Second Course in Computer Science with Modula 2 McCracken, *Data Abstraction and Structures Using C++* Mark R. Headington, David D. Riley, 1994 *Modular Programming Languages* Hanspeter Mössenböck, 1997-02-26 This book constitutes the refereed proceedings of the Joint Modular Languages Conference JMLC 97 held in Linz Austria in March 1997. The 24 revised full papers presented were carefully selected from a total of 55 submissions also included are full papers of two invited presentations. The book is devoted to languages techniques and tools for the development of modular extensible and type safe software systems. Among the programming languages covered are Modula Oberon Ada95 Eiffel Salher Java and others. The issues addressed include compiler technology persistence data structures typing distribution active objects real time programming inheritance reflection languages etc *An Introduction to Computer Science Using C* Roger Eggen, Maurice Eggen, 1993 This text is intended for an introductory course in computer science. The authors present a conceptual introduction to key concepts and methodologies of computer science. C is the language of instruction and is integrated only as needed to highlight points and demonstrate concepts throughout the text. In addition to numerous exercises laboratory activities are incorporated into each Chapter after Chapter 1 leading students through an experimental approach to the concepts and techniques covered in the text *A Second Course in Computer Science with Modula-2* Daniel D. McCracken, William I. Salmon, 1987 This new text introduces students of computer science to the theory implementation and applications of data structures and algorithms. Important features of this book include an abstract data type ADT approach and informally analyzed implementations using the Big Oh notation. There is a strong emphasis on program readability a point which is made in the first chapter and reinforced by example throughout. Recursion is also stressed and a chapter is devoted to its explanation. Clear tables and figures are used throughout the text and there are end of chapter exercises and suggestions for further study **A Second Course in Computer Science with PASCAL** Daniel D. McCracken, 1987-03-10 Focuses on the systematic study of data structures and algorithms. Coverage is almost identical to the recommendation of the Koffman Committee report for curriculum revisions for CS2. Using a strong Abstract Data Type ADT approach McCracken explores each topic in theory implementations and applications. Also data abstraction modularization and program verification are interwoven throughout the text so that their interrelationships with software engineering are clearly evident. Chapters cover the program development process arrays and records sets and strings stacks and queues recursion linked lists trees sorting searching and graphs. Text contains chapter introductions and summaries bibliographical notes historical references and footnotes **The Cumulative Book Index** , 1990 A world list of books in the English language ECOOP '88 European Conference on Object-Oriented Programming Stein Gjessing, Kristen Nygaard, 1988-07-19 The field of Object Oriented Programming OOP has attracted increasing attention during the last few years. OOP is now

recognized as an important tool for making better and more flexible information systems This book is the proceedings of the second European Conference on Object Oriented Programming ECOOP 88 that was held in Oslo Norway from August 15 to 17 1988 The objectives of ECOOP 88 were to present the best international work in the field of OOP to interested persons from industry and academia and to be a forum for the exchange of ideas and the growth of professional relationships Each of the 103 papers submitted was subject to a thorough refereeing process The 22 papers selected are collected in these proceedings together with one invited paper These 23 papers from 13 different countries comprise the currently best international work in the field of OOP The contents of the papers include areas such as Theory Languages Didactics Implementation Applications Concurrency and Databases The interest in object oriented programming is rapidly increasing especially within the areas of Concurrency and Databases With its 5 papers on concurrency and 7 papers on databases the proceedings contain important new material on these subjects This book is a must for persons who want to keep themselves up to date in the field of OOP
