African Identity in Post-Apartheid Public Architecture Jonathan Alfred Noble, 2016-12-05 Since the end of Apartheid there has been a new orientation in South African art and design turning away from the colonial aesthetics to new types of African expression This book examines some of the fascinating and impressive works of contemporary public architecture that concretise imaginative dialogues with African landscapes craft and indigenous traditions Referring to Frantz Fanon's classic study of colonised subjectivity *Black Skin White Masks* Noble contends that Fanon's metaphors of mask and skin are suggestive for architectural criticism in the context of post Apartheid public design Taking South Africa's first democratic election of 1994 as its starting point the book focuses on projects that were won in architectural competitions Such competitions are conceived within ideological debates and studying them allows for an examination of the interrelationships between architecture politics and culture The book offers insights into these debates through interviews with key parties concerned architects competition jurors politicians council and city officials artists and crafters as well as people who are involved in the day to day life of the buildings in question

Architecture and the Public Good Tom Spector, 2021-06-01 Why has explaining the value of the architecture profession proven so difficult The architecture profession can be well defended by demonstrating the public good which results from its protected practice Although the book believes in this approach this approach immediately raises the thorny questions of just who is the public and what is its good To answer these questions to explain why the profession has done a poor job explaining itself and to propose a fresh perspective are the challenges set out in this book The book dissects the internal weaknesses and external forces which have prevented architects from asserting their value to the public explains how the concept of the public is itself widely misunderstood investigates the shifting boundaries of the public and private realms and proposes a series of measures by which we can assess and improve an architectural work's publicness Through a renewed focus on the public good that everyday architects are capable of as a profession the book charts an ultimately optimistic program for the architecture profession's renewal

Hille, 2018-12-07 *The New Public Library* is an in depth design study of an exemplary collection of recent public libraries and the historical precedents that have informed and inspired their development. An introductory overview presents seven critical themes that characterize public library design past and present highlighting the expressive architectural potential of this unique and important building type. A survey of over 40 historically significant libraries traces the development of the building type over time with a primary focus on precedents from the US and northern Europe where the modern public library originated and its design has been most comprehensively developed. A selection of nearly 50 contemporary projects from the past 30 years focuses on the most current developments in public library design with a diverse and varied collection of work by over 35 regional, national and international design firms. Highly visual in its presentation the study includes 885 color photographs and illustrations and 195 scale drawings. *The Ashgate Research Companion to New Public Management* Tom Christensen, Per Lægroid, 2016-03-23 This collection provides a comprehensive state of the art review of current research in the field of New Public Management (NPM) reform. Aimed primarily at a readership with a special interest in contemporary public sector reforms *The Ashgate Research Companion to New Public Management* offers a refreshing and up to date analysis of key issues of modern administrative reforms. This volume comprises a general introduction and twenty nine chapters divided into six thematic sessions each with chapters ranging across a variety of crucial topics in the field of New Public Management reforms and beyond. The principal themes to be addressed are *The Role of Public Agencies in Fostering New Technology and Innovation in Building* National Research Council, Division on Engineering and Physical Sciences, Commission on Engineering and Technical Systems, Committee on New Technology Innovation in Building, 1992-02-01 This book explores innovation in the U S construction related industries i.e. design services construction building materials and products manufacture and facilities operation and maintenance and recommends a strategy for fostering new technology. These industries account for about ten percent of the U S economy federal agencies themselves spend some 15 billion annually on construction. A government strategy based on federal agencies that encourage applications of new technology for their own projects activities to enhance the pursuit and effective transfer of new technology to the U S private sector and increased support for targeted efforts to develop new technologies in specific areas will yield many benefits. These include better cost quality and performance in government facilities generally improved quality of life and enhanced U S industrial competitiveness in international markets. *Bulletin of the New York Public Library* New York Public Library, 1916 Includes its Report 1896-19. *The New Public Art* Mara Polgovsky Ezcurra, 2023-09-12 In this edited volume Polgovsky Ezcurra and her contributors look at the rise in the creation of community focused art projects from public cinema to off stage dance and theatre and to the creation of anti monuments that have redefined what public art is and how people have engaged with it within Mexico City in particular as well as other regions of Mexico since the 1980s. With a mixture of in depth studies and artist dossiers the manuscript is organized into five main sections: Historical Return, Infra

City Halls and Civic Materialism Swati Chattopadhyay, Jeremy White, 2014-03-14 The town hall or city hall as a place of local governance is historically related to the founding of cities in medieval Europe As the space of representative civic authority it aimed to set the terms of public space and engagement with the citizenry In subsequent centuries as the idea and built form travelled beyond Europe to become an established institution across the globe the parameters of civic representation changed and the town hall was forced to negotiate new notions of urbanism and public space City Halls and Civic Materialism Towards a Global History of Urban Public Space utilizes the town hall in its global historical incarnations as bases to probe these changing ideas of urban public space The essays in this volume provide an analysis of the architecture iconography and spatial relations that constitute the town hall to explore its historical ability to accommodate the public in different political and social contexts in Europe Asia Australia Africa and the Americas as the relation between citizens and civic authority had to be revisited with the universal franchise under fascism after the devastation of the world wars decolonization and most recently with the neo liberal restructuring of cities As a global phenomenon the town hall challenges the idea that nationalism imperialism democracy the idea of citizenship concepts that frame the relation between the individual and the body politic travel the globe in modular forms or in predictable trajectories from the West to East North to South Collectively the essays argue that if the town hall has historically been connected with the articulation of bourgeois civil society then the town hall as a global spatial type architectural space urban monument and space of governance holds a mirror to the promise and limits of civil society
