Farmer's Weekly, 1917 *Avian Cognition* Debra S. Herrmann, 2016-01-27 Unlike any other book *Avian Cognition* thoroughly examines avian intelligence behavior and individuality Preferences choices motivation and habits of species flocks and individual birds are discussed and compared This book investigates who birds are and why they do what they do Daily seasonal and play activities creativity reasoning a Glimpses of Paradise Penny Olsen, 2007 The history of the Paradise Parrot from its discovery in the 1800s to its extinction in the 1920s and how claims of sightings have continued to the present day **Wallace's Monthly** John Hankins Wallace, 1879 **Wallace's Monthly**, 1879 *Parrot Culture* Bruce Thomas Boehrer, 2015-11-02 After completing his conquest of the Persian empire Alexander the Great maneuvered his army across the Hindu Kush and into India During his two years there he traveled from dry frigid mountains to humid tropical lowlands and then back across one of the most punishing deserts on the planet He fought a series of desperate battles against strange foes mounted on war elephants suffering wounds that nearly killed him And when he eventually turned homeward he brought with him specimens of a rare magical species a bird that could speak with a human voice Introduced to Europe by Alexander parrots were quickly embraced by Western culture as exotic and astonishing full of marvelous powers and close to the gods Over the centuries they would become objects of veneration or figures of folly creatures prized for their wit or their place on the dinner table Ultimately they would become emblematic of the West's interaction with the world at large Identifying a deeply rooted obsession with these beautiful and loquacious birds Bruce Thomas Boehrer provides the first account of parrots and their impact on the Western world *Parrot Culture Our 2500 Year Long Fascination with the World's Most Talkative Bird* traces the unusual history of parrots from their introduction in the Graeco Roman world as items of oriental luxury through the great age of New World exploration to the contemporary ecological crisis of globalism Boehrer identifies the poignant irony in the way parrots became ubiquitous as symbols and mascots while suffering near extinction at the hands of those who desired them Exploring their presence and meanings in the art literature and history of Western civilization *Parrot Culture* also celebrates the beauty intelligence and personality of these birds whose fate will say as much about us and the world we have created as it will about them **Funny How?** Alex Clayton, 2020-05-01 What makes something funny This book shows how humor can be analyzed without killing the joke Alex Clayton argues that the brevity of a sketch or skit and its typical rejection of narrative development make it comedy concentrate providing a rich field for exploring how humor works Focusing on a dozen or so skits and scenes Clayton shows precisely how sketch comedy appeals to the funny bone and engages our philosophical imagination He suggests that since humor is about persuading an audience to laugh it can be understood as a form of rhetoric Through vivid highly readable analyses of individual sketches Clayton illustrates that Aristotle's three forms of appeal logos the appeal to reason ethos the appeal to communality and pathos the appeal to emotion can form the basis for illuminating the inner workings of humor Drawing on both popular and lesser known

examples from the United States United Kingdom and elsewhere Monty Python's Flying Circus Key and Peele Saturday Night Live Airplane and Smack the Pony Clayton reveals the techniques and resonances of humor

Animal Companions Ingrid H. Tague, 2015-06-17 Animal Companions explores how eighteenth century British society perceived pets and the ways in which conversation about them reflected and shaped broader cultural debates While Europeans kept pets long before the eighteenth century many believed that doing so was at best frivolous and at worst downright dangerous Ingrid Tague argues that for Britons of the eighteenth century pets offered

a unique way to articulate what it meant to be human and what society ought to look like With the dawn of the Enlightenment and the end of the Malthusian cycle of dearth and famine that marked previous eras England became the wealthiest nation in Europe with a new understanding of religion science and non European cultures and unprecedented access to consumer goods of all kinds These transformations generated excitement and anxiety that were reflected in debates over the rights and wrongs of human animal relationships Drawing on a broad array of sources including natural histories periodicals visual and material culture and the testimony of pet owners themselves *Animal Companions* shows how pets became both increasingly visible indicators of spreading prosperity and catalysts for debates about the morality of the radically different society emerging in eighteenth century Britain

Lost Land of the Dodo Anthony Cheke, Julian P. Hume, 2009-01-01 The Mascarene islands in the southern Indian Ocean Mauritius Reunion and Rodrigues were once home to an extraordinary range of birds and reptiles Evolving on these isolated volcanic islands in the absence of mammalian predators or competitors the land was dominated by giant tortoises parrots skinks and geckos burrowing boas flightless rails the birds and tortoises were slaughtered indiscriminately while introduced rats cats pigs and monkeys destroyed their eggs the once extensive forests logged and invasive introduced plants from all over the tropics devastated the ecosystem The now familiar icon of extinction the Dodo was gone from Mauritius within 50 years of human settlement and over the next 150 years many of the Mascarenes other native vertebrates followed suit The product of over 30 years research by Anthony Cheke *Lost Land of the Dodo* provides a comprehensive yet hugely enjoyable account of the story of the islands changing ecology interspersed with human stories the islands biogeographical anomalies and much else Many French publications old and new especially for Reunion are discussed and referenced in English for the first time The book is richly illustrated with maps and contemporary illustrations of the animals and their environment many of which have rarely been reprinted before Illustrated box texts look in detail at each extinct vertebrate species while Julian Hume's superb colour plates bring many of the extinct birds to life *Lost Land of the Dodo* provides the definitive account of this tragic yet remarkable fauna and is a must read for anyone interested in islands their ecology and the history of our relationship with the world around us
