Metaphysical Aporia And Philosophical Heresy:

Metaphysical Aporia and Philosophical Heresy Stephen David Ross, 1989-01-01 From Descartes to the present there has been a call for a new beginning in philosophy Contemporary continental philosophy and American pragmatism continue to proclaim the end of one philosophic tradition and the beginning of another The basis for many of these developments is the repudiation of metaphysics The purpose of this book is to rethink the metaphysical traditions in terms of the continental and pragmatist critiques rejecting a single view The major works in the tradition are viewed as heretical Philosophy has recurrently acknowledged aporia moments in the movement of thought in which it finds itself faced with unconquerable obstacles resulting from conflicts in its understanding of its own intelligibility A chapter is devoted to each of the eight major philosophers and movements in the Western canonical tradition the pre Socratics Plato Aristotle Spinoza Leibniz empiricism Kant and Hegel The last three chapters are devoted to contemporary discussions of the end of metaphysics including the development of a local metaphysics that is able to express its own locality and aporia Aristotele's Metaphysics Roberto Radice, Richard Davies, 1997 The authors collaborated with 50 scholars from around the world to produce an exhaustive annotated bibliography on the central work of the Aristotelian corpus It brings together signed descriptions of more than 3200 books and articles as well as several thousand reviews and notes originally published in English Italian German French Spanish and Russian Descriptions are fully cross referenced to one another The first Italian edition Vita e Pensiero Milan 1996 has been thoroughly revised corrected and updated and is complemented by an index of the most important loci Aristotelici **Plotinus** Stephen R. L. Clark, 2016-05-04 A bold work that applies a new approach to the interpretation of the thought of the founder of Neoplatonism beautifully written Notre Dame Philosophical Reviews Plotinus the Roman philosopher c 204 270 CE who is widely regarded as the founder of Neoplatonism was also the creator of numerous myths images and metaphors They have influenced both secular philosophers and Christian and Muslim theologians but have frequently been dismissed by modern scholars as merely ornamental In this book distinguished philosopher Stephen R L Clark shows that they form a vital set of spiritual exercises by which individuals can achieve one of Plotinus's most important goals self transformation through contemplation Clark examines a variety of Plotinus's myths and metaphors within the cultural and philosophical context of his time asking probing questions about their contemplative effects What is it for example to think away the spatiality of material things What state of mind is Plotinus recommending when he speaks of love or drunkenness or nakedness What star like consciousness is intended when he declares that we were once stars or are stars eternally What does it mean to say that the soul goes around God And how are we supposed to bring the god in us back to the god in all Through these rich images and structures Clark casts Plotinus as a philosopher deeply concerned with philosophy as a way of life Highly enjoyable His book is the tool by which we learn to read Plotinus in a dynamic way that transforms our very selves Classical World *The Gift of Beauty* Stephen David Ross, 1996-01-01 Traces the history of the idea of art as an

ethical movement interpreting the good as nature's abundance giving rise to an ethics of inclusion expressed in art The Limits of Language Stephen David Ross,1994 What makes the author's approach unique is its concern with the ways in which we may understand language and its relation to the world and ourselves as a question of limits drawing upon contemporary continental and English language views of language philosophical and linguistic from American pragmatists such as Peirce and Dewey and from important contemporary sources such as feminist theory **Identity and Difference** Philip T. Grier,2012-02-01 Identity and difference or sameness and otherness are contrasting but interrelated terms that have played an explicit role in the development of Western philosophy at least since Plato wrote the Sophist As Plato pointed out then and Hegel reiterated more recently in his Science of Logic the proper comprehension of these terms and particularly of their interrelation plays a fundamental role in shaping our conception of philosophical reason itself The contributors in this book examine Hegel's treatment of these terms and the role they play in structuring his philosophical system as a whole and also in shaping his conception of dialectical reasoning The Gift of Touch Stephen David Ross,1998-08-27 Traces Western ideas of corporeal bodies from Plato to contemporary feminist and poststructuralist writings with the purpose of reexamining the good identified in Plato as that which gives authority to knowledge and truth **Thomas Kuhn** Steve Fuller,2000-06 The pilgrimage from Plato to NATO episodes in embushment The last time scientists struggled for the soul of science The politics of the scientific image in the age of Conant From Conant's education strategy to Kuhn's research strategy How Kuhn unwittingly saved social science from a radical future The world not well lost philosophy after Kuhn Kuhnification as ritualized political impotence the hidden history of science studies Locality and Practical Judgment Stephen David Ross,1994 The philosophical viewpoint Ross examines in Locality and Practical Judgment is related to the American naturalist and pragmatist traditions and to the views of many twentieth century European philosophers It bears affinities with historicism and existentialism insofar as both emphasize aspects of human finiteness What is new is the systematic development of locality in application to practical experience **Encountering the Other(s)** Gisela Brinker-Gabler,1995-03-09 Europe and the United States now confront many of the same unresolved issues of nationalist religious racial and ethnic intolerance The book addresses the question How can the humanistic disciplines and social sciences play a role in a political transformation or address cultural difference This difference the other may be a racial ethnic gendered religious or colonial Other Contributors to this book focus on the serious political questions posed by the problems of strangeness the other in the present climate of accelerating social change and global shifts in political power **The Ring of Representation** Stephen David Ross,1992-01-01 This book asks how we may undertake to represent representation **Subordinated Ethics** Caitlin Smith Gilson,2020-08-21 With Dostoyevsky's Idiot and Aquinas Dumb Ox as guides this book seeks to recover the elemental mystery of the natural law a law revealed only in wonder If ethics is to guide us along the way it must recover its subordination description must precede prescription If ethics is to invite us along the

way it cannot lead either as politburo or even as public orthodoxy It cannot be smugly symbolic but must be by way of signage of directionality of the open realization that ethical meaning is en route pointing the way because it is within the way as only sign not symbol can point to the sacramental terminus The courtesies of dogma and tradition are the road signs and guideposts along the longior via not themselves the termini We seek the dialogic heart of the natural law through two seemingly contradictory voices and approaches St Thomas Aquinas and his famous five ways and Fyodor Dostoyevsky's holy idiot Prince Myshkin It is precisely the apparent miscellany of these selected voices that provide us with a connatural invitation into the natural law as subordinated as descriptive guide not as prescriptive leader

City Images Mary Ann Caws, 2013-11-26 First Published in 1991 Knowing any real city and still more so knowing what it is to know a city may be as much about passive as about active experience What we read in the field that field of the city in all its bizarre mixture of culture and nature is bound to determine to some non fictional extent what we know of it what we imagine it could be what we fear it may be or become These essays are meant to be albeit in their critical mode the recountings of knowing something through something else they are the projected imagination through reading of the reading by the self and or others a wide range of each of a city or cities as such of what city knowing or city thinking is The city as stage market and labyrinth variously trafficked and aestheticized dreamt and politicized as passionately written by authors from Cicero to Kazin from Wordsworth Dickens Whitman and Woolf to Williams Ashbery and Bonnefoy is the place the essays play themselves out through architecture and metaphor

The Political Dialogue of Nature and Grace Caitlin Smith Gilson, 2017-03-23 The discourse between nature and grace finds its linguistic and existential podium in the political condition of human beings As Caitlin Smith Gilson shows it is in this arena that the perennial territorial struggle of faith and reason God and man man and state take place and it is here that the understanding of the personal as political as well as the political as personal finds its meaning And it is here too that the divine finds or is refused a home Any discussion of post secular society has its origins in this political dialogue between nature and grace the resolution of which might determine not only a future post secular society but one in which awe is re united to affection solidarity and fraternity Smith Gilson questions whether the idea of pure nature antecedently disregards the fact that grace enters existence and that this accomplishes a conversion in the metaphysical existential region of man's action and being This conversion alters how man acts as an affective moral intellectual social political and spiritual being State of nature theories transformed yet retained in the broader metaphysical and existential implications of the Hegelian Weltgeist are shown to be indebted to the ideological restrictedness of pure nature *natura pura* as providing the foremost adversary to any meaningful type of divine presence within the polis as well as inhibiting the phenomenological facticity of man as an open nature

Aporetics Nicholas Rescher, 2009-02-15 The word apory stems from the Greek *aporia* meaning impasse or perplexing difficulty In *Aporetics* Nicholas Rescher defines an apory as a group of individually plausible but collectively incompatible theses Rescher examines historic formulaic and systematic

apories and couples these with aporetic theory from other authors to form this original and comprehensive survey Citing thinkers from the pre Socratics through Spinoza Hegel and Nicolai Hartmann he builds a framework for coping with the complexities of divergent theses and shows in detail how aporetic analysis can be applied to a variety of fields including philosophy mathematics linguistics logic and intellectual history Rescher's in depth examination reveals how aporetic inconsistency can be managed through a plausibility analysis that breaks the chain of inconsistency at its weakest link by deploying right of way precedence based on considerations of cognitive centrality Thus while involvement with cognitive conflicts and inconsistencies are pervasive in human thought aporetic analysis can provide an effective means of damage control

Venturing Beyond - Law and Morality in Kabbalistic Mysticism Elliot R. Wolfson, 2006-05-25 Are mysticism and morality compatible or at odds with one another If mystical experience embraces a form of non dual consciousness then in such a state of mind the regulative dichotomy so basic to ethical discretion would seemingly be transcended and the very foundation for ethical decisions undermined Venturing Beyond Law and Morality in Kabbalistic Mysticism is an investigation of the relationship of the mystical and moral as it is expressed in the particular tradition of Jewish mysticism known as the Kabbalah The particular themes discussed include the denigration of the non Jew as the ontic other in kabbalistic anthropology and the eschatological crossing of that boundary anticipated in the institution of religious conversion the overcoming of the distinction between good and evil in the mystical experience of the underlying unity of all things divine suffering and the ideal of spiritual poverty as the foundation for transmoral ethics and hypernomian lawfulness

The Gift of Property Stephen David Ross, 2001-02-01 Explores the human propensity for owning and having

The Highroad Around Modernism Robert Cummings Neville, 1992-09-01 Discussions of modernism and postmodernism in philosophy and the arts are usually based on a narrow reading of the Western tradition and are not conscious of the narrowness The modern period beginning with the European Renaissance spawned many developments not just the modernist one in terms of which the tradition has been read From the standpoint of the highroad around modernism both modernism and post modernism look like nothing more than two late modern movements perhaps too preoccupied with themselves and their historical place to engage a swiftly changing world containing more than the Western tradition The Highroad Around Modernism develops and defends an explicitly non modernist and non postmodernist extension of modernity applicable to the problems of world wide cultural interactions

The Translator- Centered Multidisciplinary Construction Lin Zhu, 2012 This book embraces the epistemological and methodological issues of theoretical construction in the field of Translation Studies from a historical and global perspective The theoretical stances are explained in detail through a systemic inquiry into the constructive aspects of theoretical innovation of the American translation theorist Douglas Robinson In order to renew and promote theoretical thinking in the field of Translation Studies this book aims to reflect on existing theoretical problems in translation trace the translation theorist's innovative and constructive ways of thinking about translation theory and explore productive

philosophical and theoretical resources of translation studies This book will not only be helpful to a further and full understanding of Robinson's thoughts on translation but also offers a rethinking of how to advance Translation Studies epistemologically and methodologically

Leo Strauss and the Invasion of Iraq Aggie Hirst, 2013-06-26

The political philosophy of Leo Strauss has been the subject of significant scholarly and media attention in recent years particularly in the context of the decision to invade Iraq in 2003 Allegations that a group of Strauss inspired Neo conservatives intervened in the foreign policy establishment of the US in order to realise the policy of regime change began to emerge soon after the invasion and unanswered questions remain a decade later This book addresses these claims focusing specifically on a group of Straussians active in the spheres of intelligence production think tanks and the media during the period from the 9 11 attacks to the invasion in 2003 Such an examination is intended not simply to identify and expose their activities promoting the policy of regime change in Iraq during this period but also to challenge them and the Straussian logics underpinning them Utilising the thought of Jacques Derrida the book enacts a deconstructive challenge to Strauss political philosophy which unsettles the fundamental assumptions it relies upon In doing so it exposes the securitising imperative underpinning Straussian thought and the Straussian interventions It thereby simultaneously addresses crucial issues in political theory and contemporary foreign policy studies while asserting that these dimensions of international politics can and should be dealt with in conjunction with each other This book would be of interest to students and scholars of Global Politics Political Theory Security Studies and US Foreign Policy and those outside the academy interested in Neo conservatism and the 2003 invasion of Iraq
