Second Dune:

The Second Dune Shelby Hearon, 2003 The Second Dune Shelby Hearon's second novel was published in 1973 and won the Texas Institute of Letters Award as the best book of fiction of the year. Written when Hearon was forty three and just before her divorce the novel is seen from the point of view of suburban housewives and their mothers and daughters. Ellen Marshall divorced and remarried is troubled by her son's refusal to accept her second husband but takes great comfort from the five year old daughter of her second marriage. She hopes to be able to pass on to her daughter some of the knowledge that only women possess and to help little Ellen see that women need to break the bonds that society has forced upon them. As the narrator says early in the novel: Raised by women, schooled by women, we who are mothers now were taught to look across the gulf to men and count ourselves as they counted us. Ellen hopes her daughter will be different just as she is slowly becoming different herself.

The Geographical Journal, 1918 Plant Canopies Society for Experimental Biology (Great Britain). Meeting, 1989 This volume is a synthesis of current knowledge about the growth, development and functioning of plant canopies.

Ecology of Dunes, Salt Marsh and Shingle J.R. Packham, A. J. Willis, 1997-09-30 Summary Discusses coastal sand dune, shingle beach and salt marsh ecosystems communities based upon relatively unconsolidated granular deposits which frequently rest upon solid rock or much more rarely on peat.

Physics of Dry Granular Media H.J. Herrmann, J.-P. Hovi, S. Luding, 2013-06-29 Dry granular materials such as sand, sugar and powders can be poured into a container like a liquid and can also form a pile resisting gravity like a solid which is why they can be regarded as a fourth state of matter, neither solid nor liquid. This book focuses on defining the physics of dry granular media in a systematic way, providing a collection of articles written by recognised experts. The physics of this field is new and full of challenges but many questions such as kinetic theories, plasticity, continuum and discrete modelling also require the strong participation of mechanical and chemical engineers, soil mechanists, geologists and astrophysicists. The book gathers into a single volume the relevant concepts from all these disciplines, enabling the reader to gain a rapid understanding of the foundations as well as the open questions of the physics of granular materials. The contributors have been chosen particularly for their ability to explain new concepts, making the book attractive to students or researchers contemplating a foray into the field. The breadth of the treatment on the other hand makes the book a useful reference for scientists who are already experienced in the subject.

River Flow 2006, Two Volume Set Rui M.L. Ferreira, Elsa C.T.L. Alves, Joao G.A.B. Leal, Antonio H. Cardoso, 2006-09-14 Rivers are complex entities. In addition to being valuable wildlife habitats, they support human activities by providing water for human usage, renewable energy and convenient transportation. Rivers may also pose threats to riverine communities in the form of floods and other natural or man-induced hazards. Contemporary societies recognize their re-

Anwar Maun,2009-03-05 A concise but comprehensive introduction to the biology of coastal sand dunes The emphasis in this book is on the organisms that dominate this predominantly marine environment although pollution conservation management and experimental aspects are considered Adapting to Drought Michael Mortimore,1989-03-30 This book embodies the results of thirteen years of research in drought prone rural areas in the semi arid zone of northern Nigeria It describes the patterns of adaptive behaviour observed among Hausa Ful be and Manga communities in response to recurrent drought in the 1970s and 1980s The question of desertification is explored in an area where the visible evidence of moving sand dunes is dramatic blame are examined in relation to the field evidence A critique is offered of deterministic theories and authoritarian solutions Professor Mortimore demonstrates a parallel between the observable resilience of semi arid ecosystems and the adaptive strategies of the human communities that inhabit them and suggests policy directions for strengthening that resilience **Bethany Beach** ,1998 Construction of Military Family Housing, Fort Story, Virginia Beach ,1975

Colby,1960 **The Physics of Blown Sand and Desert Dunes** Ralph Bagnold,2012-12-06 THE NATURE OF THE PROBLEM THIS book results from an attempt to explain on a basis of experimental physics some of the many strange phenomena produced by the natural movement of sand over the dry land of the Earth The subject is but one aspect of a far wider problem which is still very imperfectly grasped the transport of solid particles of any kind by fluids in general Here the difficulty has been and still is that no one branch of science has attempted to deal with the problem as a whole or to co ordinate the vast amount of piecemeal work by students of different outlook in many unrelated fields The carriage of silt by rivers has received a great deal of attention from engineers But owing to the difficulties of direct measurement to the expense and labour of conducting full scale experiments and to a failure to find agreement as to the basic quantities upon which a theoretical edifice may be built the published results are far from satisfactory Little has emerged except empirical formulae and these are rarely capable of reliable application to conditions other than those under which they were evolved The drifting of snow is of direct interest to transport authorities in many countries to meteorologists engaged in the study of rainfall to ski runners and to mountaineers Yet no means has been found whereby the precipitation can be gauged or the rate of drift related to the strength of the wind Hurricane and Storm Damage Reduction, Union Beach, New Jersey ,2003 *Broken Wings* Chris Norris,2014-10-02 As Namibia struggles to rebuild the country with the first elected government predators circle as they always do They use this time as an opportunity to set up business at all cost greed drives the day to day existence and ruthless business people use corrupt officials to further business ventures Marie Louw is a girl with broken wings after she is violently attacked by four predators She runs to her high school sweetheart he knows exactly how to handle this situation In Broken Wings author Chris Norris writes a fast paced story based on the life of Eben Basson his valued friend Lucas and the

love of his life Marie Louw The story is based on the experiences and dreams of two young lovers and how Africa shaped their lives Eben and Marie's lives are cemented by their friendship from a very young age and their dream to explore Africa with their friend Lucas They uncover a deadly ring in the underbelly of animal fighting and poaching and now they have to fight for their lives From police corruption to international greed this is a game where only the fittest will survive Tammy Blake the daughter of Mandy and Vince Blake a wealthy business man befriends Marie and Eben to uncover and expose this blood sport She finds herself in the middle of an explosive situation with deadly consequences This is Africa where life is cheap and most people take what they need at gunpoint a lesson Tammy will have to learn in order to survive The outcome is by no means certain for the happy couple that set out to discover Africa and rekindle their love for one another

Depositional Sedimentary Environments H.-E. Reineck, I.B. Singh, 2012-12-06 From the reviews This is an extremely useful reference text for the sedimentary geologist to own It is well produced with clear illustrations and text and gives excellent factual information on a large number of topics Palaeogeography Palaeoclimatology Palaeoecology represents a significant contribution to the literature of geoscience It should be in the library of anyone seriously interested in sedimentology Marine Geology This book is still unsurpassed in providing a good basic synthesis of modern sedimentary environments especially the physical attributes of the deposits being formed and the processes responsible Sedimentary Geology
