Theory and Practice in Functional-Cognitive Space María de los Ángeles Gómez González, Francisco José Ruiz de Mendoza

Ibáñez, Francisco González-García, Angela Downing, 2014-07-22 The differences among functionalist cognitivist and or constructionist models are generally taken to be not absolute but rather a matter of emphasis and degree with an increasing permeability between paradigms arising from cross fertilizing influences This book further explores this burgeoning area of research through the notion of functional cognitive space namely the topography of the space occupied by functional

cognitivist and or constructionist models against the background of formalist approaches in general and of Chomsky's Minimalism in particular. Specifically the twelve contributions in the present volume update the reader on recent developments in functionalism. Systemic Functional Grammar, Functional Discourse Grammar and Role and Reference Grammar and cognitivism. Word Grammar, Cognitive Construction Grammar and the Lexical Constructional Model. Plotting cognitive space proves particularly adequate for situating the six models represented in this volume not only in relation to each other but also potentially with respect to a wide spectrum of functionalist, cognitivist and or constructionist models.

Educating for Advanced Foreign Language Capacities Heidi Byrnes, Heather D. Weger, Katherine A.

Sprang, 2006-10-06 Advanced language learning has only recently begun to capture the interest and attention of applied linguists and professionals in language education in the United States. In this breakthrough volume experts in the field lay the groundwork for approaching the increasingly important role of advanced language learning in the larger context of multilingual societies, globalization and security. This volume presents both general and theoretical insights and language specific considerations in college classrooms spanning a range of languages from the commonly taught languages of English, French and German to the less commonly taught Farsi, Korean, Norwegian and Russian. Among theoretical frameworks likely to be conducive to imagining and fostering instructed advancedness in a second language this volume highlights a cognitive semantic approach. The theoretical and data based findings make clear that advanced learners in particular are characterized by the capacity to make situated choices from across the entire language system from vocabulary and grammar to discourse features which suggests the need for a text oriented meaning driven approach to language teaching, learning and research. This volume also considers whether and how information structuring in second language composition reveals first language preferences of grammaticized concepts. Other topics include curricular and instructional approaches to narrativity, vocabulary expansion, the demands on instructed programs for efficiency and effectiveness in order to assure advanced levels and learners ability to function in professional contexts with their diverse oral and written genre requirements. Finally the volume probes the role and nature of assessment as a measurement tool for both researching and assessing advanced language learning and as an essential component of improving programs.

A Cognitive-Functional Approach to Nominalization in English Liesbet Heyvaert, 2015-06-03 The book presents a systematic theoretical account of the fundamental constructional mechanisms that underlie deverbal nominalization in general and it makes an original descriptive contribution by discussing a number of nominalization systems in detail. The main theoretical motif is that nominalization strongly calls for a functional rather than purely structural approach. The book goes more deeply into a number of functional constructs needed to model nominalization drawn from Cognitive Grammar and Systemic Functional Grammar and it elaborates on the internal functional organization of nominal and clausal structure e.g. the notions of type specification, instantiation and grounding. Langacker 1991 are discussed in detail and shown to be crucial for the analysis of deverbal nominalization. It is

argued that deverbal nominalizations are basically re classifications of verbal predicates into nominal constructions This re classification either applies at word rank or it involves the rank shift Halliday 1966 of a clause like unit with its internal structure preserved e g signing the contract quickly The re classified unit then adopts a specific nominal strategy with some form of nominal determination and quantification e g her signing the contract quickly The descriptive part of the book zooms in on nominalizations that are derived at word rank deverbal er nominals and on nominalizations applying to a temporal clausal heads e g John s playing the piano and finite clauses Of the gerundive and finite types of nominalization those that function in factive contexts are focused on In the analysis of deverbal er nominals a case is made for a subject analysis of the system and an elaborate discussion of the clausal middle construction e g this book reads easily which is argued to show systematic resemblances with non agentive er nominals is included Of the remaining nominalization types John s playing the piano playing the piano the fact that he plays the piano that he plays the piano especially the nominal behaviour e g proper name vs common noun strategy and in the case of gerundive nominals the various structural and semantic subtypes that can be distinguished among them are discussed

Investigations of the Syntax-Semantics-Pragmatics Interface Robert D. Van Valin, Jr., 2008-11-21 Investigations of the Syntax Semantics Pragmatics Interface presents on going research in Role and Reference Grammar in a number of critical areas of linguistic theory verb semantics and argument structure the nature of syntactic categories and syntactic representation prosody and syntax information structure and syntax and the syntax and semantics of complex sentences In each of these areas there are important results which not only advance the development of the theory but also contribute to the broader theoretical discussion In particular there are analyses of grammatical phenomena such as transitivity in Kabardian the verb less numeral quantifier construction in Japanese and an unusual kind of complex sentence in Wari Chapakuran Brazil which not only illustrate the descriptive and explanatory power of the theory but also present interesting challenges to other approaches In addition there are papers looking at the implications and applications of Role and Reference Grammar for neurolinguistic research parsing and automated text analysis

Morphosyntactic Development in Child Emirati Arabic
 Dimitrios Ntelitheos, 2024-09-23

This book investigates selected aspects of the grammatical development of Emirati Arabic the variety of Gulf Arabic spoken in the United Arab Emirates and closely related to the varieties spoken in the rest of the Gulf States While the acquisition of Arabic as a second language has been widely studied first language acquisition of different Arabic dialects has received much less attention Ntelitheos addresses this disparity by presenting a number of systematic studies on the acquisition of Emirati Arabic grammar based on a two year longitudinal corpus of six children He discusses the acquisition of the nominal domain including definiteness and possession the acquisition of verbal functional structure and agreement and the acquisition of word order and negation in the syntactic domain In addition he defines several developmental stages for Emirati Arabic based on established diagnostic tests The

discussion is framed within a general survey of the relevant literature in Arabic acquisition studies and combines new empirical data with rigorous discussion of several long standing theoretical problems in the broader field of child language development

Butler, Javier Martín Arista, 2009-01-14 This collection of papers brings together contributions from experts in functional linguistics and in Construction Grammar approaches with the aim of exploring the concept of construction from different angles and trying to arrive at a better understanding of what a construction is and what roles constructions play in the frameworks which can be located within a multidimensional functional cognitive space At the same time the volume has a historical dimension for instance in plotting the developments which led to recent models The book is organised in three sections the first deals with particular theoretical issues the second is devoted to the recent Lexical Constructional Model and the third presents a number of analyses of specific constructions The volume thus makes an important contribution to the ongoing debate about the relationship between functionalist and constructionist models
