Second Course In Computer Science With Pascal:

A Second Course in Computer Science with Pascal McCracken, 1988-08-02 Second Course in Computer Science with Pascal McCracken, 1987 This new text introduces students of computer science to the theory implementation and applications of data structures and algorithms Important features of this book include an abstract data type ADT approach and informally analyzed implementations using the Big Oh notation There is a strong emphasis on program readability a point which is made in the first chapter and reinforced by example throughout Recursion is also stressed and a chapter is devoted to its explanation Clear tables and figures are used throughout the text and there are end of chapter exercises and suggestions for further study **A Second Course in Computer Science with MODULA-2** Daniel D. McCracken, William I. Salmon, 1987 Covering thoroughly the central subject of computer science data structures and algorithms this text offers a practical introduction to theory implementation and applications using the Abstract Data Type approach For each of the major data types it provides a definition in terms of objects and operations an illustration of its use and at least one method of implementation Specific topics include parsing simulation expression simplification BNF and backtracking Most implementations are analyzed informally through the Big Oh notation introduced in the first chapter Each discussion is followed by larger applications and overviews of related issues Special emphasis is placed on recursion which is fully explained and used to clarify other concepts in the book In addition program readability is also stressed and reinforced Throughout the superiority of Modula 2 over earlier languages is fully exploited Exercises comprise almost 15% of the text

An Introduction to Computer Science Using C Roger Eggen, Maurice Eggen, 1993 This text is intended for an introductory course in computer science The authors present a conceptual introduction to key concepts and methodologies of computer science C is the language of instruction and is integrated only as needed to highlight points and demonstrate concepts throughout the text In addition to numerous exercises laboratory activities are incorporated into each Chapter after Chapter 1 leading students through an experimental approach to the concepts and techniques covered in the text Peer-to-Peer Computing Alfred Wai-Sing Loo, 2007 Communications of ACM Internet Research IEEE Transactions on Parallel and Distributed Systems Parallel Computing IEEE Transactions on Computers ACM Transactions on Computer Systems

QBasic Robert J. Bent, George C. Sethares, 1995 This new text gives readers a general introduction to programming in QBasic a complete and easy to use programming language provided with the MS DOS operation system for IBM PC and compatible computers The authors explore the QBasic programming environment in detail including complete chapters on data files modular programming selection statements and arrays The book takes a learn by doing approach with numerous programming exercises and clearly worked out examples and takes readers through the entire programming process from problem statement to finished product BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved Data Abstraction and Structures Using C++ Mark R.
