Managing and Mining

Multimedia Databases Bhavani Thuraisingham, 2001-06-28 There is now so much data on the Web that managing it with conventional tools is becoming almost impossible. To manage this data, provide interoperability, and warehousing between multiple data sources and systems, and extract information from the databases and warehouses, various tools are being developed. In fact, developments in multimedia database management have exploded during the past decade. To date, however, there has been little information available on providing a complete set of services for multimedia databases, including their management, mining, and integration on the Web for electronic enterprises. Managing and Mining Multimedia Databases fills that gap. Focusing on managing and mining multimedia databases for electronic commerce and business, it explores database management system techniques for text, image, audio, and video databases. It addresses the issues and challenges of mining multimedia databases to extract information and discusses the directions and challenges related to integrating multimedia databases for the Web, particularly for e-business. This book provides a comprehensive overview of multimedia data management and mining technologies, from the underlying concepts, architectures, and data models for multimedia database systems to the technologies that support multimedia data management on the Web, privacy issues, and emerging standards, prototypes, and products. Designed for technical managers, executives, and technologists, it offers your only opportunity to learn about both multimedia data management and multimedia data mining within a single book. Professing Criticism

John Guillory, 2022-12-30 A sociological history of literary study, both as a discipline and as a profession. As the humanities in higher education struggle with a labor crisis and with declining enrollments, the travails of literary study are especially profound. No scholar has analyzed the discipline's contradictions as authoritatively as John Guillory. In this much anticipated new book, Guillory shows how the study of literature has been organized both historically and in the modern era, both before and after its professionalization. The traces of this volatile history, he reveals, have solidified into permanent features of the university. Literary study continues to be troubled by the relation between discipline and profession, both in its ambivalence

about the literary object and in its anxious embrace of a professionalism that betrays the discipline's relation to its amateur precursor criticism In a series of timely essays *Professing Criticism* offers an incisive explanation for the perennial churn in literary study the constant revolutionizing of its methods and objects and the permanent crisis of its professional identification It closes with a robust outline of five key rationales for literary study offering a credible account of the aims of the discipline and a reminder to the professoriate of what they already do and often do well **Stories We Need to Know**

Allan G. Hunter, 2008-01-01 A combination of therapy and expertise in literature this book explains the six archetypes derived from 4 000 years of literature and how they may guide unhappy people seeking meaning in their lives Holding up the great books as the best way to understand these timeless story elements the discussion devotes a chapter to each of the six archetypes the innocent the orphan the pilgrim the warrior lover the monarch pair and the magician Story structures are shown to be particularly suited to therapy with adolescents many of whom have never stepped away from television and the shopping mall long enough to understand their unmet spiritual needs Reading & Teaching Henry Giroux Clar
