Cinefantastique ,1995 *Popular Photography* ,1994-02 **ReAction!** Mark A. Griep, Marjorie L. Mikasen, 2009-08-12 ReAction gives a scientist s and artist s response to the dark and bright sides of chemistry found in 140 films most of them contemporary Hollywood feature films but also a few documentaries shorts silents and international films Even though there are some examples of screen chemistry between the actors and of behind the scenes special effects this book is really about the chemistry when it is part of the narrative It is about the dualities of Dr Jekyll vs inventor chemists the invisible man vs forensic chemists chemical weapons vs classroom chemistry chemical companies that knowingly pollute the environment vs altruistic research chemists trying to make the world a better place to live and finally about people who choose to experiment with mind altering drugs vs the drug discovery process Little did Jekyll know when he brought the Hyde formula to his lips that his personality split would provide the central metaphor that would come to describe chemistry in the movies This book explores the two movie faces of this supposedly neutral science Watching films with chemical eyes Dr Jekyll is recast as a chemist engaged in psychopharmaceutical research but who becomes addicted to his own formula He is balanced by the often wacky inventor chemists who make their discoveries by trial and error Fun and Laughter on Our Summer Holiday Eileen Edwards, 2011-11-30 Fun And Laughter On A Summer Holiday continues to show Eileen s amazing observation and her keenness to learn as much as possible about each place she is to visit Reading about each day is a joy One day you will be crying with the emotion expressed but then this will soon be followed with laughter You will be laughing out loud with Eileen s unique sense of humor **Cinema as Weather** Kristi McKim, 2013-03-05 How do cinematic portrayals of the weather reflect and affect our experience of the world While weatherly predictability and surprise can impact our daily experience the history of cinema attests to the stylistic and narrative significance of snow rain wind sunshine clouds and skies Through analysis of films ranging from The Wizard of Oz to The Umbrellas of Cherbourg from Citizen Kane to In the Mood for Love Kristi McKim calls our attention to the ways that we read our atmospheres both within and beyond the movies Building upon meteorological definitions of weather s dynamism and volatility this book shows how film weather can reveal character interiority accelerate plot development inspire stylistic innovation comprise a momentary attraction convey the passage of time and idealize the world at its greatest meaning making capacity unlike our weather film weather always happens on time whether for tumultuous romantic violent suspenseful or melodramatic ends Akin to cinema s structuring of ephemera

cinematic weather suggests aesthetic control over what is fleeting contingent wildly environmental and beyond human capacity to tame This first book length study of such a meteorological and cinematic affinity casts film weather as a means of artfully and mechanically conquering contingency through contingency of taming weather through a medium itself ephemeral and enduring Using film theory history formalist phenomenological analysis and eco criticism this book casts cinema as weather insofar as our skies and screens become readable through our interpretation of changing phenomena
