Forest Prairie Edge Merle Massie, 2014-04-26 Saskatchewan is the anchor and epitome of the prairie provinces even though half of the province is covered by boreal forest The Canadian penchant for dividing this vast country into easily understood regions has reduced the Saskatchewan identity to its southern prairie denominator and has distorted cultural and historical interpretations to favour the prairie south **Forest Prairie Edge** is a deep time investigation of the edge land or ecotone between the open prairies and boreal forest region of Saskatchewan Ecotones are transitions from one landscape to another where social economic and cultural practices of different landscapes are blended Using place history and edge theory Massie considers the role and importance of the edge ecotone in building a diverse social and economic past that contradicts traditional prairie narratives around settlement economic development and culture She offers a refreshing new perspective that overturns long held assumptions of the prairies and the Canadian west **Canadian Books in Print.**
