Urban Safety and Peacebuilding Achim Wennmann,Oliver Jütersonke,2018-12-07 This volume draws together original research related to conceptual and practical advances at the interface of urban safety and peacebuilding The book reflects

the advances in urban safety and peacebuilding to help address the rapidly increasing risk of conflict and insecurity in cities. Specifically, it draws on contributions to the Technical Working Group on the Confluence of Urban Safety and Peacebuilding Practice, an informal expert network co-facilitated by the United Nations Office at Geneva, UN Habitat's Safer Cities Programme and the Geneva Peacebuilding Platform. A focus on sustaining peace serves as a framework for situating new policy responses against conflict, violence and exclusion in the city and for promoting a conversation across disciplinary and specialist silos. The volume thereby broadens the optic of peacebuilding practice beyond interstate and intrastate armed conflicts and especially their aftermath and reconnects it to the community level origins of building peace. The analysis and practice presented here will remind those willing to work towards peaceful and inclusive cities that there are tried and tested approaches available and a host of experts and practitioners ready to accompany those prepared to lead in their respective contexts. This book will be of interest to students and researchers in the fields of peacebuilding, urban studies, security studies and international relations.

The Oxford Handbook of Urban

Economics and Planning Nancy Brooks, Kieran Donaghy, Gerrit-Jan Knaap, 2012-01-12. This volume embodies a problem-driven and theoretically informed approach to bridging frontier research in urban economics and urban regional planning. The authors focus on the interface between these two subdisciplines that have historically had an uneasy relationship. Although economists were among the early contributors to the literature on urban planning, many economists have been dismissive of a discipline whose leading scholars frequently favor regulations over market institutions, equity over efficiency and normative prescriptions over positive analysis. Planners, meanwhile, even as they draw upon economic principles, often view the work of economists as abstract, not sensitive to institutional contexts and communicated in a formal language spoken by few with decision-making authority. Not surprisingly, papers in the leading economic journals rarely cite clearly pertinent papers in planning journals and vice versa. Despite the historical divergence in perspectives and methods, urban economics and urban planning share an intense interest in many topic areas: the nature of cities, the prosperity of urban economies, the efficient provision of urban services, efficient systems of transportation and the proper allocation of land between urban and environmental uses. In bridging this gap, the book highlights the best scholarship in planning and economics that address the most pressing urban problems of our day and stimulates further dialog between scholars in urban planning and urban economics.

Social Theories of Urban Violence in the Global South

Jennifer Erin Salahub, Markus Gottsbacher, John de Boer, 2018-04-19. While cities often act as the engines of economic growth for developing countries, they are also frequently the site of growing violence, poverty and inequality. Yet social theory largely developed and tested in the Global North is often inadequate in tackling the realities of life in the dangerous parts of cities in the Global South. Drawing on the findings of an ambitious five-year, 15-project research programme, *Social Theories of Urban Violence in the Global South* offers a uniquely Southern perspective on the violence, poverty, inequalities, dynamics in cities of the Global South.

Through their research urban violence experts based in low and middle income countries demonstrate how urban violence means different things to different people in different places While some researchers adopt or adapt existing theoretical and conceptual frameworks others develop and test new theories each interpreting and operationalizing the concept of urban violence in the particular context in which they work In particular the book highlights the links between urban violence poverty and inequalities based on income class gender and other social cleavages Providing important new perspectives from the Global South this book will be of interest to policymakers academics and students with an interest in violence and exclusion in the cities of developing countries
