and directed by Heinz Uwe Haus which forms the centrepiece and raison d tre of this book This book tracks the creative process of Haus s adaptation of the play and his attempts to elicit responses from his international networks to his question how is Goethe s *Faust* relevant today It brings together comments from stage and costume designers as they brought their own creativity and understanding of the audience to bear on the play and presents a brief record of the production itself through stage directions and the photography of Bill Browning The book then explores the reactions the production has elicited amongst some of its audience **Select speeches, condensed and abridged, with Kossuth's express sanction, by F.
