The Second-Person Standpoint Stephen Darwall, 2009-09-30 Why should we avoid doing moral wrong The inability of philosophy to answer this question in a compelling manner along with the moral skepticism and ethical confusion that ensue result Stephen Darwall argues from our failure to appreciate the essentially interpersonal character of moral obligation After showing how attempts to vindicate morality have tended to change the subject falling back on nonmoral values or practical first person considerations Darwall elaborates the interpersonal nature of moral obligations their inherent link to our responsibilities to one another as members of the moral community As Darwall defines it the concept of moral obligation has an irreducibly second person aspect it presupposes our authority to make claims and demands on one another And so too do many other central notions including those of rights the dignity of and respect for persons and the very concept of person itself The result is nothing less than a fundamental reorientation of moral theory that enables it at last to account for morality s supreme authority an account that Darwall carries from the realm of theory to the practical world of second person attitudes emotions and actions

The Second Person Naomi Eilan, 2017-09-13 The past few years have witnessed an

exponentially growing body of work conducted under the second person heading This idea has been explored in various areas of philosophy philosophy of mind philosophy of language ethics epistemology in developmental psychology in psychiatry and even in neuroscience We may call this interest in the second person the You Turn To put it at its most general and ambitious the idea driving much of the work is this proper attention to the ways in which we relate to one another when we stand in second person relation to each other can deliver something like a paradigm shift in the way in which we address questions about a range of fundamental issues in these fields There is however very little agreement about what second person relations are and a huge variation in why people think they are important The contributions to this book focus on developing key second person claims in the philosophy of mind ethics and epistemology with the aim of beginning to provide a framework for assessing and relating the multitude of fascinating new questions that come up under the second person heading This book was originally published as a special issue of Philosophical Explorations

The Second-Person Perspective in Aquinas's Ethics Andrew Pinsent, 2013-10-18 Thomas Aquinas devoted a substantial proportion of his greatest works to the virtues Yet despite the availability of these texts and centuries of commentary Aquinas's virtue ethics remains mysterious leaving readers with many unanswered questions In this book Pinsent argues that the key to understanding Aquinas's approach is to be found in an association between attributes he appends to the virtues and interpersonal capacities investigated by the science of social cognition especially in the context of autistic spectrum disorder The book uses this research to argue that Aquinas's approach to the virtues is radically non-Aristotelian and founded on the concept of second person relatedness To demonstrate the explanatory power of this principle Pinsent shows how the second person perspective gives interpretation to Aquinas's descriptions of the virtues and offers a key to long standing problems such as the reconciliation of magnanimity and humility The principle of second person relatedness also interprets acts that Aquinas describes as the fruition of the virtues Pinsent concludes by considering how this approach may shape future developments in virtue ethics

Debating Rationality Jennifer J. Halpern, Robert N. Stern, 1997 Debating Rationality is a terrific collection of essays written by an obviously first rate set of scholars Several recent books have attempted to make similar points but this volume pushes the ideas in new directions rather than simply restating what are now established themes Roderick M. Kramer co-author of Trust in Organizations Decision makers strive to be rational Traditionally rational decisions maximize an appropriate return The contributors to this book challenge the common assumption that good decisions must be rational in this economic sense They emphasize that the decision making process is influenced by social organizational and psychological considerations as well as by economic concerns Relationships time pressure external demands for specific

types of performance contractual expectations human biases and reactions to unfair treatment alter the decision making context and the resulting decision outcomes American Quarterly Church Review, and Ecclesiastical Register ,1849

Understanding and Measuring Morphological Complexity Matthew Baerman, Dunstan Brown, Greville G. Corbett, 2015-03-26 This book aims to assess the nature of morphological complexity and the properties that distinguish it from the complexity manifested in other components of language Of the many ways languages have of being complex perhaps none is as daunting as what can be achieved by inflectional morphology this volume examines languages such as Archi which has a 1 000 000 form verb paradigm and Chinantec which has over 100 inflection classes Alongside this complexity inflection is notable for its variety across languages one can take two unrelated languages and discover that they share similar syntax or phonology but one would be hard pressed to find two unrelated languages with the

same inflectional systems In this volume senior scholars and junior researchers highlight novel perspectives on conceptualizing morphological complexity and offer concrete means for measuring quantifying and analysing it Examples are drawn from a wide range of languages including those of North America New Guinea Australia and Asia alongside a number of European languages The book will be a valuable resource for all those studying complexity phenomena in morphology and for theoretical linguists more generally from graduate level upwards
