

THE NEW SOCIETY

THE ANATOMY OF INDUSTRIAL ORDER

PETER F. DRUCKER

AUTHOR OF "THE END OF ECONOMIC MAN" AND
"CONCEPT OF THE CORPORATION"

The world revolution is being "made in U.S.A.," not in Moscow. It springs from a new institution—the giant industrial enterprise. It does not merely overturn governments. It creates a new kind of society. Here is the first complete picture of this emerging society, together with practical solutions for the problems it creates for both management and unions. By "the most fruitful political thinker on these shores." (The New York Times)

New Society The Anatomy Of Industrial Or:

The New Society Peter F. Drucker, 2011-12-31 In *The New Society* Peter Drucker extended his previous works *The Future of Industrial Man* and *The Concept of the Corporation* into a systematic organized analysis of the industrial society that emerged out of World War II. He analyzes large business enterprises, governments, labor unions, and the place of the individual within the social context of these institutions. Although written when the industrial society he describes was at its peak of productivity, Drucker's basic conceptual frame has well stood the test of time. Following publication of the first printing of *The New Society*, George G. Higgins wrote in *Commonweal* that Drucker has analyzed as brilliantly as any modern writer the problems of industrial relations in the individual company or enterprise. He is thoroughly at home in economics, political science, industrial psychology, and industrial sociology and has succeeded admirably in harmonizing the findings of all four disciplines and applying them meaningfully to the practical problems of the enterprise. This well expresses contemporary critical opinion. Peter Drucker's new introduction places *The New Society* in a contemporary perspective and affirms its continual relevance to industry in the mid 1990s. Economists, political scientists, psychologists, and professionals in management and industry will find this seminal work a useful tool for understanding industry and society at large.

The new society Peter Ferdinand Drucker, 1993 *The New Society* Peter F. Drucker, 1982-01-01 **The New Society** Peter Ferdinand Drucker, 1982 The New Society Peter F. Drucker (Economist), 1951 *Theories of Industrial Society (RLE Social Theory)* Richard Badham, 2014-08-21 The concept of industrial society plays a dominant role in the social sciences. The Great Divide between pre industrial and industrial societies is commonly assumed to be the main bridge separating modern societies from the past and distinguishing developed from undeveloped states in the present era. In history, economics, politics, and sociology, the concept of industrial society underlies a wide variety of discussions, particularly those relating to economic development and social progress. Outside academic writing too, the concept exerts a great deal of influence. In the developing world, there is a widespread concern to industrialise, whilst in the developed world, there is growing uneasiness as to whether industrialisation is beneficial or not, but still the concept is central. This book examines critically the concept of industrial society, its pervasiveness and influence. It reviews all the major theories of industrial society and the research into the changing character of post industrial societies. It argues that the decision to use the concept severely restricts the social imagination and that the concept becomes increasingly less useful as criticism of the equating of industrialisation with social progress grows.

Critical Theory Now Philip Wexler, 2003-05-20 First Published in 1991. The first wave of North American critical theory was at once both academic and political. Interest in the works of the early Frankfurt School may have belonged to a more general renaissance of academic social theory that occurred in North America during the late 1960s and early 1970s. There is a new voice that comes through the historic political struggles of a student movement, of feminism, and of anti racist and ecological social movements. It is a voice also schooled in a sensitivity to the theories of social disintegration or an

implosion that characterizes the post modernist moment The authors represented in this reader are neither scholastic nor dogmatic They do not eschew postmodernism for hackneyed slogans nor do they embrace theory as an aesthetic substitute for theory as a socially transformative practice They are committed both to social theory and social practice and it is this which unifies the papers which follow The authors are a new generation of North American critical theorists who do not retreat to European humanism in the face of social cultural and self transformation
