The Theory of Value and Distribution in Economics Pierangelo Garegnani, Paul Samuelson, 2012-08-21 This new volume explores two alternative economic theories the classical theory and the marginalist or neoclassical theory through a discussion between two eminent economists Pierangelo Garegnani and Paul Samuelson The key themes of the volume are the difference in approaches to the explanation of the distribution of income and relative prices and therefore different approaches to all other economic problems in particular capital accumulation and economic growth The book discusses whether there is a classical approach to the theory of value and distribution at the core of economic theory that is

fundamentally different from the later marginalist or neoclassical theory In the volume the late Pierangelo Garegnani argues for the validity of Piero Sraffa's position on this issue whilst the late noble laureate Paul Samuelson vehemently contests it At a time of economic crisis the future of the discipline is far from certain and so it is extremely important to bring these debates back into the light by reproducing them together for the first time A comprehensive introduction by Heinz Kurz sets the debate in this context and provides crucial background to the arguments History of Economic Thought E. K. Hunt, 2002 Revolutionary advances in biomedical research and information systems technology pose new and difficult issues for American health care policy especially in the context of managed care Health Care Policy in an Age of New Technologies takes on this challenging array of issues where the dignity of individual life meets the imperatives of the national level health care system the right to die rationing of care organ transplants experiments with human embryos genetic research confidentiality of medical records and other ethical dilemmas Chapters on a patient's bill of rights and on medical education and physician training link the book to policy issues of direct concern to the public and practitioners Throughout the book the authors place critical questions in their political legal social economic and ethical context Each chapter ends with discussion points and a multimedia bibliography directs readers to relevant films documentaries and case studies **Samuelsonian Economics and the Twenty-First Century** Michael Szenberg, Lal Ramrattan, Aron A. D. Keita, 1992 This work examines the claim to scientific status made by supporters and practitioners of neoclassical economics The approach taken is that of the history and philosophy of science Analysis points to the conclusion that theories of economic choice are necessarily normative essentially because of the nature of human behavior *Foundations of Paul Samuelson's Revealed Preference Theory* Stanley Wong, 2006-01-13 Containing a new preface by Wong and a new introduction from Philip Mirowski this classic text within the philosophy of economics originally published over two decades ago is a tour de force against revealed preference *Arrow and the Ascent of Modern Economic Theory* George R. contributors to the economics of our age including our protagonist and are an important historical document *Neoclassical Theory Structure and Theory Development* B. Hamminga, 2012-12-06 There are quite a lot of recent books on the methodology of economics but all proceed from one or more of the following three fundamental assumptions 1 Meta apriorism it is a priori believed that the results of the philosophy of science of the past decades associated with the names of Popper Kuhn and Lakatos yield conceptual frameworks that can be used to describe the product of the economist's endeavours 2 Synchronism it is believed that the inspection of a theory of economics the presentation of some economic belief at a point in time reveals its logical structure and ipso facto the method by which the theory is constructed 3 Credulity it is believed that what economists themselves say on their own methods is true or at least of primary relevance In this book I endeavour to show that these assumptions are false First the philosophies of science by Popper Kuhn and Lakatos did not succeed in constructing a conceptual framework capable of describing theory development in economics Secondly this can only be seen as soon as not Zogic but history is taken to be the referee judging the adequacy of metatheories diachronism Thirdly the results of metaempiricaZ not meta aprioristic diachronic not synchronic research reveals that even economists themselves turn out frequently to have inadequate metatheories upon which it is dangerous to rely suspicion instead of credulity Nobel Laureates in Economic Sciences Bernard S. Ruccio, Jack Amariglio, 2016-06-28 Of all the areas of contemporary thought economics seems the most resistant to the destabilizing effects of postmodernism Yet David Ruccio and Jack Amariglio argue that one can detect within the diverse schools of thought that comprise the discipline of economics moments that defy the modernist ideas to which many economists and methodologists remain wedded This is the first book to document the existence and to explore the implications of the postmodern moments in modern economics Ruccio and Amariglio begin with a powerful argument for the general relevance of postmodernism to contemporary economic thought They then conduct a series of case studies in six key areas of economics From the idea of the multiple self and notions of uncertainty and information through market anomalies and competing concepts of value to analytical distinctions based on gender and academic standing economics is revealed as defying the modernist frame of a singular science The authors conclude by showing how economic theory would change if the postmodern elements were allowed to flourish A work of daring analysis sure to be vigorously debated *Postmodern Moments in Modern Economics* is both accessible and relevant to all readers concerned about the modernist straightjacket that has been imposed on the way economics is thought about and practiced in the world today
