Political Economy of Eco-sustainable Alternatives Richard Westra, 2025-08-22 Westra recounts how the unceremonious collapse of Soviet style socialism coupled with mounting awareness of unfolding environmental destruction and irreversible climate change opened the door to a new wide ranging social change literature In this exciting book he begins by tracing out the case for the Anthropocene He then provides an unparalleled inclusive critical exploration of the plurality of progressive designs on offer These include the Green New Deal nowtopias of cooperative solidarity and commoning economies ecofeminism Degrowth society as well as ecosocialism and democratic socialism Westra firstly explains why the Green New Deal program to sustainably develop capitalism is unworkable given the boundedness of resources necessary to generalize the advanced economy way of life it seeks to maintain Secondly while he concurs with

much that the new social change literature offers his concern is with the way it abandons a major caution that had been leveled at so called utopian socialists in the past To be sure the problem does not reside with bursts of creative future directed thinking in themselves Rather where difficulties arise is over the paucity of attention devoted to questions of economic coordination and principles of economic viability Westra explains how only by combining several economic principles each operating at a determinate scale and devoted to specific elements of human social and material reproduction will the promise of an equitable eco sustainable human future be realized This unique volume will be of interest to academic specialists and students of political economy economics environmental sustainability sociology and political science Progressive policymakers and social activists will also find its arguments refreshing and compelling Political Economy and Global Capitalism Robert Albritton,Bob Jessop,Richard Westra,2010 This volume brings together original and timely writings by internationally renowned scholars that reflect on the current trajectories of global capitalism and in the light of these consider likely possible or desirable futures It offers theory informed writing that contextualizes empirical research on current world historic events and trends with an eye towards realizing a future of human social and economic betterment

The Governance Gap Penelope Simons,Audrey Macklin,2014-07-11 This book explores the persistence of the governance gap with respect to the human rights impacting conduct of transnational extractive corporations operating in zones of weak governance The authors launch their account with a fascinating case study of Talisman Energy s experience in Sudan informed by their own experience as members of the 1999 Canadian Assessment Mission to Sudan Harker Mission Drawing on new governance reflexive law and responsive law theories the authors assess legal and other non binding governance mechanisms that have emerged since that time including the UN Guiding Principles on Business and Human Rights They conclude that such mechanisms are incapable of systematically preventing human rights violating behaviour by transnational corporations or of assuring accountability of these actors or recompense for victims of such violations The authors contend that home state regulation while not a silver bullet has a crucial role to play in regulating such conduct They pick up where UN Special Representative John Ruggie s Guiding Principles on Business and Human Rights left off and propose an innovative robust and adaptable template for strengthening the regulatory framework of home states Their model draws insights from the theoretical literature leverages existing public private transnational national soft and hard regulatory tools and harnesses the specific strengths of state based governance This book will be of interest to academics policy makers students civil society and business leaders Environmental Skill Mark Coeckelbergh,2015-02-20 Today it is widely recognized that we face urgent and serious environmental problems and we know much about them yet we do very little What explains this lack of motivation and change Why is it so hard to change our lives This book addresses this question by means of a philosophical inquiry into the conditions of possibility for environmental change It discusses how we can become more motivated to do environmental good and what kind of knowledge we need for this and explores the relations between

Hegemonic Transitions, the State and Crisis in Neoliberal Capitalism Yildiz Atasoy, 2009-01-08 More than 15 years have passed since the end of the Cold War but uncertainty persists in the political economic shaping of the world economy and state system Although many countries have institutionalized neoliberal policies since the mid 1970s these policies have not taken hold to the same degree nor have their effects been uniform across all countries Nevertheless there has been widespread deepening of inequalities and therefore scepticism towards the neoliberal project Uncertainty prevails not only in the relations between states but also in the relations between forces of capital citizens and political power within states Moreover there is conceptual confusion in our understanding of the events and processes of neoliberal global transformation This collection of essays provides a comprehensive theoretical and empirical examination of neoliberal restructuring as a complex political process In an effort to penetrate and clarify this complexity the book explores the connections between the economy state society and citizens while also offering current examples of resistance to neoliberalism The book provides a forum for rethinking politics that represents a turn to societal forces as essential not only to the uncovering of this complexity but also to the formulation of democratic possibilities beyond global

hegemonic projects The book does not seek to produce a new model for social change nor does it dwell on the spatial aspects of modernity's new form or the emergence of a new state hegemony China or new forms of rule empire in managing the world capitalist economy Instead the book argues that an understanding of hegemonic transformations requires the problematization of global power as embedded in historically specific social relations

TESOL and Sustainability Jason Goulah, John Katunich, 2020-05-14 In the burgeoning field of ecolinguistics little attention has been given to the ways in which English language teaching is and has become implicated in global ecological crises This book begins a dialogue about the opportunities and responsibilities presented to the TESOL field to re-orient professional practice in ways that drive cultural change and engender alternate language practices and metaphors Covering a diverse range of topics including anthropogenic climate change habitat loss food insecurity and mass migration chapters argue that such crises require not only technological innovation but also cultural changes in how human beings relate to each other and their environment Arguing that it is incumbent upon the field of English language teaching to reckon with such cultural changes in how and what we teach *TESOL and Sustainability* addresses the ways in which discourses such as eco pedagogy the critique of neo liberalism non Western philosophy and post humanist thought can and must inform how and what is taught in ESL and EFL classrooms

Haunting the Knowledge Economy Jane Kenway, Elizabeth Bullen, Johannah Fahey, Simon Robb, 2006-11-22 This highly original book provides an engaging and critical introduction to the knowledge economy The knowledge economy is a potent force pervading global and national policy circles Yet few people outside the field of economics understand its central ideas and practices This book makes these accessible But it does much more It provokes conversations between the knowledge economy and those marginalized economies that haunt it the risk gift libidinal and survival economies These illuminate the knowledge economy's shortcomings and point to alternative possible systems of exchange and sets of values This multi disciplinary study takes the knowledge economy out of the hands of the economists and brings it into creative tension with the ideas of key thinkers from sociology anthropology philosophy and ecology Illustrating the benefits of conversing with the ghosts of alternative economies this provocative book will unsettle the way in which the knowledge economy is understood Groundbreaking and globally applicable it has been authored by internationally respected authors and its conceptual breadth pertains to a range of disciplines and gives it its wide appeal

feminism ecological philosophy the social sciences more generally and a range of religious and non religious cosmologies Drawn from diverse disciplinary backgrounds the contributors in this book apply their combined professional expertise and active engagement to illuminate the difficult choices that lie ahead **Life Without Money** Anitra Nelson,Frans Timmerman,2011-11-07 The money based global economy is failing The credit crunch undermined capitalism s ability to ensure rising incomes and prosperity while market led attempts to combat climate change are fought tooth and nail by business as environmental crises continue We urgently need to combat those who say there is no alternative to the current system but what would an alternative look like The contributors to *Life Without Money* argue that it is time radical non market models were taken seriously The book brings together diverse voices presenting strong arguments against our money based system s ability to improve lives and prevent environmental disaster Crucially it provides a direct strategy for undercutting capitalism by refusing to deal in money and offers money free models of governance and collective sufficiency *Life Without Money* is written by high profile activist scholars including Harry Cleaver Ariel Salleh and John O Neill making it an excellent text for political economy and environmental courses as well as an inspiring manifesto for those who want to take action **Justice in the United States** Judith Blau,Alberto Moncada,2006-03-03 *Justice in the U S* is a sequel to *Human Rights Beyond the Liberal Vision* and the second in a trilogy on human rights The Bill of Rights of the U S Constitution explicitly clarifies the personal political and civil rights of persons and by court interpretation the rights of corporations Yet in the twentieth century following World War II most world leaders reached the conclusion that political and civil rights were not sufficient and they had to be supplemented with additional rights that would protect their citizens and create more robust societies By the end of the century most countries had amended their constitutions to include many other rights notably those pertaining to social security health care housing decent jobs women minorities cultural and language rights and environmental protections This amounted to nothing less than a worldwide constitutional revolution but it has gone largely unnoticed in the United States In this volume the authors compare the constitutional provisions of different nation states and summarize some of the relevant United Nations human rights declarations and treaties To encourage US citizens to think critically about their Constitution in light of the constitutions of other states the authors present a draft revision of the U S Constitution Of course revision of the Constitution must be a comprehensively a democratic process and the authors wish to show how this process might begin **Rethinking Nature** Aurélie Choné,Isabelle Hajek,Philippe Hamman,2017-05-18 This textbook provides an overview of different ways of conceptualising nature in epistemological terms reflecting the tensions between the polarities of humans as masters or protectors of nature or as part of or outside of nature
