Moving to Markets in Environmental Regulation Jody Freeman, Charles D. Kolstad, 2007 Publisher description

Government Regulation of the Employment Relationship Bruce E. Kaufman, 1997 Ever since the emergence of industrial relations as a field in the late 1920s three different approaches to labor problems have been focal points for research and debate according to Bruce E Kaufman What he refers to as employers solutions involve personnel management workers rely on unionism and collective bargaining and the third component the community depends on government regulation in the form of protective labor legislation and social insurance programs Kaufman contends that government regulation has contributed significantly to the remarkable progress made during the twentieth century in achieving a more productive and humane workplace As labor problems have changed debate about the efficacy of government regulation has continued In this volume some of the most distinguished scholars in industrial relations frame the current issues develop theoretical insights and provide an objective review of the empirical evidence **Cutting Green Tape** Richard L. Stroup, Roger E. Meiners, Hundreds of hazardous waste sites are on the Superfund National Priority List in the United States

and thousands more could become eligible The Superfund has spent or ordered the spending of billions of dollars with little apparent impact on human health risks While public perception of the real or imagined hazardous nature of consumer and industrial substances has resulted in widespread attention to the issue lawsuits have proliferated with liability aimed at deep pockets instead of individual agents who may be responsible Contributors to Cutting Green Tape carefully examine the existence and severity of the toxic harms and liability problem the erosion of a clear tort legal system to settle disputes and whether a clearly defined system of property rights could be developed to reduce the dangers from toxic substances Cutting Green Tape rethinks the nature and impact of today s environmental bureaucracy Rather than continue unworkable cumbersome and often contradictory regulations Cutting Green Tape prescribes a clearer tort legal system to settle disputes and demonstrates that clearly defined environmental property rights would reduce the threat of toxic substances Among the many topics addressed are air toxins policy pollution damages and tort law risk assessment insurance and public information protecting groundwater regulation of carcinogens contracting for health and safety and toxin torts by government The book converges on a central theme when common law remedies with their burden of proof and standards of evidence are replaced by the legislatively mandated regulatory regimes described a problem emerges The bureaucratic tunnel vision described by Justice Stephen Breyer tends to take over The police powers of the state are given to bureaucratic decision makers who are limited only by the blunt instrument of political influence rather than by the need to show harm or wrongdoing in an unbiased court as the police are or by a budget on expenditures set by the Congress as most bureaus are The excesses described in the chapters thus result not from incompetence in the bureaus but from the expansive powers granted to decision makers who are tightly focused on the narrow mission they see before them

Mental Health among Higher Education Faculty, Administrators, and Graduate Students Teresa Heinz Housel, 2021-09-23 Mental Health among Higher Education Faculty Administrators and Graduate Students addresses how many academics who experience mental distress or mental illness are afraid to speak out because of cultural stigma and fears of career repercussions Many academics reluctance to publicly disclose their struggles complicates attempts to understand their experiences through research or popular media or to develop targeted mental health resources and institutional policies This volume builds on the existing studies in this greatly under researched area of mental health among faculty administrators and graduate students in higher education The chapters research findings will help institutions communicate about mental health in culturally competent and person centered ways create work environments conducive to mental well being and support their academic employees who have mental health challenges This book argues that discussions of health and wellness equity workload expectations and productivity and campus diversity must also cover chronic illness and disability which include mental health and mental illness
