Same Cure:

New Path to Real Cures for Chronic Diseases: Jianqing Wu, Ping Zha, In this book we prove that medicine has failed to find cures for chronic diseases and failed to address its failures in the last 145 years We previously demonstrated that diseases studied under current medical models are remote from what is going on in the human body Medicine could not change it In more than a century medicine repeats the same errors in treatment of diseases To explore a new path to cures we have included our disease theories on chronic diseases new research models and required infrastructures Our disease theories tell that both disease progress and disease reversal are very slow processes Due to the slowness of changes a great cure is interfered by a large number of factors and the CNS Thus randomized controlled trials most probably produce meaningless or misleading findings Great cures are not what medical science can detect One of our subjects concerns human lifespans and the organ's functional reserve It implies that drug side effects cannot be studied by observing symptoms which can be seen only after organ functions have been depressed near the disability level Thus harmful side effects are not what medicine can always tell

The Cure For All Disease Terry Cooksey, 2015-07-08 The Cure For All Disease is the Owner's Manual for your body There is a cure for all disease It is 100% Natural and costs only a few dollars each month Your body heals you by giving it what it needs and making sure you avoid the poisons that cause all disease Water is the very Essence of Life Without water there would be no Life on this planet This is why I believe the quality of your health is equal to the quality of your water There are no cures with doctors and the medical profession They turned their backs on all cures and all real medicine once drug corporations began manufacturing synthetic man-made chemical medicines starting in 1939 Cures ended with Dr Jonas Salk's polio vaccine which he gave to mankind for free in 1954 Poisons cause all disease Without poisons even germs and viruses could not make you sick All disease requires an acidic body to exist in Your body becomes acidic by habitual consumption of poisons in your food drinks and water such as white flour white sugar high fructose corn syrup red meats and the chlorine and fluoride in your water This book teaches you how to reverse the acidity of your body correct your diet deficiencies and to value Water the very Essence of Life There are also some quick cures for some major diseases like migraines kidney stones heartburn and others These cures may seem like miracle cures but they are just science that has been around since man began living on this Earth The thing that the Author adds to those centuries of proven healing science is how to recognize and avoid the saturation of poisons that have inundated our food drinks and water supplies as well as personal hygiene items The Author teaches you how to clean up your current diet and also gives you details on other things you can do to improve your health and speed you on to freedom from disease This book was written by a man who cured himself of 10 diseases doctors REFUSE to cure And did so after doctors said he would be on dialysis or dead by 2009 Before then the Author did not know that doctors cure no one YOU must decide whether to remain without hope as you have with all doctors OR Learn how to use Natural Science to restore your Natural body to health to rid it of all disease For those who

choose Life and freedom from sickness this book was written for YOU A short and to the point book to get you cured of all disease as quickly as possible The Cure For All Disease *Cure Models* Yingwei Peng,Binbing Yu,2021-03-22 *Cure Models* Methods Applications and Implementation is the first book in the last 25 years that provides a comprehensive and systematic introduction to the basics of modern cure models including estimation inference and software This book is useful for statistical researchers and graduate students and practitioners in other disciplines to have a thorough review of modern cure model methodology and to seek appropriate cure models in applications The prerequisites of this book include some basic knowledge of statistical modeling survival models and R and SAS for data analysis The book features real world examples from clinical trials and population based studies and a detailed introduction to R packages SAS macros and WinBUGS programs to fit some cure models The main topics covered include the foundation of statistical estimation and inference of cure models for independent and right censored survival data cure modeling for multivariate recurrent event and competing risks survival data and joint modeling with longitudinal data statistical testing for the existence and difference of cure rates and sufficient follow up new developments in Bayesian cure models applications of cure models in public health research and clinical trials *Novel Approach to Curing Cancer* Jianqing Wu,Ping Zha,2019-08-11 In this book the authors make extensive comparison between medical treatments and health optimization methods an improved mind body model in order to determine their relative and TRUE benefits for cancer patients For the health optimization method they examine its use history acceptance and performance throughout its history and for medicine they examine medical treatment history leading cancer theories standard of care formation formation of legal frameworks and overwhelming performance data we could find from the massive medical literature We can show with irrefutable evidence why medicine cannot cure cancer and what role it is actually playing The book 1 discloses a systematic methodology for curing cancer in confidence 2 extensively discusses how to do right things to win a speed contest in fighting cancer 3 extensively discusses how to do right things to control cancer cell population a critical strategy for survival 4 provides detailed analysis of fatal common mistakes that have taken nine of ten cancer patient lives 5 exposes flaws in the cancer treatment models medical research model the foundation of medicine and 6 conduct a detailed analysis of four killer factors which are routinely found in nearly all cancer care The approach used to similar to one used in Health Optimization Engineering a new branch of health art The book teaches the decisive roles of SPEED NUMBER and MULTIPLE FACTORS and how to fight cancer by using a two way optimization methodology Those three terms and optimization method are not mentioned in medical books cancer research articles and are not part of the language used in hospitals Our simulation and our kinetic studies show that both cancer development and reversal processes would take many years The rates of reversals for cancer and all chronic diseases are so slow that medicine cannot accurately evaluate This is why medicine cannot recognize or refuses to acknowledge any cure that requires half a year to several years to accomplish The approach we use in this book is directly in conflict with three core concepts in

medicine dualism reductionism and population based approach Moreover we found that medical treatments can partially neutralize and totally nullify the curative benefits of our optimization method Based on our own findings and the results from reanalyzing massive existing medical publications we inevitably found that medical treatments are primarily responsible for creating the cancer panic and the treatments shorten lives in a super majority of cases We try to analyze every issue in the most comprehensive way Our analysis covers medical model and its legal framework leading cancer theories treatment development histories formation of standard of care control selections in drug trials the massive cancer controversies and mountains of actual performance data The most convincing evidence is the performance verdicts by recent medical studies and latest meta reviews We try to built a watertight case that precludes any of those arguments that have been made by proponents of the reductionist medical model
