Redefining Transatlantic Security Relations Dieter Mahncke, Wyn Rees, Wayne Thompson, 2004-06-19 The transatlantic security relationship has been at the heart of cooperation since the onset of the Cold War and has been the foundation on which the stability of Europe has been built But the post Cold War period has raised major challenges for transatlantic relations as well as new security threats such as terrorism organized crime and drug trafficking These are fresh concerns in the sense that they have not been previously regarded as matters for US European cooperation Recent events such as the 1999 war in Kosovo the European Union s decision to create a Rapid Reaction Force and the US policy of proceeding with a ballistic missile defence capability have all contributed to tensions in transatlantic relations The transatlantic relationship has entered a new and highly uncertain period This book looks at the three main facets of the transatlantic security relationship the defense of Europe global challenges and new security threats

The Atlantic Alliance Under Stress David M. Andrews, 2005-07-21 Can the political institutions of the transatlantic alliance endure the demise of the Soviet enemy Did the Iraq crisis of 2002 3 signal the final demise of the Atlantic partnership If so what are the likely consequences In this book a distinguished group of political scientists and historians from Europe and the United States tackle these questions The book examines the causes and consequences of the crisis in Atlantic relations that accompanied the invasion of Iraq in March 2003 The authors collective focus is not on the war itself or how it was conducted or even the situation in Iraq either before or after the conflict Instead the crisis over Iraq is the starting point for an examination of transatlantic relations and specifically the Atlantic alliance an examination that is cross national in scope and multi disciplinary in approach

New Transatlantic Agenda and the Future Joerg Monar, 1998-12-18 This book presents the results of an international conference on the New

Transatlantic Agenda organized in Brussels in July 1996 by the Centre for European Politics and Institutions CEPI of the University of Leicester in cooperation with the Directorate General I of the European Commission and Kluwer Law International. While most of its chapters are revised versions of papers presented at the conference, some were commissioned afterwards in order to address several relevant issues which could not be covered adequately within the time limited framework of the conference. The book provides an analysis both of the innovative elements of the New Transatlantic Agenda and of the main challenges that EU-US relations will have to face at the turn of this century. While the main focus is on whether the New Transatlantic Agenda constitutes an adequate response to these challenges, this volume also explores the necessary conditions for a successful long term implementation of the Agenda and asks what lessons can be drawn in this respect from previous experiences in transatlantic cooperation. Emphasis has been given to the consideration of justice and home affairs as matters of EU-US cooperation not only because this is undoubtedly one of the most innovative areas of the New Transatlantic Agenda but because it is an area in which both governments are confronted with rapidly increasing challenges. This volume aims to make a significant contribution to the discussion of the future of the transatlantic relationship whose quality is likely to depend on the capability of both sides to respond with new approaches such as those laid out in the New Transatlantic Agenda to inevitable changes in both the bilateral and global contexts.

Japan and the G7/8 Hugo Dobson, 2004-07-31. This book analyses Japan's participation in the multilateral forum the G7/8 since its creation in 1975 through to the Kananaskis Summit in Canada in 2002. Alongside this unique political history of involvement in the summit process, Japan's contributions to the process, its alliance with the US and its position within the East Asian region and international society as a whole are also discussed in depth. Hugo Dobson explores the motivation of the Japanese government and non-governmental actors, aims and objectives and examines how and to what extent they have been achieved. Presenting a wealth of new research as well as interviews with some of the main Japanese participants in the summit process, this book gives a historically and theoretically informed analysis of Japan's role in the G7 and G8 from 1975 to 2002. It will be of interest to bureaucrats and politicians as well as scholars of Asian studies and international relations. Page i.

The European Union in the Security of Europe Steve Marsh, Wyn Rees, 2012-03-12. This book examines the European Union's contribution to providing security in Europe amidst an increasingly complex and challenging environment. In this new and comprehensive guide to the EU's role in security since the end of the Cold War, the authors offer an explanation of EU internal and external security regimes and argue that the Union has become an important exporter of security within its region. However, the Union's rhetorical ambitions and commitments continue to outstrip its capabilities and it lacks both a common conceptualisation of security and a meaningful shared strategic culture. Drawing extensively on primary sources, the book examines the Union's relations with the US and Russia in a time of shifting geostrategic calculations and priorities. With the EU capacity for enlargement slowing, this text presents a detailed assessment of EU security policies towards Central

Trade Relations with Europe and the New Transatlantic Economic Partnership United States. Congress. House. Committee on Ways and Means. Subcommittee on Trade, 2000 Old Europe, New Europe and the Transatlantic Security Agenda Kerry Longhurst, Marcin Zaborowski, 2013-09-13 The post September 11th security policies of Poland the UK France the US and Germany presented in this new book illustrate how and why the Atlantic community ruptured over Iraq a result in part it is argued of the existence of particular national strategic cultures Whilst the longer term effects of Iraq for the transatlantic security agenda have yet to fully transpire what is certain is that the EU's ambitions to become a credible security actor have been seriously questioned as has the notion of multilateralism as an international norm as has the function of international law The book addresses these issues by considering the evolution of the EU's role in the world and the development of American perspectives on the transatlantic security agenda This volume was previously published as a special issue of the journal *European Security* *Transatlantic Relations* United States. Congress. House. Committee on International Relations. Subcommittee on Europe, 2004 Survey of Current Affairs, 1998 **US Department of State Dispatch**, 1996 *New Beginnings* United States. Congress. House. Committee on Foreign Affairs, 2010 Transatlantic Economic Challenges in an Era of Growing Multipolarity Jacob F. Kirkegaard, Nicolas Véron, Guntram Wolff, 2012 Shifts in global economic dominance are by nature tectonic and never precipitated by single events The Great Recession of 2008-09 however has presented the

European Union its common currency the euro and the United States with new global challenges The transatlantic partnership has dominated the world economy since the early 20th century and based upon US and European values and interests has designed and sustained all its principal global political and economic institutions But countries outside the European Union and United States now account for about half of the world economy and in the aftermath of the Great Recession their share is growing rapidly Hence their increasing role and concomitant demands for greater influence over global economic governance pose a series of challenges and opportunities to the European Union and the United States as illustrated by the eclipse of the G 8 by the G 20 The contributions in this volume by subject area experts from the Peterson Institute for International Economics and Bruegel ponder how or whether the rise of outside actors of potentially equal or even greater economic weight will invariably force a rethinking of not only how the European Union and the United States should conduct policy externally towards the new rising economic poles but also of the substantive contents of the EU US bilateral economic and political relationship
