**Linguistics** Dalila Ayoun,2008 Studies in French Applied Linguistics invites the reader to adopt a broad perspective on applied linguistics illustrating the fascinating multifaceted work researchers are conducted in so many various inter connected subfields The five chapters of the first part are dedicated to the first and second language acquisition of French in various settings First language acquisition by normal children from a generative perspective and by children with Specific Language Impairment second language acquisition in Canadian immersion settings from a neurolinguistic approach to phonology and natural language processing and CALL The six chapters of the second part explore the contribution of French in various subfields of applied linguistics such as an anthropological approach to literacy issues in Guadeloupean Kr y l literacy issues in new technologies phonological and lexical innovations in the banlieues French in North Africa language planning and policy in Quebec as well as the emerging field of forensic linguistics from an historical perspective

**Theoretical and Experimental Aspects of Syntax-Discourse Interface in Heritage Grammars** Tania

Ivanova-Sullivan,2015-01-27 In Theoretical and Experimental Aspects of Syntax Discourse Interface in Heritage Grammars Tanya Ivanova Sullivan investigates comprehension and production of anaphoric dependencies with null and overt subject pronouns She discusses the divergent behaviour of the heritage speakers of Russian by providing a closer look at their proficiency level quantity of input and order of language acquisition She explains the results with various degrees of successful application of pragmatic principles and efficiency in allocating cognitive resources The contribution of the monograph lies in the discussion of theoretical and experimental issues related to anaphora resolution along with an investigation of all aspects of representation and processing of anaphoric pronouns by various kinds of bilinguals heritage speakers L2 learners and L1 attriters      **ERIC Information Analysis Products, 1975-1977** Educational Resources

Information Center (U.S.),1978      **The Handbook of Second Language Acquisition** Catherine J. Doughty,Michael H. Long,2008-04-15 The Handbook of Second Language Acquisition presents an integrated discussion of key and sometimes controversial issues in second language acquisition research Discusses the biological and cognitive underpinnings of SLA mechanisms processes and constraints on SLA the level of ultimate attainment research methods and the status of SLA as a cognitive science Includes contributions from twenty seven of the world s leading scholars Provides an invaluable resource for all students and scholars of human cognition including those in linguistics psychology applied linguistics ESL foreign languages and cognitive science      *Bibliographie internationale sur le bilinguisme* William Francis Mackey,Université Laval. Centre international de recherches sur le bilinguisme,1982      **The New Immigration** CAROLA SUAREZ-OROZCO,Marcelo Suarez-Orozco,Desiree Baolian Qin-Hilliard,2012-11-12 At the turn of the millennium the United States has the largest number of immigrants in its history As a consequence immigration has emerged once again as a subject of scholarly inquiry

and policy debate This volume brings together the dominant conceptual and theoretical work on the New Immigration from such disparate disciplines as anthropology demography psychology and sociology Immigration today is a global and transnational phenomenon that affects every region of the world with unprecedented force Although this volume is devoted to scholarly work on the new immigration in the U S setting any of the broader conceptual issues covered here also apply to other post industrial countries such as France Germany and Japan

**Second Language Acquisition and Linguistic Variation** Robert Bayley, Dennis Richard Preston, 1996-01-01 This volume corrects the relative neglect in Second Language Acquisition studies of the quantitative study of language variation and provides insights into such issues as language transfer acquisition through exposure language universals learner s age and so forth These studies bolster the idea that a full account of SLA development and hence a theory of SLA must be built on not only detailed accounts of interlanguage data but also on a wide appeal to factors which govern the psycholinguistic bases of SLA An important addition to the volume is a comprehensive guide to both the DOS and Macintosh versions of the VARBRUL statistical program used by variationists

**The Sociolinguistics of Grammar** Tor A. Áfarli, Brit Maehlum, 2014-04-16 The aim of this book is to investigate and attain new insights on how and to what extent the wider sociolinguistic context of language use and contact impinges on formal grammatical structures The papers contained in the book approach this important problem from various points of view by focusing on language evolution and change on multilingualism language mixing and dialect variation on spoken language and on creole languages Given the theoretical perspectives methodological focus and analyses the book will be of interest to theoretical linguists as well as sociolinguists from undergraduate students to researchers

**Interfaces Between Second Language Acquisition and Language Testing Research** Lyle F. Bachman, Andrew D. Cohen, 1998 Second language acquisition SLA and language testing LT research have largely been viewed as distinct areas of inquiry in applied linguistics This book provides a fresh look at areas of common interest to both SLA and LT research and ways in which research in these two areas of applied linguistics can be fruitfully integrated

**Research in Education**, 1970-05

**The Routledge Handbook of Second Language Acquisition, Morphosyntax, and Semantics** Tania Ionin, Silvina Montrul, Roumyana Slabakova, 2024-03-11 This handbook provides innovative and comprehensive coverage of research on the second language acquisition SLA of morphosyntax semantics and the interface between the two Organized by grammatical topic the chapters are written by experts from formal and functional perspectives in the SLA of morphosyntax and semantics providing in depth yet accessible coverage of these areas All chapters highlight the theoretical underpinnings of much work in SLA and their links to theoretical syntax and semantics making comparisons to other populations including child language acquirers bilinguals and heritage speakers links to first language acquisition and bilingualism dedicating a portion of each chapter to the research methods used to investigate the linguistic phenomenon in question links to psycholinguistics and experimental linguistics and where relevant including intervention studies on the phenomenon in question links to applied

linguistics The volume will be indispensable to SLA researchers and students who work on any aspect of the SLA of morphosyntax or semantics With its coverage of a variety of methodologies and comparisons to other populations such as child language acquirers early bilinguals heritage speakers and monolingual adults the handbook is expected to also be of much interest to linguists who work in psycholinguistics first language acquisition and bilingualism *Cahiers Linguistiques D'Ottawa* ,2005

**The Grammar of Multilingualism** Artemis Alexiadou, Terje Lohndal, 2016-10-31 This volume investigates the nature of grammatical representations in speakers who master multiple languages Since the early days of modern formal approaches to grammar most work has been based on the language of monolingual humans Less work has been conducted based on data from speakers who possess more than one language Although important insights have been gained from a monolingual focus there is every reason to believe that bi and multilingual data can inform linguistic theory A lot of ongoing work demonstrates that this is indeed the case and the current volume contributes to this growing literature Thus the research topic addresses a number of questions relating to grammatical structures in multilingual speakers as well as the methodological issues that arise in the context of studying such speakers A better understanding of the grammatical sides of multilingualism is crucial for understanding the human language capacity and in turn for offering better advice to the public concerning issues of language choice for multilingual children and adults education and language deficits in multilingual individuals

**Handbook of Educational Psychology** David C. Berliner, Robert C. Calfee, 2013-02-01 Sponsored by Division 15 of APA the second edition of this groundbreaking book has been expanded to 41 chapters that provide unparalleled coverage of this far ranging field Internationally recognized scholars contribute up to date reviews and critical syntheses of the following areas foundations and the future of educational psychology learners development individual differences cognition motivation content area teaching socio cultural perspectives on teaching and learning teachers and teaching instructional design teacher assessment and modern perspectives on research methodologies data and data analysis New chapters cover topics such as adult development self regulation changes in knowledge and beliefs and writing Expanded treatment has been given to cognition motivation and new methodologies for gathering and analyzing data The Handbook of Educational Psychology Second Edition provides an indispensable reference volume for scholars teacher educators in service practitioners policy makers and the academic libraries serving these audiences It is also appropriate for graduate level courses devoted to the study of educational psychology

**Resources in Education** ,1995 Lexical Tone Perception in Infants and Young Children: Empirical studies and theoretical perspectives Leher Singh, Denis Burnham, Jessica Hay, Liqun Liu, Karen Mattock, 2019-11-20 In psycholinguistic research there has traditionally been a strong emphasis on understanding how particular language types are processed and learned In particular Romance and Germanic languages e g English French German have until recently received more attention than other types such as Chinese languages This has led to selective emphasis on the phonological building blocks of European languages consonants and vowels to the exclusion

of lexical tones which like consonants and vowels determine lexical meaning but unlike consonants and vowels are based on pitch variations Lexical tone is pervasive it is used in at least half of the world languages Maddieson 2013 e g most Asian and some African Central American and European languages This Research Topic brings together a collection of recent empirical research on the processing and representation of lexical tones across the lifespan with an emphasis on advancing knowledge on how tone systems are acquired The articles focus on various aspects of tone early perception of tones influences of tone on word learning the acquisition of new tone systems and production of tones One set of articles report on tone perception at the earliest stage of development in infants learning either tone or non tone languages Tsao and Chen et al demonstrate that infants sensitivity to Mandarin lexical tones as well as pitch improves over the first year of life in native and non native learners in contrast to traditional accounts of perceptual narrowing for consonants and vowels G tz et al report a different pattern of perception for Cantonese tones and further demonstrate influences of methodological approaches on infants tone sensitivity Fan et al demonstrate that sensitivity to less well studied properties of tone languages such as neutral tone may develop after the first year of life Cheng and Lee ask a similar question in an electrophysiological study and report effects of stimulus salience on infants neural response to native tones In a complementary set of studies focused on tone sensitivity in word learning Burnham et al demonstrate that infants bind tones to newly learned words if they are learning a tone language either monolingually or bilingually although it was also found that object word binding was influenced by the properties of individual tones Liu and Kager chart a developmental trajectory over the second year of life in which infants narrow in their interpretation of non native tones Choi et al investigate how learning a tone language can influence uptake of other suprasegmental properties of language such as stress and demonstrate that native tone sensitivity in children can facilitate stress sensitivity when learning a stress based language Finally two studies focus on sensitivity to pitch in a sub class tone languages pitch accent languages In a study on Japanese children s abilities to recognise words they know Ota et al demonstrate a limited sensitivity to native pitch contrasts in toddlers In contrast Ramachers et al demonstrate comparatively strong sensitivity to pitch in native and non native speakers of a different pitch accent system Limburghian when learning new words Several studies focus on learning new tone systems In a training study with school aged children Kasisopa et al demonstrate that tone language experience increases children s abilities to learn new tone contrasts Poltrock et al demonstrate similar advantages of tone experience in learning new tone systems in adults And in an electrophysiological study Liu et al demonstrate order effects in adults neural responses to new tones discussing implications for learning tone languages as an adult Finally Hannah et al demonstrate that extralinguistic cues such as facial expression can support adults learning of new tone systems In three studies investigating tone production Rattansone et al report the results of a study demonstrating kindergartners asynchronous mastery of tones delayed acquisition of tone sandhi forms relative to base forms In a study interrogating a corpus of adult tone production Han et al demonstrate that mothers produce tones in a distinct

manner when speaking to infants tone differences are emphasised more when speaking to infants than to adults Combining perception and production of tones Wong et al report asynchronous development of tone perception and tone production in children The Research Topic also includes a series of Opinion pieces and Commentaries addressing the broader relevance of tone and pitch to the study of language acquisition Curtin and Werker discuss ways in which tone can be integrated into their model of infant language development PRIMIR Best discusses the phonological status of lexical tones and considers how recent empirical research on tone perception bears on this question Kager focuses on how language learners distinguish lexical tones from other sources of pitch variation e g affective and pragmatic that also inform language comprehension Finally Antoniou and Chin unite evidence of tone sensitivity from children and adults and discuss how these areas of research can be mutually informative Psycholinguistic studies of lexical tone acquisition have burgeoned over the past 13 years This collection of empirical studies and opinion pieces provides a state of the art panoply of the psycholinguistic study of lexical tones and demonstrate its coming of age The articles in this Research Topic will help address the hitherto Eurocentric non tone language research emphasis and will contribute to an expanding narrative of speech perception speech production and language acquisition that includes all of the world s languages Importantly these studies underline the scientific promise of drawing from tone languages in psycholinguistic research the research questions raised by lexical tone are unique and distinct from those typically applied to more widely studied languages and populations The comprehensive study of language acquisition can only benefit from this expanded focus

Cross-linguistic Aspects of Processability Theory Manfred Pienemann, 2005-01-01 Seven years ago Manfred Pienemann proposed a novel psycholinguistic theory of language development Processability Theory PT This volume examines the typological plausibility of PT Focusing on the acquisition of Arabic Chinese and Japanese the authors demonstrate the capacity of PT to make detailed and verifiable predictions about the developmental schedule for each language This cross linguistic perspective is also applied to the study of L1 transfer by comparing the impact of processability and typological proximity The typological perspective is extended by including a comparison of different types of language acquisition The architecture of PT is expanded by the addition of a second set of principles that contributes to the formal modeling of levels of processability namely the mapping of argument structure onto functional structure in lexical mapping theory This step yields the inclusion of a range of additional phenomena in the processability hierarchy thus widening the scope of PT
