**African Hosts & Their Guests** W. E. A. van Beek, Annette M. Schmidt, 2012 Africa is a theme park for Western tourists to experience untouched wilderness untamed nature and truly authentic cultures where the hosts too are part of a discourse about the other and ourselves about wildness danger and roots Tourism is important for Africa international tourist arrivals to Africa continue to grow income from tourism is crucial to national economies and tourism investments are considered among the most profitable This edited volume deals with the interaction of local communities with tourists coming into their areas and villages Based upon a common theoretical approach fourteen cases of African tourism are discussed which involve direct contact between hosts and guests The viewpoint throughout is from the side of the locals establishing how the processes of interaction shape each small scale destination Crucial in Africa is the fact that the large majority of tourism is game oriented and the interaction between locals and visitors is very much tainted by this fact Central is the notion of the tourist bubble the infrastructure that is generated locally and internationally for hosting tourists as it is this institutional interface that tends to impact on the local society and culture not the tourists themselves directly The examples come from all over Africa from the Sahara to the Eastern Cape and from Kenya to Ghana All contributions are based upon original fieldwork Walter van Beek is professor of anthropology at Tilburg University and Senior Researcher at the African Studies Centre Leiden Annette Schmidt

**The Donkey in Human History** Peter Mitchell, 2018-02-14 Donkeys carried Christ into Jerusalem while in Greek myth they transported Hephaistos up to Mount Olympos and Dionysos into battle against the Giants They were probably the first animals that people ever rode as well as the first used on a large scale as beasts of burden Associated with kingship and the gods in the ancient Near East they have been and in many places still are a core technology for moving people and goods over both short and long distances as well as a supplier of muscle power for threshing and grinding grain pressing olives raising water ploughing fields and pulling carts to name just a few of the uses to which they have been put Yet despite this they remain one of the least studied and most widely ignored of all domestic animals consigned to the margins of history like so many of those who still depend upon them Spanning the globe and extending from the donkey's initial domestication up to the present this book seeks to remedy this situation by using archaeological evidence in combination with insights from history and anthropology to resituate the donkey and its hybrid offspring such as the mule in the unfolding of human history looking not just at what donkeys and mules did but also at how people have thought about and understood them Intended in part for university researchers and students working in the broad fields of world history archaeology animal history and anthropology but it should also interest anyone keen to learn more about one of the most widespread and important of the animals that people have domesticated
