Charles Dickens and the Arts explores Dickens's rich and complex relationships with a myriad of art forms and the far reaching resonance of his works across the arts overall. This volume reassesses Dickens's prescient philosophy of art both through a historical and a present day lens and in the context of debates about the cultural value of the arts. Across thirty three original essays it outlines the ways in which Dickens broke down oppositions between high and low art, money and the aesthetic, the extraordinary and the ordinary, and art for its own sake and the social good. In doing so it considers how Dickens prefigured the arts of the future including rap music, television, fanfiction, and global cinema. *A General History of the Science and Practice of Music ... John Hawkins, 1853 *The Civic Muse* Frank A. D'Accone, 2007-12-01 Siena, blessed with neither the aristocratic nor the ecclesiastical patronage enjoyed by music in other northern Italian centers like Florence, nevertheless attracted first rate composers and performers from all over Europe. As Frank A. D'Accone shows in this scrupulously documented study, policies developed by the town to favor the common good formed the basis of Siena's ambitious musical programs. Based on decades of research in the town's archives, D'Accone's *The Civic Muse* brilliantly illuminates both the sacred and the secular aspects of more than three centuries of music and music making in Siena. After detailing the history of music and liturgy at Siena's famous cathedral and of civic music at the Palazzo Pubblico, D'Accone describes the crucial role that music played in the daily life of the town, from public festivities for foreign dignitaries to private musical instruction. Putting Siena squarely on the Renaissance musical map, D'Accone's monumental study will interest both musicologists and historians of the Italian Renaissance. **Hearing the Crimean War** Gavin Williams, 2019

What does sound, whether preserved or lost, tell us about nineteenth century wartime? *Hearing the Crimean War: Wartime Sound and the Unmaking of Sense* pursues this question through the many territories affected by the Crimean War, including Britain, France, Turkey, Russia, Italy, Poland, Latvia, Dagestan, Chechnya, and Crimea. Examining the experience of listeners and the politics of archiving sound, it reveals the close interplay between nineteenth century geographies of empire and the media through which wartime sounds became audible or failed to do so. The volume explores the dynamics of sound both in violent encounters on the battlefield and in the experience of listeners far removed from theaters of war. Each essay interrogates the Crimean War's sonic archive in order to address a broad set of issues in musicology, ethnomusicology, literary studies, the history of the senses, and sound studies.

Dance performances were an integral part of court ceremonies and festivals, and in the 17th and 18th centuries of commercial theatrical productions. Whether at court or in the public theater, danced spectacles were multimedia events.

that required close collaboration among artists musicians designers engineers and architects as well as choreographers In order to fully understand these practices it is necessary to move beyond a consideration of dance alone and to examine it in its social context This original collection brings together the work of 12 scholars from the disciplines of dance and music history Their work presents a picture of dance in society from the late medieval period to the middle of the 18th century and demonstrates how dance practices during this period participated in the intellectual artistic and political cultures of their day
