Chasing World-Class Urbanism Jacob Lederman,2020-07-14 Questions increasingly dominant urban planning orthodoxies and whether they truly serve everyday city dwellers What makes some cities world class Increasingly that designation reflects the use of a toolkit of urban planning practices and policies that circulates around the globe These strategies establishing creative districts dedicated to technology and design greening the streets reinventing historic districts as tourist draws were deployed to build a globally competitive Buenos Aires after its devastating 2001 economic crisis In this richly drawn account Jacob Lederman explores what those efforts teach us about fast evolving changes in city planning practices and why so many local officials chase a nearly identical vision of world class urbanism Lederman explores the influence of Northern nongovernmental organizations and multilateral agencies on a prominent city of the global South Using empirical data keen observations and interviews with people ranging from urban planners to street vendors he explores how transnational best practices actually affect the lives of city dwellers His research also documents the forms of resistance enacted by everyday residents and the tendency of local institutions and social relations to undermine the top down plans of officials Most important Lederman highlights the paradoxes of world class urbanism for instance while the priorities identified by international agencies are expressed through nonmarket values such as sustainability inclusion and livability local officials often use market centric solutions to pursue them Further despite the progressive rhetoric used to describe urban planning goals in most cases their result has been greater social economic and geographic stratification Chasing World Class Urbanism is a much needed guide to the intersections of culture ideology and the realities of twenty first century life in a major Latin American city one that illuminates the tension between technocratic aspirations and lived experience

Lotchin, 2002 Fortress California now in paperback for the first time links the growth of the U S military industrial complex to civic leaders who competed for military bases and military contracts to ensure economic growth Analyzing the growth of Los Angeles San Diego and San Francisco from 1910 to 1961 Roger W Lotchin discredits the

assumption that the industrialization of the Sunbelt was a result of a partnership between industry and the military. He provides instead a detailed and forceful argument that municipalities used federal resources to build urban empires and metropolitan military complexes. These have increased the flow of federal dollars into the state thereby shifting the focus of the military industrial complex from warfare to welfare.

Revitalizing the City Fritz W. Wagner, Timothy E. Joder, Anthony J. Mumphrey, Jr, Krishna M. Akundi, Alan F.J. Artibise, 2016-12-05 This practical work demonstrates that controlling urban growth and reviving central city economies are not mutually exclusive endeavors. Rather than rehash theories of urban development, the contributors describe and evaluate successful community tested approaches to sustaining our cities. *Revitalizing the City* provides actual case examples of urban success stories ranging from San Diego's smart growth initiative to brownfield redevelopment in Pittsburgh. The book is divided into four major sections: Urban Growth, Metropolitan Development and Administration, Central City Redevelopment Strategies, and Central City Suburban Cooperation. Each chapter includes an analysis of key issues, descriptions of specific local initiatives, highlights of effective policies or programs, and potential pitfalls to avoid. *Revitalizing the City* has broad appeal for the urban policy community as well as for undergraduate and graduate courses in urban sociology, geography, political science, and urban studies and planning.
