twentieth century has seen two great waves of African American migration from rural areas into the city changing not only the country's demographics but also black culture. In her thorough study of migration to Houston, Bernadette Pruitt portrays the move from rural to urban homes in Jim Crow Houston as a form of black activism and resistance to racism. Between 1900 and 1950, nearly fifty thousand blacks left their rural communities and small towns in Texas and Louisiana for Houston. Jim Crow proscription, disenfranchisement, acts of violence and brutality, and rural poverty pushed them from their homes; the lure of social advancement and prosperity based on urban industrial development drew them. Houston's close proximity to basic minerals, innovations in transportation, increased trade, augmented economic revenue, and industrial development prompted white families, commercial businesses, and industries near the Houston Ship Channel to recruit blacks and other immigrants to the city as domestic laborers and wage earners. Using census data, manuscript collections, government records, and oral history interviews, Pruitt details who the migrants were, why they embarked on their journeys to Houston, the migration networks on which they relied, the jobs they held, the neighborhoods into which they settled, the culture and institutions they transplanted into the city, and the communities and people they transformed in Houston.

The Fruited Plain Walter Ebeling, 2023-11-15. Some consider American agriculture as one of the wonders of the modern world. In this book, Walter Ebeling tells its story. Professor Ebeling grew up on a farm, loves the soil, and had the good fortune to have been closely associated with the land in all its aspects. Beginning with a brief history of why and how preagricultural peoples changed from hunters and gatherers and eventually became tillers of the soil, Professor Ebeling then deals with the seven geographic regions of the United States from the East to California, giving the history and present status of agriculture for each region. Although the main thrust of *The Fruited Plain* is the drama, romance, and excitement of the American agricultural experience, Professor Ebeling is concerned with the environmental, ecological, and sociological aspects of agriculture and its supporting industries. He discusses environmental problems in America that began when the Indians' shifting agriculture, allowing for long periods of soil restoration, was replaced by the white man's permanent agriculture. He examines the modern technology for a successful and environmentally viable permanent agriculture and how it can be implemented on a much larger scale. The questions asked and answered are: what are the principal environmental problems? What is being and/or can be done about soil erosion? Scarcity of water? Urban encroachment on agricultural lands? What directions can be taken by benevolent technology? Does technology have remedies for land that is susceptible to water erosion and loss of topsoil? Likewise, pollution and environmental degradation resulting from excessive use of pesticides. Our society much recognize the importance of protecting our agricultural resources, and Professor Ebeling, in this monumental book, gives many suggestions on how to accomplish the sustained utilization of America's great resource, the farmlands. Some consider American agriculture as one of the wonders of the modern world. In this book, Walter Ebeling tells its story. Professor Ebeling grew up on a farm, loves the soil, and had the good fortune to have been closely associated with the land in all its aspects.

Southern Enclosure John H.

Cable, 2023-12-15 Historians of the American South have come to consider the mechanization and consolidation of cotton farming the Southern enclosure movement to be a watershed event in the region's history. In the decades after World War II, this transition pushed innumerable sharecroppers, tenant farmers, and smallholders off the land, redistributing territory and resources upward to a handful of large, mainly white operators. By disproportionately displacing Black farmers, enclosure also slowed the progress of the civil rights movement and limited its impact. John Cable's *Southern Enclosure* is among the first studies to explore that process through the interpretive lens of settler colonialism. Focusing on east central Mississippi, home of the Mississippi Band of Choctaw Indians, Cable situates enclosure in the long history of dispossession that began with Indian Removal. The book follows elite white landowners and Black and Choctaw farmers from World War II to 1960, the period when the old labor-intensive farm structure collapsed. By acknowledging that this process occurred on taken land, Cable demonstrates that the records of agricultural agents, segregationist politicians, and the Bureau of Indian Affairs (BIA) are traces of ongoing colonization. The settler colonial framework rarely associated with the postwar South sheds important light on the shifting categories of race and class. It also prompts comparisons with other settler societies, states in southern and eastern Africa, for instance, whose timelines, racial regimes, and agrarian transitions were similar to those of the South. This postwar history of the South suggests ways in which the BIA's termination policy dovetailed with Southern segregationism and, at the same time, points to some of the shortcomings of the burgeoning field of settler colonial studies.

Origins of the New South, 1877-1913 C. Vann Woodward, 1981-08-01 *And Their Children After Them* Dale Maharidge, 2008-11-04
Winner of the Pulitzer Prize for Nonfiction in 1990. In *And Their Children After Them*, the writer-photographer team Dale Maharidge and Michael Williamson return to the land and families captured in James Agee and Walker Evans's inimitable *Let Us Now Praise Famous Men*, extending the project of conscience and chronicling the traumatic decline of King Cotton. With this continuation of Agee and Evans's project, Maharidge and Williamson not only uncover some surprising historical secrets relating to the families and to Agee himself but also effectively lay to rest Agee's fear that his work, from lack of reverence or resilience, would be but another offense to the humanity of its subjects. Williamson's ninety-part photo essay includes updates alongside Evans's classic originals. Maharidge and Williamson's work in *And Their Children After Them* was honored with the Pulitzer Prize for nonfiction when it was first published in 1990.

Habits of Industry Allen Tullos, 2017-10-01 *Habits of Industry* provides a richly descriptive social, historical, and cultural account of the Carolina Piedmont, the area between the Blue Ridge Mountains and the Coastal Plain, over the course of 150 years. By examining the social and religious culture of the region, Allen Tullos illuminates the lives of the working men and women whose habits of industry shaped their world. Tullos combines archival research with an

extensive collection of oral histories to shed new light on the essentially all white textile industry in the era before World War II He examines such topics as workers transition from an agrarian folk culture to an industrial working class the changing patterns of employers paternalistic relations and the contrasting and complimentary meanings of industry Using biographies and autobiographies of both mill owners and mill workers Tullos juxtaposes the entrepreneurial narratives of the Belks Hammetts Tompkinses Dukes and Loves with the equally remarkable stories of such workers as Ethel Hillard Alice and Grover Hardin and Nigel League
