Labour Market Deregulation in Japan and Italy Hiroaki Richard Watanabe,2014-11-13 Japan and Italy encountered severe economic problems in the early 1990s and the governments had to deal with those issues effectively under the increasing neoliberal pressures of globalisation In this context labour market deregulation was considered an effective tool to cope with those economic problems However the forms and degrees of labour market deregulation in the two countries were quite different This book seeks to explain the differences in labour market deregulation policies between Japan and Italy despite the fact that the two countries shared a number of similar political social and labour market if not cultural characteristics Uniquely it

takes a political rather than economic or sociological perspective to provide a theoretical and empirical analysis of the processes of labour market deregulation in the two countries. The precarious working conditions of an increasing number of non-regular workers has become a prominent social issue in many industrialised countries including Japan and Italy but the level of the protection for these workers depends on a country's labour market policies which are affected by the power resources of labour unions and labour policy making structures. This book provides a useful perspective for understanding the root causes of this phenomenon such as the diffusion of neoliberal ideas aimed at promoting labour market flexibility under globalisation and demonstrates that there is still room for politics to decide the extent of deregulation and maintain worker protection from management offensives even in an era of globalisation. *Labour Market Deregulation in Japan and Italy: Worker Protection under Neoliberal Globalisation* will appeal to students and scholars of Japanese politics, Italian politics, political economy and comparative politics. **A Long Goodbye to Bismarck?** Bruno Palier, 2010. Bruno Palier is CNRS Researcher at Sciences Po Paris. **Parties, Elections, and Policy Reforms in Western Europe** Kerstin Hamann, John Kelly, 2010-08-30. This book provides a comparative assessment of social pacts between governments, labor unions and employer organizations in Western Europe. Using a dataset covering 16 European countries as well as eight in-depth country case studies, the authors argue that governments' choice of social pacts or legislation is less influenced by economic problems but is strongly influenced by electoral competition. *Private Groups and Public Life* Jan W. van Deth, 2003-12-16. This book focuses on the changing relationship between social and political involvement in Western Europe. Empirical case studies examine how new social movements interact with conventional political structures as individuals and groups experiment with new forms of political expression. The results indicate not a declining but a changing democratic culture. *Theories of Secession* Percy B. Lehning, 2005-06-23. *Theories of Secession* presents a systematic analysis of the rise of secessionist movements in global politics. Bringing together a collection of experts in the field, it provides a timely forum for debate in this contentious area of study. *The Global Labour Market* Roger Blanpain, Michele Tiraboschi, Pablo Arellano Ortiz, 2008-01-01. As global power relations increasingly favour international capital, it becomes crucial for labour and employment lawyers to center their field in a supranational context. As long as wages, social security and taxes remain national matters, states compete at this level in order to attract foreign investment. This does not bode well for employees or the self-employed. Most ameliorative measures come in the form of unenforceable and soft law and guidelines and recommendations. The conference recorded in this vitally important book confronts this losing battle of local responses to global challenges. The book reprints the papers submitted to that conference by twenty-three outstanding scholars from fourteen countries. Among the many critical issues they expose and discuss are the following and the proliferation of varieties of non-standard employment and protection of migrant workers and rights by regional organizations and global and regional trends in the human resources function and work training and education policy and effectiveness of equality and non-discrimination standards and

involvement of employees in workplace decisionmaking and the need for an equitable social safety net In the course of the discussion the authors examine cases from many countries including not only EU Member States both West and East and the U S but also Japan Chile South Africa and Indonesia With a focus on the nexus of multinational enterprises and international standards the book provides both a sharp image of where labour law stands in today's world and revealing serious social problems in a clearer light than is usually encountered and a very valuable guide to directions to pursue and potential solutions offered by some of the most engaged and committed minds in the field It is an indispensable resource for legal workers in this eye of the storm of globalization
