New Testament A Critical Introduction:

A Critical Introduction to the New Testament Carl R. Holladay, 2011-07-01 This book introduces the New Testament in two senses it not only provides basic literary and historical information on each of the twenty seven writings but also orients readers to the religious theological and ethical issues related to the message and meaning of Jesus Christ The overall goal is to help interested readers of the New Testament become informed responsible interpreters of these writings and thereby enrich their personal faith and understanding By giving special emphasis to how the New Testament has helped shape the church s identity and theological outlook throughout the centuries as well as the role it has played within the broader cultures of both East and West this introduction also seeks to assist readers in exercising creative informed leadership within their own communities of faith and in bringing a deeper understanding of early Christianity to their conversations with the wider public Along with separate chapters devoted to each New Testament writing there are chapters explaining how this collection of texts emerged as uniquely authoritative witnesses to the church s faith why they were recognized as canonical whereas other early Christian writings were not how the four canonical Gospels are related to one another including a discussion of the Synoptic Problem how the Jesus tradition his teachings stories from his ministry and the accounts of his suffering death and resurrection originated and developed into Gospels written in narrative form and how the Gospels relate to Jesus Christ as he was and is Also included is a chapter on the writings of Paul and how they emerged as a collection of authoritative texts for the church This chapter includes a discussion of ancient letter writing special considerations for interpreting the Pauline writings and Paul s decisive influence within the history of the church and western culture

A Critical Introduction to the New Testament Arthur Samuel Peake, 1928 The New Testament Edwin D. Freed, 1994
The purpose of this introductory text is to help the interested reader to learn about and engage in critical study of the New Testament It has been written for students and other lay people with no formal training in New Testament studies Although it is not intended to be a popular treatment the kind of book that usually oversimplifies material and presents it so rapidly that it rarely challenges thoughtful readers it avoids the technical language used in more advanced work Its aim is to inform not to convert to educate not to indoctrinate and it has been designed for those willing to go beyond denominational or romantic approaches First comes a general introduction to subjects important for understanding the settings of the New Testament writings The three parts which follow deal with Jesus and the first three Gospels Acts and Paul and his letters and writings from times of oppression and controversy the context in which the Fourth Gospel is studied There are useful figures and diagrams to illustrate points relating to sources and style and illustrations where these are relevant to the text The result is a valuable resource book which will enjoy the widest possible use

A Critical Introduction to the New Testament Arthur Samuel Peake, 1920 A Critical Introduction to the New Testament Reginald Horace Fuller, 1971 **Critical Introduction to the New Testament. Continuity and Application in Contemporary Life** Sixbert Sangwa, 2021-06-10

Academic Paper from the year 2020 in the subject Theology Biblical Theology grade 95 Nations University course Critical Introduction to the New Testament language English abstract This paper discusses the application of the New Testament in contemporary life with particular attention to how to distinguish the universal and limited or specific application of the texts as well as to provide a solution that reiterates the meaning and the means of salvation Christians often read the Bible a few verses or a single chapter at a time As a result they may overlook the context and draw unwarranted conclusions The critic on the other hand looks for the inconsistencies that inevitably throws him on the track In this paper the problem of proving the continuity of the New Testament is approached in a way that ties it together by means of a theme or connectivity Moreover since the material is now two thousand years old modern New Testament students are faced with the problem of application especially how to understand the original intention behind the New Testament for current human history However Jews and Muslims for their part are challenged by the question of biblical authority a problem that confuses many people but presents them with difficulties In other words the two overriding questions are what Christians mean by New and Old Testaments and the relationship between them This problem is compounded by the fact that Jews do not accept the New Testament while Muslims accept both in theory However the common Messianic theme of the two covenants ties them together so that the evidence points to the meaning of New Testament continuity and integration **A Critical**

A Critical Introduction to the New Testament Arthur S. Peake, 1979-12

A Critical Introduction to the New Testament Arthur S. Peake, Gerrit Dou, 2014-01-21

An excerpt from the beginning of the first chapter Introduction to the New Testament FOR the sake of convenience it is customary to divide the field of New Testament scholarship into various departments in which the critical historical exegetical and theological problems presented by the literature are investigated The division however must not blind us to the unity of the field and the close interrelation of its several parts The conclusion we reach in one section inevitably reacts on our study of another It might seem as if a passage bore the same interpretation whatever its date and whoever its author But this is by no means the case since the same expressions may mean different things on different lips or when addressed to varying conditions The ultimate aim of the New Testament student is to understand the religious and theological development which is reflected in the documents But to do this he must reconstruct the movement of external events and within this environment trace the career of the Founder and the growth of the primitive Church He must in other words pursue the study of New Testament history Then he must minutely examine the documents in detail that is he must devote himself to the exegesis of the New Testament Moreover he cannot master the various types of doctrine within the literature without confronting the problems of authorship nor can he trace the chronological development of thought without settling the relative date of his documents These problems of date and authorship are the special concern of New Testament Introduction And just as New Testament Theology depends for its results to no little extent on the sister sciences so it might be shown that each of these is dependent upon the rest Nevertheless while we cannot forget this fact of interdependence and the necessity that all should move forward together it is essential that we should isolate each for special study and in this volume we are concerned with the problems of New Testament criticism This science is divided into general and special introduction The former of these embraces Textual criticism and the history of the Canon the latter examines each book in turn with a view to the determination of its authorship its structure its date its local destination and kindred problems In the present volume the limits of space compel us to restrict ourselves special introduction In its modern form this science was

pre eminently the creation of F C Baur and the T bingen school Not of course that several of the topics discussed in it had not already been treated with skill and learning by earlier scholars but they had dealt with them rather as isolated questions whereas Baur and the brilliant band of scholars he gathered about him dealt with them as a connected whole and also brought the literature into most intimate relation to the whole development of the primitive Church In philosophy Baur was a Hegelian and he reconstructed the history of primitive Christianity in accordance with the formula that thought moves through thesis and antithesis to synthesis In other words a position is laid down which calls forth a contradiction These are gradually drawn together and at last merged in a higher unity Applying this formula to the history of primitive Christianity Baur conceived the whole development to exhibit the interplay of two forces Jewish Christianity on the one side and Paulinism on the other which ultimately by the drawing together of the opposing parties were reconciled in the Catholic Church of the second century while the representatives of the original tendencies the Ebionites on the one hand and Marcion on the other stood outside the compromise and were consequently branded as heretics Naturally however much this construction may have been suggested by philosophical principles it was not defended simply as an intuition
