efficiency in such systems are linked to these capacities This implies that when they are present it is because they are essential to the desired performance improvement Moreover since the goal is not to imitate human behavior some of these structural characteristics are different from those displayed by the neurons of the human brain suggesting that we are at the threshold of a new scientific field artificial cognition which formalizes methods for giving cognitive capabilities to artificial entities through the full use of the computational power of machines

Games of No Chance Richard J. Nowakowski, 1998-11-13 Is Nine Men Morris in the hands of perfect players a win for white or for black or a draw Can king rook and knight always defeat king and two knights in chess What can Go players learn from economists What are nimbers tinies switches and minies This book deals with combinatorial games that is games not involving chance or hidden information Their study is at once old and young though some games such as chess have been analyzed for centuries the first full analysis of a nontrivial combinatorial game Nim only appeared in 1902 The first part of this book will be accessible to anyone regardless of background it contains introductory expositions reports of unusual tournaments and a fascinating article by John H Conway on the possibly everlasting contest between an angel and a devil For those who want to delve more deeply the book also contains combinatorial studies of chess and Go reports on computer advances such as the solution of Nine Men Morris and Pentominoes and theoretical approaches to such problems as games with many players If you have read and enjoyed Martin Gardner or if you like to learn and analyze new games this book is for you

Tony Miles: It's Only Me Mike Fox, 2014-11-12 The charismatic Tony Miles has been much missed since his tragic and premature death in 2001 Regarded as one of England s greatest ever chess players and analysts he was also one of the wittiest writers on the game By sheer force of example and ebullient peronality he inspired the English chess explosion after becoming the first UK grandmaster in the mid 70s This Fascinating collection of over a hundred games and articles covering

Tony's entire chess career includes his most celebrated wins a few losses and in addition to the famous game against Karpov with the bizarre St George's opening 1 e4 a6 a less well known victory over the then world champion from a television tournament All the games are annotated by Tony himself in his own inimitable style This fitting tribute is rounded off with a review of Tony's original opening repertoire as well as personal appreciations by his Birmingham clubmates and friends Mike Fox Malcolm Hunt and Geoff Lawton

Man vs. Machine Karsten Müller, Jonathan Schaeffer, 2018-10-30

Man vs Machine Technology continues to advance at a rapid pace It may sound quaint today but not so long ago computers battled humans for supremacy at the game of chess The challenge of building a computer program capable of defeating the best of human kind at chess was one of the original grand challenges of the fledgling field of artificial intelligence On one side were dedicated scientists and hobbyists who invested decades of effort developing the software and hardware technology on the other side were incredibly talented humans with only their determination and preparation to withstand the onslaught of technology The man versus machine battle in chess is a landmark in the history of technology There are numerous books that document the technical aspects of this epic story The human side is not often told Few chess players are inclined to write about their man machine encounters other than annotating the games played This book brings the two sides together It tells the stories of many of the key scientists and chess players that participated in a 50 year research project to advance the understanding of computing technology Grandmaster Karsten Müller and Professor Jonathan Schaeffer have managed to describe the fascinating history of the unequal fight of man against machine in an entertaining and instructive way It evoked pleasant and not so pleasant memories of my own fights against the monsters I hope that their work gives you as much pleasure as it has given me
