Reconstructions : New Perspectives on Postbellum America Institute for Southern Studies and Associate Professor of History University of South Carolina Thomas J. Brown Associate Director,2006-10-16 The pivotal era of Reconstruction has inspired an outstanding

historical literature In the half century after W E B DuBois published *Black Reconstruction in America* 1935 a host of thoughtful and energetic authors helped to dismantle racist stereotypes about the aftermath of emancipation and Union victory in the Civil War The resolution of long running interpretive debates shifted the issues at stake in Reconstruction scholarship but the topic has remained a vital venue for original exploration of the American past In *Reconstructions New Perspectives on the Postbellum United States* eight rising historians survey the latest generation of work and point to promising directions for future research They show that the field is opening out to address a wider range of adjustments to the experiences and effects of Civil War Increased interest in cultural history now enriches understandings traditionally centered on social and political history Attention to gender has joined a focus on labor as a powerful strategy for analyzing negotiations over private and public authority The contributors suggest that Reconstruction historiography might further thrive by strengthening connections to such subjects as western history legal history and diplomatic history and by redefining the chronological boundaries of the postwar period The essays provide more than a variety of attractive vantage points for fresh examination of a major phase of American history By identifying the most exciting recent approaches to a theme previously studied so ably the collection illuminates the creative process in scholarly historical literature

New Perspectives on Yenching University, 1916-1952 Arthur Lewis Rosenbaum, 2015-01-08 *Essays in New Perspectives on Yenching University 1916-1952* reevaluate the experience of China's preeminent Christian university in an era of nationalism and revolution Although the university was denounced by the Chinese Communists and critics as an elitist and imperialist enterprise irrelevant to China's real needs the essays

demonstrate that Yen-ching's emphasis on biculturalism, cultural exchange and a broad liberal education combined with professional expertise ultimately are compatible with nation building and a modern Chinese identity. They show that the university fostered transnational exchanges of knowledge, changed the lives of students and faculty and responded to the pressures of nationalism, war and revolution. Topics include efforts to make Christianity relevant to China's needs, promotion of professional expertise, gender relationships and coeducation, the liberal arts, Sino-American cultural interactions and Yen-ching's ambiguous response to Chinese nationalism, Japanese invasion and revolution.

Ethnic Conflict Neal G. Jesse, Kristen P. Williams, 2010-02-09 As ethnic groups clash, the international community faces the challenge of understanding the multiple causes of violence and formulating solutions that will bring about peace. Allowing for greater insight, Jesse and Williams bridge two sub-fields of political science: in *Ethnic Conflict*, international relations and comparative politics. They systematically apply a levels of analysis framework, looking at the individual, domestic and international contexts to better explore and understand its complexity. Five case study chapters apply the book's framework to disputes around the world and include coverage of Bosnia, the Israeli-Palestinian conflict, Northern Ireland, Sri Lanka and Sudan. Never losing sight of their analytical framework, the authors provide richly detailed case studies that help students understand both the unique and shared causes of each conflict. Students will appreciate the book's logical presentation and excellent pedagogical features, including detailed maps that show political, demographic and cultural data.

War in Human Civilization Azar Gat, 2008 Why do people go to war? Is it rooted in human nature or is it a late cultural invention? And what of war today: is it a declining phenomenon or simply changing its shape? This book sets out to find definitive answers to these questions in an attempt to unravel the riddle of war throughout human history.

Perspectives on Nationalism and War J. Comaroff, P. Stern, 2013-09-13 This volume considers recent studies that move beyond primordialism and its antithesis, social constructivism, to search for new insights to illuminate the nature of nationalism and its link to war. The authors also explore the role of shared interests, the history of peoples, elites and states, political imperatives, propaganda and psychological predispositions. This combination provides a brilliant new look at nationalism and war, one that delves deeply into ethnic identity and the willingness of people to fight and die for nation-states.

New Voices and New Perspectives in International Economic Law John D. Haskell, Akbar Rasulov, 2019-12-10 This book brings together a series of contributions by international legal scholars that explore a range of subjects and themes in the field of international economic law and global economic governance through a variety of methodological and theoretical lenses. It introduces the reader to a number of different ways of constructing and approaching the study of international economic law. The book deals with a series of different theoretical agendas and perspectives, ranging from the more traditional empirical legal studies to the more alternative language theory, and it expands the scope of substantive discussion and thematic coverage beyond the usual suspects of international trade, international investment and international finance. While the volume still gives due recognition to the traditional theoretical

project of international economic law it invites the reader to extend the scope of disciplinary imagination to other less commonly acknowledged questions of global economic governance such as food security monetary unions and international economic coercion In addition to historically focused and critical perspectives the volume also includes a number of programmatic and forward looking explorations which makes it appealing to a broad audience with a variety of contrasting interests Therefore the volume is of particular interest to academics and postgraduate students in the fields of international law international relations international political economy and international history

A Century of Genocide Eric D. Weitz,2015-04-27 Why did the twentieth century witness unprecedented organized genocide Can we learn why genocide is perpetrated by comparing different cases of genocide Is the Holocaust unique or does it share causes and features with other cases of state sponsored mass murder Can genocide be prevented Blending

gripping narrative with trenchant analysis Eric Weitz investigates four of the twentieth century's major eruptions of genocide the Soviet Union under Stalin Nazi Germany Cambodia under the Khmer Rouge and the former Yugoslavia Drawing on historical sources as well as trial records memoirs novels and poems Weitz explains the prevalence of genocide in the twentieth century and shows how and why it became so systematic and deadly Weitz depicts the searing brutality of each genocide and traces its origins back to those most powerful categories of the modern world race and nation He demonstrates how in each of the cases a strong state pursuing utopia promoted a particular mix of extreme national and racial ideologies In moments of intense crisis these states targeted certain national and racial groups believing that only the annihilation of these enemies would enable the dominant group to flourish And in each instance large segments of the population were enticed to join in the often ritualistic actions that destroyed their neighbors This book offers some of the most absorbing accounts ever written of the population purges forever associated with the names Stalin Hitler Pol Pot and Milosevic A controversial and richly textured comparison of these four modern cases it identifies the social and political forces that produce genocide

Debating the End of Yugoslavia Florian Bieber, Armina Galijaš, 2016-05-13 Countries rarely disappear off the map In the 20th century only a few countries shared this fate with Yugoslavia The dissolution of Yugoslavia led to the largest war in Europe since 1945 massive human rights violations and over 100 000 victims Debating the End of Yugoslavia is less an attempt to re write the dissolution of Yugoslavia or to provide a different narrative than to take stock and reflect on the scholarship to date New sources and data offer fresh avenues of research avoiding the passion of the moment that often characterized research published during the wars and provide contemporary perspectives on the dissolution The book outlines the state of the debate rather than focusing on controversies alone and maps how different scholarly communities have reflected on the dissolution of the country what arguments remain open in scholarly discourse and highlights new innovative paths to study the period
