Great Western Railway the SS Great Britain the Clifton Suspension Bridge prefabricated hospital buildings for use during the Crimean War and more Born in Portsmouth in 1806 he followed in his French father's professional footsteps and went on to play a major role in the Industrial Revolution Brunel the great engineer would habitually throw out the rule book of tradition and established practice and start again with a blank sheet of paper taking the technology of the day to its limits and then going another mile But there was also Brunel the visionary who knew that transport technology had the power to change the world and that he had the ability to deliver those changes Finally there was Brunel the artist who rarely saw technology as just functional and strove to entwine the fruits of the Industrial Revolution with the elegance and grace of the neoclassical painter His bridges tunnels and railway infrastructure have entered a third century of regular use and the beauty of their design and structure has rarely been equaled The three decades from the 1830s to the 1850s saw an explosion of technical excellence and it was Brunel who in so many cases lit the blue touch paper He did not always get it right the first time and it was left to others to reap the fruits of his many labors Nevertheless his actions fast forwarded the march of progress by several decades This biography tells his impressive story Includes color photographs **Isambard Kingdom Brunel.**
