The new suburbanites Robert W. Lake, **As Long as They Don't Move Next Door** Stephen Grant Meyer, 2001 The first full length national history of American race relations examined through the lens of housing discrimination Jacket

SuburbiaNation R. Beuka, 2016-04-30 The expansion of the suburban environment is a fascinating cultural development In fact the United States is primarily a suburban nation with far more Americans living in the suburbs than in either urban or rural areas Why were suburbs created to begin with How do we define them Are they really the promised land of the American middle class The concept of space and how we create it is a concept that is receiving a great deal of academic attention but no one has looked carefully at the suburban landscape through the lens of fiction and of film **Historic Residential Suburbs** David L. Ames, Linda Flint McClelland, 2002 *Housing Opportunities for Black and White Households* Donald C. Dahmann, 1982 *Ethnicity and Race in the U.S.A* Richard Alba, 2022-11-30 First published in 1988 Ethnicity and Race in the U S A is a collection of studies by leading scholars of ethnicity and race in the U S A Including chapters on Blacks American Indians Hispanics Asian Americans and white ethnicities it provides a data based analysis Drawing on the first published results from the 1980 census it gives a unified and comprehensive picture of both the dynamic and the static elements in ethnic and race relations It reveals the changing face of ethnicity and race in the U S A and in particular outlines the tremendous changes taking place among the white ethnics Based on a conference on Ethnicity and Race in the Last Quarter of the Twentieth Century held at the State University of New York in Albany the book will appeal to a wide range of scholars interested in American ethnic experience including sociologists historians political scientists social workers and students in ethnic studies programmes Policy Studies Review Annual Ray C. Edward Orser, 2021-10-21 This innovative study of racial upheaval and urban transformation in Baltimore Maryland investigates the impact of blockbusting a

practice in which real estate agents would sell a house on an all white block to an African American family with the aim of igniting a panic among the other residents These homeowners would often sell at a loss to move away and the real estate agents would promote the properties at a drastic markup to African American buyers In this groundbreaking book W Edward Orser examines Edmondson Village a west Baltimore rowhouse community where an especially acute instance of blockbusting triggered white flight and racial change on a dramatic scale Between 1955 and 1965 nearly twenty thousand white residents who saw their secure world changing drastically were replaced by blacks in search of the American dream By buying low and selling high playing on the fears of whites and the needs of African Americans blockbusters set off a series of events that Orser calls a collective trauma whose significance for recent American social and cultural history is still insufficiently appreciated and understood Blockbusting in Baltimore describes a widely experienced but little analyzed phenomenon of recent social history Orser makes an important contribution to community and urban studies race relations and records of the African American experience *Sharing America's Neighborhoods* Ingrid Gould ELLEN, Ingrid Gould Ellen, 2009-06-30 The first part of this book presents a fresh and encouraging report on the state of racial integration in America s neighborhoods It shows that while the majority are indeed racially segregated a substantial and growing number are integrated and remain so for years Still many integrated neighborhoods do unravel quickly and the second part of the book explores the root causes Instead of panic and white flight causing the rapid breakdown of racially integrated neighborhoods the author argues contemporary racial change is driven primarily by the decision of white households not to move into integrated neighborhoods when they are moving for reasons unrelated to race Such white avoidance is largely based on the assumptions that integrated neighborhoods quickly become all black and that the quality of life in them declines as a result The author concludes that while this explanation may be less troubling than the more common focus on racial hatred and white flight there is still a good case for modest government intervention to promote the stability of racially integrated neighborhoods The final chapter offers some guidelines for policymakers to follow in crafting effective policies

Kim, 1984 **Chicago** Gregory Squires, 1989-02 Despite local folklore Chicago is not always a city that works No longer the Hog Butcher for the World the Windy City has in recent decades pursued economic growth at all costs to the detriment of many of its citizens This book describes the social economic and political costs of the growth ideology and examines the populist response that promises an alternative Chicago Tracing the city s uneven economic development since World War II the authors demonstrate how unchecked growth in favor of private enterprise has resulted in severe poverty unemployment crime reduced tax revenues and property values a decline in municipal services and racial ethnic and class divisiveness And yet proponents of Daley style machine politics and the notion of the city as a growth machine still assert that the future of the city depends exclusively on

its ability to grow The victory of Harold Washington is the most visible symbol of the movement toward an alternative Chicago Naming different priorities and using more participatory tactics this challenge to the politics of growth promotes development that is responsive to social need not just market signals Author note Gregory D Squires is Associate Professor of Sociology at the University of Wisconsin Milwaukee Larry Bennett is Associate Professor and Chair of the Political Science Department at DePaul University Kathleen McCourt is Associate Professor and Chair of the Department of Sociology and Anthropology at Loyola University of Chicago Philip Nyden is Associate Professor of Sociology at Loyola University of Chicago

Detroit Joe Darden, 2010-06-18 Examining the genesis of modern Detroit as a hub of wealth and poverty **Hip Hop on Film** Kimberley Monteyne, 2013-09-13 Early hip hop film musicals have either been expunged from cinema history or excoriated in brief passages by critics and other writers Hip Hop on Film reclaims and reexamines productions such as *Breakin* 1984 *Beat Street* 1984 and *Krush Groove* 1985 in order to illuminate Hollywood s fascinating efforts to incorporate this nascent urban culture into conventional narrative forms Such films presented musical conventions against the backdrop of graffiti splattered trains and abandoned tenements in urban communities of color setting the stage for radical social and political transformations Hip hop musicals are also part of the broader history of teen cinema and films such as *Charlie Ahearn s Wild Style* 1983 are here examined alongside other contemporary youth oriented productions As suburban teen films banished parents and children to the margins of narrative action hip hop musicals by contrast presented inclusive and unconventional filial groupings that included all members of the neighborhood These alternative social configurations directly referenced specific urban social problems which affected the stability of inner city families following diminished governmental assistance in communities of color during the 1980s Breakdancing a central element of hip hop musicals is also reconsidered It gained widespread acclaim at the same time that these films entered the theaters but the nation s newly discovered dance form was embattled caught between a multitude of institutional entities such as the ballet academy advertising culture and dance publications that vied to control its meaning particularly in relation to delineations of gender As street trained breakers were enticed to join the world of professional ballet this newly forged relationship was recast by dance promoters as a way to invigorate and remasculinize European dance while young women simultaneously critiqued conventional masculinities through an appropriation of breakdance These multiple and volatile histories influenced the first wave of hip hop films and even structured the sleeper hit *Flashdance* 1983 This forgotten

ignored and maligned cinema is not only an important aspect of hip hop history but is also central to the histories of teen film the postclassical musical and even institutional dance Kimberley Monteyne places these films within the wider context of their cultural antecedents and reconsiders the genre's influence *The Spatial Scale of Crime* John R. Hipp, 2022-12-09

Combining insights from two distinct research traditions the communities and crime tradition that focuses on why some neighborhoods have more crime than others and the burgeoning crime and place literature that focuses on crime in micro geographic units this book explores the spatial scale of crime Criminologist John Hipp articulates a new theoretical perspective that provides an individual and household level theory to underpin existing ecological models of neighborhoods and crime A focus is maintained on the agents of change within neighborhoods and communities and how households nested in neighborhoods might come to perceive problems in the neighborhood and then have a choice of exit voice loyalty or neglect EVLN A characteristic of many crime incidents is that they happen at a particular spatial location and a point in time These two simple insights suggest the need for both a spatial and a longitudinal perspective in studying crime events The spatial question focuses on why crime seems to occur more frequently in some locations than others and the consequences of this for certain areas of cities or neighborhoods The longitudinal component focuses on how crime impacts and is impacted by characteristics of the environment This book looks at where offenders targets and guardians might live and where they might spatially travel throughout the environment exploring how vibrant neighborhoods are generated how neighborhoods change and what determines why some neighborhoods decline over time while others avoid this fate Hipp's theoretical model provides a cohesive response to the general question of the spatial scale of crime and articulates necessary future directions for the field This book is essential for students and scholars interested in spatial temporal criminology **Race, Culture, and Education** James A. Banks, 2006-09-27

Considered the father of multicultural education in the US and known throughout the world as one of the field's most important founder theorist and researcher James A Banks has collected here twenty one of his most important and best works from across the span of his career Drawing out the major themes that have shaped the field of multicultural education as well as outlining the development of Banks own career these articles chapters and papers focus on eight key issues black studies and the teaching of history research and research issues teaching ethnic studies teaching social studies for decision making and citizen action multiethnic education and school reform multicultural education and knowledge construction the global dimensions of multicultural education democracy diversity and citizenship education The last part of the book consists of a selected bibliography of all Banks publications over his forty year career as a source of further reading on each of these pivotal ideas *Groups in Contact* Norman S. Miller, Marilyn B. Brewer, 2013-09-11

Groups in Contact The Psychology of Desegregation uses the contact hypothesis as a point of departure and provides new data obtained in a variety of social contexts The contact hypothesis states that attitudes toward a disliked social group will become more positive with increased interpersonal interaction The various chapters provide a picture of the

desegregation process as a complex interplay between the cognitive processes within the individual and the structural features of the social environment. What emerges is an expanded theory of contact based on social categorization and social comparison processes. The book is organized into three parts. The chapters in Part I deal with issues of intergroup contact in a wide range of cultures and settings, each focusing on a particular social or political factor that influences receptivity to intergroup interaction and affects its outcomes. The chapters in Part II review the effects of specific interventions that have been introduced into desegregation settings with the intent of improving intergroup acceptance in those settings. Part III provides a systematic integration of the preceding chapters within a common theoretical framework. Although this book is written primarily from the perspective of social psychology, it is intended for students of intergroup relations in all disciplines. It was also written with policymakers as well as social science researchers in mind.

Classic Readings in Urban

Planning Jay Stein, 2018-02-06. This new edition of the best anthology in planning includes 33 selections by many of the profession's most respected thinkers and eloquent writers. Returning editor Jay M. Stein chose the articles about half of them new to this edition based on suggestions from colleagues and students who used the first edition recommendations from planning scholars, awards for writing in the field of planning, and his own review of recent planning literature. *Classic Readings in Urban Planning* offers an unparalleled depth of coverage and range of perspectives on traditional aspects of planning as well as on important contemporary issues. This is an exceptional main or supplementary textbook for advanced undergraduate or beginning graduate level students in urban and regional planning. As a general overview of the field of urban planning, it is also an excellent choice for planning commissioners, practicing planners, and professionals in related fields such as environmental and land use law, architecture, and government. An abstract introduces each reading, and each section includes suggestions for additional readings suitable for more extensive study. Many of these are also classics that could not be included as a main selection.

Suburban Alchemy Nicholas Dagen Bloom, 2001. In *Suburban Alchemy: 1960s New Towns and the Transformation of the American Dream*, Nicholas Dagen Bloom examines the new town movement of the 1960s which sought to transform the physical and social environments of American suburbs by showing that idealism could be profitable. Bloom offers case studies of three of the movement's more famous examples: Reston, Virginia; Columbia, Maryland; and Irvine, California, to flesh out his historical account. In each case, innovative planners mixed land uses and housing types, refined architectural, graphic, and landscape design, offered well-defined village and town centers, and pioneered institutional planning. As Bloom demonstrates, these efforts did not uniformly succeed and attempts to reshape community life through design notably faltered. However, despite frequent disappointments and compromises, the residents have kept the new town ideals alive for over four decades and produced a vital form of suburban community that is far more complicated and interesting than the early vision promoted by the town planners. Lively chapters illustrate efforts in local politics, civic spirit, social and racial integration, feminist innovations, and cultural sponsorship. *Suburban Alchemy* should be of

interest to scholars of U S urban history planning history and community development as well as the general reader interested in the development of alternative communities in the United States
