*Sanity and Psychology of Communication* Carl I. Johnson, Pearson Custom Publishing, Dianne L. Blomberg, Catherine E. Curran, 1998-12-01      **The Psychology of War and Peace** Fred van Houten, 2013-06-29 Can a Baby Be an Enemy Our world is in a deep prolonged crisis The threat of global nuclear war the chronic condition of local wars the imperilled environment and mass starvation are among the major forms this crisis takes The dangers of massive overkill overexploitation of the environment and overpopulation are well known but surprisingly little has been said about their potential interactions their bearing upon each other If there were to be a nuclear confrontation between today's superpowers it might not take place in today's world but in a far less friendly habitat such as the world may be some decades hence And it need hardly be added that the era of this particular super power configuration may be waning rapidly its place to be taken by other international arrangements not necessarily less threatening To understand and cope with our situation we need correspondingly serious reflection This volume forms a welcome part of that process Unavoidably a large part of our thinking about the issues of human survival must be oriented to physical and biological aspects of the total danger But it has not escaped the authors of this book that coupled with these aspects there are profound psychological dangers such as loss of the sense of futuristic moral deterioration and a fatalistic decline in the will to struggle to protect our home the Earth

The Mass Psychology of Ethnonationalism Dusan Kecmanovic, 2013-11-11 Throughout the nineteenth and twentieth centuries ethnonationalism has left its indelible mark on Europe and every other continent The latest events in the Balkans in central and eastern Europe and in the former Soviet Union unequivocally testify to the power and influence of ethnonationalism at the end of the second millennium What forces make people so committed to their ethnonational groups that they are ready to ignore all other concerns first and foremost the rights and interests of people of other ethnicities What is the social psychological and anthropological underpinning of ethnonationalism And finally why and how do people adhere to nationalist attitudes and beliefs These questions are virtually impossible to avoid for anyone who has directly felt the impact of ethnonationalism but they also present themselves to anyone who has indirectly experienced the prejudices unleashed by ethnonationalist forces This book attempts to answer all these questions by focusing on national feeling and the social psychological and anthropological foundations that underlie the sense of belonging that is essential to nationalism No matter how qualitatively different nationalist attitudes and beliefs are from national sentiment the latter has to be considered in any study of nationalism      The Psychology of Communication Disorders in Individuals and Their Families Walter J.
