Building Blocks of Society James W. Cortada, 2020-11-25 The history of information is a rapidly emerging new subfield of history. Historians are identifying the issues they need to examine, crafting novel research agendas and locating research materials relevant to their work. Like the larger world around them, historians are discovering what it means to live and work in a world that increasingly sees itself as an information society. Long a discussion point among sociologists, economists, political leaders and media experts, historians are integrating their methods and research into the larger conversation. This book proposes a way to look at the history of information and to history as a whole that is simultaneously relevant to observers in other disciplines and familiar to historians of business, economics, sociology and technology. The author presents that advocacy in two ways: with theoretical and historiographical discussions of what information ecosystems and infrastructures are and their value for this kind of research; second, through a range of case studies applying those concepts. The wide range of case studies is purposeful in demonstrating the applicability of the ideas presented in the early methodological chapters. Themes mentioned in each of the early chapters are consistently applied in all subsequent chapters. This book breaks from the more traditional historiography of book history, sociological and philosophical discussions about knowledge and society. The first two chapters focus on the craft of the historian in this new field, better known as historiography and methods. Subsequent chapters are case studies showing what results when a historian writes about ecosystems and infrastructures, moving our discussion from theory to practice. The book is an important and substantive contribution to this new subfield, an essential primer as well as a major statement for all historians on how next to evolve their craft.

Before the Computer James W. Cortada, 2000 An investigation of the American data processing industry from its 19th century inception to the 20th century reliance on computing systems. The author describes how many instruments used by earlier offices, such as typewriters, tabulating machines and calculators, simply evolved into computers.

Using the Engineering Literature Bonnie A. Osif, 2016-04-19 With the encroachment of the Internet into nearly all aspects of work and life, it seems as though information is everywhere. However, there is information and then there is correct, appropriate and timely information. While we might love being able to turn to Wikipedia for encyclopedia-like information or search Google for the thousands of links.

Birth of Modern Facts James W. Cortada, 2023-01-09 For over twenty years, James W. Cortada has pioneered research into how information shapes society. In this book, he tells the story of how information evolved since the mid-nineteenth century. Cortada argues that information increased in quantity, became more specialized by discipline (e.g., mathematics, science, political science) and more organized. Information increased in volume due to a series of innovations, such as the electrification of communications and the development of computers, but also due to the organization of facts and knowledge by discipline, making it easier to manage and access. He looks at what major disciplines have done to shape the nature of modern information, devoting chapters to the most obvious ones. Cortada argues that understanding how some features of information evolved is useful for those who work in subjects that deal with their very construct and application.

such as computer scientists and those exploring social media and most recently history *The Birth of Modern Facts* builds on Cortada's prior books examining how information became a central feature of modern society most notably as a sequel to *All the Facts A History of Information in the United States since 1870* OUP 2016 and *Building Blocks of Society History Information Ecosystems and Infrastructures* R L 2021
