New Threats And New Actors In International Security:

New Threats and New Actors in International Security E. Krahmann, 2005-01-14 Non state threats and actors have become key topics in contemporary international security as since the end of the Cold War the notion that state is the primary unit of interest in international security has increasingly been challenged Statistics show that today many more people are killed by ethnic conflicts HIV AIDS or the proliferation of small arms than by international war Moreover non state actors such as non governmental organizations private military companies and international regimes are progressively complementing or even replacing states in the provision of security Suggesting that such developments can be understood as part of a shift from government to governance in international security this book examines both how private actors have become one of the main sources of insecurity in the contemporary world and how non state actors play a growing role in combating these threats

From Pablo to Osama Michael Kenney, 2010-11 From Pablo to Osama is a comparative study of Colombian drug smuggling enterprises terrorist networks including al Qaeda and the law enforcement agencies that seek to dismantle them Drawing on a wealth of research materials including interviews with former drug traffickers and other hard to reach informants Michael Kenney explores how drug traffickers terrorists and government officials gather analyze and apply knowledge and experience The analysis reveals that the resilience of the Colombian drug trade and Islamist extremism in wars on drugs and terrorism stems partly from the ability of illicit enterprises to change their activities in response to practical experience and technical information store this knowledge in practices and procedures and select and retain routines that produce satisfactory results Traffickers and terrorists learn building skills improving practices and becoming increasingly difficult for state authorities to eliminate The book concludes by exploring theoretical and policy implications suggesting that success in wars on drugs and terrorism depends less on fighting illicit networks with government intelligence and more on conquering competency traps traps that compel policy makers to exploit militarized enforcement strategies repeatedly without questioning whether these programs are capable of producing the intended results

The Impact of Private Actors on Security Governance Gloria Westermeyer,2013-05-17 With the ever farther advancement of globalization governance has become one of the most prominent theoretical concepts to describe today s world Governance theory is concerned with a system of rule through non hierarchical governing modes such as networks and market mechanisms Initially the field of security was ignored as it was seen as the last bastion of the nation state When the concept of security governance emerged at the

beginning of the millennium it sought to take account of transnational threats such as nuclear proliferation or cluster bombs. However, the traditional security domain of the state, i.e. the provision of security by military force, is still exempt from governance theory. Provoked by the increasing support of private actors to military operations, Gloria Westermeyer aims to investigate whether this exemption is still valid. Based on the conduct of Intelligence Surveillance and Reconnaissance services in the German ISAF Mission, the author examines the impact of private actors on the governance of today's military affairs. What is the relative power of private security actors vis-à-vis the state? Which factors determine if, to what extent, and why private actors support the military? Under what circumstances and how may security functions be privatized without undermining the state's interest? *Explaining EU Internal Security Cooperation* Mark Rhinard, Raphael Bossong, 2017-12-22

Internal security is often hailed as a rapidly expanding area of European integration with a growing number of strategies, policies, and framework agreements in recent years. Yet actual cooperation, when viewed closely, proceeds at a halting pace, raising questions as to why cooperation appears so problematic. This book presents a novel, theoretically informed way to understand internal security cooperation in Europe. The approach treats internal security as a public good requiring collective action amongst sovereign governments. All governments must contribute to the production of a public good; once produced, the public good benefits all governments. Fundamental obstacles to producing a public good thus arise and can help explain the underlying difficulties facing European cooperation on internal security matters. The chapters in this book apply a public goods approach to different internal security issues, ranging from terrorism to border management and from environmental security to natural disasters. Each study demonstrates how the various goals of internal security cooperation resemble different forms of public goods and thus present different kinds of obstacles to effective cooperation. This book fills a theoretical gap in the literature on European internal security cooperation with a proven approach increasingly used in other scholarly fields. This book was published as a special issue of *European Security*.

Migration Across Boundaries
Parvati Nair, Tendayi Bloom, 2016-03-03

Bringing together scholars and practitioners from a range of disciplinary backgrounds working in Europe, North and South America, South Asia, and the Middle East, this volume explores the question of how to ensure that migration research feeds back into improving the lives of migrants. It emphasises the necessarily interdisciplinary and cross-boundary nature of migration research, offering methodological recommendations to anyone studying or working in the field and showing how migration studies can usefully affect real contexts by better exploring the potential that exists for both bridging academic disciplines and building links with work that occurs beyond strictly academic forums. Organised around the themes of methodological considerations and interdisciplinary approaches, the experiences of migrants as researchers and interaction between practitioners, policy makers, and academics, *Migration Across Boundaries* discusses the realities of the discourses that surround international migration, examining the proper role of academia in bringing together a range of stakeholders to formulate dialogic approaches to understanding migration. An international and

interdisciplinary contribution to our understanding of how research in migration can be brought to bear on the experiences of migrants and linked to the work of activists artists and policy makers this book will appeal not only to scholars and students of migration across the social sciences but also to those working in the fields of migrant advocacy and activism

Counter-Terrorism Networks in the European Union Claudia Hillebrand, 2012-10-03 Counter Terrorism Networks in the European Union Maintaining Democratic Legitimacy after 9 11 presents a model of democratic legitimacy for within international counter terrorism co operation Exploring the current practices of European Union EU counter terrorism policing developed after 9 11 it highlights the current significant challenges to democratic legitimacy and seeks to present tools and solutions which ensure democratic counter terrorism actions and the protection of human rights Counter terrorism policing is now a global concern with co operation between security authorities of different countries a crucial feature in the fight to prevent terrorism and extremism Yet given the emphasis on pre emption this type of policing tends to interfere to a far greater extent with the rights of the individual than traditional policing This book scrutinises the current focus of enhanced communication between counter terrorist associates at member state and EU levels within Europe alongside analysis of just how far the traditional protective mechanisms of accountability and oversight are managing to keep up with this development It proposes that current forms of counter terrorism policing within the EU should be understood as networks sets of expert institutional nodes or individual agents from at least two countries that are interconnected in order to authorize and provide security with regard to counter terrorism using the European Police Office Europol as a key example
