Towards a Maqāṣid al-Sharī'ah Index of Socio-Economic Development Salman Syed Ali, 2019-09-05 Islamic economics which is a discipline for studying economic behaviour from an Islamic perspective advocates comprehensive human development defined by advancement and progress in multiple dimensions beyond GDP income or standard of living Not only should socio economic progress be in all dimensions but it should also have a higher purpose A society is considered economically and socially developed if adequate protections are provided for faith life intellect progeny and wealth This concept of balanced progress itself is an important idea recognized by the sociologists However the same has so far not been measured or used in policy making by economists Similarly lack of adequate protections in a society along these dimensions indicates poverty which is another way of measuring slack in development The chapters in this edited volume deal with conceptualization of socio economic development on these lines and show how to measure socio economic development in a comprehensive way The book will be of interest to academics in the fields of economics economic development and Islamic

Internationalisation andEnterprise Development inGhana John Kuada,2000-05-09 Policy makers and scholars consider private enterprise development as one of the most promising avenues of economic growth in Africa To grow enterprises must improve the efficiency and effectiveness of their operations often through internationalisation It is generally believed that internationalisation enhances the technological and managerial capacities of firms and also helps them to leverage other types of resources not immediately available within their own countries In recent years there has been an upsurge of interest in exploring the extent to which African firms are integrated into global business networks and the benefits if any derived from such integrations The above informed the need for an empirical investigations in Ghana from 2002 2003 the results of which are presented in this book Based on the experiences in Ghana contributors to the volume explore the issues of internationalisation in Africa by focusing on firm level activities and inter firm relations rather than on macro issues They draw on dominant theories of internationalisation to explore issues such as sustained competitive advantages of firms management and business relations in export processing zones organisational structures competence and leadership culture learning and cross border inter firm linkages as well as finance and stock exchange performance in Ghana Internationalisation and Enterprise Development is a major contribution to the body of knowledge on enterprise development in Africa in general and Ghana in particular It is a must read to all who are interested in Africa s enterprise development including the role played by internationalisation in that process **Equity and Development** Gudrun

Kochendörfer-Lucius,Boris Pleskovic,2006-01-01 Inequality of opportunity both within and among nations sustains extreme deprivation results in wasted human potential and often weakens prospects for overall prosperity and economic growth concludes the 2006 World Development Report To correct this situation and reduce poverty more effectively Equity and Development recommends ensuring more equitable access by the poor to health care education jobs capital and secure land rights among others It also calls for greater equality of access to political freedoms and political power breaking down stereotyping and discrimination and improving access by the poor to justice systems and infrastructure To level the playing field among countries and thereby reduce global inequities that hurt the poor in developing countries the report calls for removal of trade barriers in rich countries flexibility to allow greater in migration of lower skilled people from developing countries and increased and more effective development assistance *Moving Out of Poverty* Deepa Narayan,Patti Petesch,2007-07-30 This book brings together the latest thinking about poverty dynamics from diverse analytic traditions While covering a vast body of conceptual and empirical knowledge about economic and social mobility it takes the reader on

compelling journeys of multigenerational accounts of three villages in Karnataka India twelve years in the life of a street child in Burkina Faso and much more Leading development practitioners and scholars from the fields of anthropology economics political science and sociology critically examine the literature from their disciplines and contribute new frameworks and evidence from their own works The Moving Out of Poverty series launched in 2007 is under the editorial direction of Deepa Narayan Senior Advisor of the World Bank and former director of the pathbreaking Voices of the Poor series It features the results of new comparative research across more than 500 communities in 15 countries to understand how and why people move out of poverty and presents other work which builds on interdisciplinary and contextually grounded understandings of growth and poverty reduction Growth, Inequality, and Poverty Anthony Shorrocks, Rolf van der Hoeven, 2004-03-04 The relationship between growth inequality and poverty lies at the heart of development economics This volume draws together many of the most important recent contributions to the controversies surrounding this topic Some of the chapters help explain why there is profound disagreement on crucial issues of growth poverty and inequality within academic circles and among organizations and various groups active in the development field Another central theme is the cross country evidence on the relationship between growth and poverty and the extent to which it is valid to draw policy conclusions from this empirical evidence The volume also shows how new microeconomic techniques such as poverty maps and microsimulation models can be used to improve poverty analysis and the design of pro poor policies The overall conclusion points to the need for diverse strategies towards growth and poverty rather than simple blanket policy rules Initial conditions specific country structures and time horizons all play a significant role Initial conditions affect the speed with which growth reduces poverty and can also determine whether policies such as trade liberalization have a pro poor or an anti poor outcome Improved education is valuable in itself and also contributes to poverty reduction but its effect on inequality depends on supply and demand factors which differ significantly across countries Likewise the quantitative impact on poverty of redistribution from the rich to the poor vis vis an increase in total national income can vary greatly across countries Hence the need for creative approaches to poverty which take full account of the specific circumstances of individual nations and which assign a central role to inequality analysis in the discussion of poverty alleviation policies
