and comprehensive tables included in this volume visually highlight key concepts of current avian practice standards. Sections on pediatrics, falconry, toucans and hornbills feature specific topics which are less comprehensively included in most references. Focused sections on the respiratory system, the beak and skull, feathers and feet offer detailed information on these particular anatomical regions. Pharmacologic intervention and options are explored in depth to allow for clinicians to gain an optimal understanding of how to best develop treatment plans for their patients. NEW! An eBook version is included with print purchase. The eBook allows you to access all of the text, figures and references with the ability to search, customize your content, make notes and highlights and have content read aloud. Current Therapy format provides up to date information about patient management of specific disorders including innovations in therapy and the pros and cons of proposed treatments. Coverage of a wide variety of bird species includes psittacines, pigeons, raptors, ratites, waterfowl, gallinaceous birds and less common species. More than 800 full color images depict avian disease conditions, show management strategies and thought processes and aid in formulating guidelines to care. Summary tables simplify the lookup of key facts and treatment guidelines. Appendices provide quick access to a current drug formulary, normal biological data, clinical pathologic reference ranges and growth and feeding charts of neonatal birds.
