New Technologies And Developments In Library And Information Science:

New Technologies and Developments in Library and Information Science Chander Parkash, 1996 New Information Technologies and Libraries H. Liebaers, W.J. Haas, W.E. Biervliet, 2013-06-29 The nucleus of this volume consists of a number of papers presented at the Advanced Research Workshop on *The Impact of New Information Technologies on Library Management Resources and Cooperation* held in Luxembourg from 19-23 November 1984. The workshop was a joint effort of four international organisations. The Scientific Affairs Division of the North Atlantic Treaty Organization through a personal commitment and interest expressed by Dr H Durand Assistant Secretary General for Scientific Affairs was the first and major sponsor acting as a catalyst in enabling the Workshop to take place. Through its support for travel and subsistence costs of some of the North American participants the Workshop could become a platform for the exchange of ideas between parties concerned with information handling and transmission and information policy in Western Europe and North America. The Directorate General for Information Market and Innovation of the Commission of the European Communities hosted the Workshop in its facilities the Jean Monnet Building in Luxembourg also providing for simultaneous translation in the main languages of the European Community. Moreover the Commission generously funded the participation of key participants from Community countries and provided participants with ample information on existing Community programmes related to electronic publications electronic transmission of documents copyright problems problems of standards telecommunication and so on. The Council of Europe supported attendance from Sweden Austria and Spain. And lastly the European Cultural Foundation organised the event on behalf of all these organisations.
