New Uses For Obsolete Building:

Creative Reuse of Buildings: Volume One Derek Latham, 2016-01-08 Addresses the advantages and practicalities involved in the issue of the creative re use of existing buildings *Public Buildings Cooperative Use* United States. Congress. House. Committee on Public Works and Transportation. Subcommittee on Public Buildings and Grounds, 1976 Old Buildings, New Forms Françoise Bollack, 2013-11-12 It is clear that working with historic structures is both more environmentally sustainable and cost effective than new architecture and construction and many believe that the best design occurs at the intersection of old and new Françoise Astorg Bollack presents 28 examples gathered in the United States and throughout Europe and the Middle East Some are well known Mass MOCA Market Santa Caterina in Barcelona Neues Museum in Berlin and others are almost anonymous But all demonstrate a unique and appropriate solution to the problem of adapting historic structures to contemporary uses This survey of contemporary additions to older buildings is an essential addition to the architectural literature I have always loved old buildings An old building is not an obstacle but instead a foundation for continued action Designing with them is an exhilarating enterprise adding to them grafting inserting knitting new pieces into the existing built fabric is endlessly stimulating Françoise Astorg Bollack **Neighborhood Conservation and Property Rehabilitation** United States. Department of Housing and Urban Development. Library Division, 1979 **The Rebirth of the American City: September 20, 21, 22, 23, and 24, 1976** United States. Congress. House. Congress. House. Committee on Education, 1972 *Hearings, Reports, Public Laws* United States. Congress. House. Committee on Education and Labor, 1967 *Methods, Models, Simulations And Approaches Towards A General Theory Of Change - Proceedings Of The Fifth National Conference Of The Italian Systems Society* Gianfranco Minati, Mario Abram, Eliano Pessa, 2012-03-27 The book

contains the Proceedings of the 2010 Conference of the Italian Systems Society Papers deal with the interdisciplinary study of processes of changing related to a wide variety of specific disciplinary aspects Classical attempts to deal with them based on generalising approaches used to study the movement of bodies and environmental influence have included ineffective reductionistic simplifications Indeed changing also relates for instance to processes of acquisition and varying properties such as for software growing and aging biological systems learning cognitive systems and socio economic systems growing and developing through innovations Some approaches to modelling such processes are based on considering changes in structure e g phase transitions Other approaches are based on considering 1 periodic changes in structure as for processes of self organisation 2 non periodic but coherent changes in structure as for processes of emergence 3 the quantum level of description Papers in the book study the problem considering its transdisciplinary nature i e systemic properties studied per se and not within specific disciplinary contexts The aim of these studies is to outline a transdisciplinary theory of change in systemic properties Such a theory should have simultaneous corresponding and eventually hierarchical disciplinary aspects as expected for a general theory of emergence Within this transdisciplinary context specific disciplinary research activities and results are assumed to be mutually represented as within a philosophical and conceptual framework based on the theoretical centrality of the observer and conceptual non separability of context and observer related to logically open systems and Quantum Entanglement Contributions deal with such issues in interdisciplinary ways considering theoretical aspects and applications from Physics Cognitive Science Biology Artificial Intelligence Economics Architecture Philosophy Music and Social Systems

Building Democracy Graham Towers,2003-09-02 Building Democracy is a major contribution to the growing public debate about the revival of community values in the face of the self evident short comings of the free market specifically in terms of community architecture Providing a historical context and an authoritative account of a movement that is proving surprisingly extensive and enduring the book also examines the relevance of the approach to today's social and environmental problems particularly in the inner cities Community architecture was promoted in the early 1980s as the achievement of a handful of pioneering architects finding new ways of working with groups of ordinary people to help them develop their own homes and community facilities Building Democracy records the achievements of this movement and analyzes its contribution in addressing the problems of inner cities Beginning with the origins of the urban question in the industrialization of the 19th century the book goes on to look at the large scale urban redevelopment of the 1960s the latest and most concerted attempt to remodel Victorian cities and on to community action from which grew new approaches to design development and construction This book is of practical value to planners architects surveyors and landscape designers concerned with socially relevant design as students or professionals It will also be of interest to many people in the voluntary sector and in local government

Selected Cases on Real Property Christopher Gustavus Tiedeman,1897

Building Adaptation James Douglas,2006-08-11 As existing buildings age nearly half of all construction activity in Britain

is related to maintenance refurbishment and conversions Building adaptation is an activity that continues to make a significant contribution to the workload of the construction industry Given its importance to sustainable construction the proportion of adaptation works in relation to new build is likely to remain substantial for the foreseeable future especially in the developed parts of the world Building Adaptation Second Edition is intended as a primer on the physical changes that can affect older properties It demonstrates the general principles techniques and processes needed when existing buildings must undergo alteration conversion extension improvement or refurbishment The publication of the first edition of Building Adaptation reflected the upsurge in refurbishment work The book quickly established itself as one of the core texts for building surveying students and others on undergraduate and postgraduate built environment courses This new edition continues to provide a comprehensive introduction to all the key issues relating to the adaptation of buildings It deals with any work to a building over and above maintenance to change its capacity function or performance The Rebirth of the American City United States. Candide 4 Axel Sowa,2011 Candide is a peer reviewed journal dedicated to exploring the culture of knowledge specific to architecture It is released twice a year in English and German Each issue of Candide is made up of five distinct sections This frame work responds to the diversity of architectural knowledge being produced while challenging authors from all disciplines to test a variety of genres in order to write about and represent architecture Essay provides a forum for discussion of architectural knowledge including both fundamental research into and speculative arguments on its nature Analysis allows for in depth examination of built form how can the knowledge embodied in buildings be retrospectively extracted and creatively re used Project is directed at architects who see design as a theoretical tool how can a specific design proposal become a model of thought Encounters gives access to the personal knowledge of renowned unjustly forgotten or entirely unknown protagonists of architecture Fiction reflects the editors conviction that sometimes the imaginary may reveal more about architectural knowledge than science Urban Planning And The Development Process

David Adams,2012-09-10 This text is about the very essence of urban planning in a market economy It is concerned with people landowners developers investors politicians and ordinary members of the public who produce change in towns and cities as they relate to each other and react to development Pressure Whether Such Change Occurs Slowly And Is Almost Unnoticed Or happens rapidly and is highly disruptive a production process is creating a finished product the built environment This form of production known as the land and property development process is regulated but not controlled by the state Urban planning is therefore best considered as one form of state intervention in the development process Since

urban planning would have no legitimate basis without state power it is an inherently political activity able to alter the distribution of scarce environmental resources Through doing so it seeks to resolve conflicts of interest over the use and development of land However urban plans that appear to favour particular interests such as house builders above others such as community groups provoke intense controversy Development planning can thus become highly politicized with alliances and divisions between politicians not always explained by traditional party politics These issues are explored with particular reference to statutory plan making at the local level The author draws on his extensive research into urban planning and development making use of recent case studies and examples to illustrate key points There are four parts The first explores the operation of land and property markets and development processes and examines how the state intervenes in the form of urban planning The second part looks at the people and organizations who play a critical role in shaping the built environment and considers their relationship with the planning system Specific attention is paid to important actors in the development process such as landowners developers financial institutions professional advisers and to the variety of agencies in the public sector that aim to promote development This concludes with discussion of public private partnerships and growth coalitions The third part of the book concentrates on local development planning
