Moving People, Goods and Information in the 21st Century Richard E. Hanley, 2003      **Moving People, Goods, and Information in the 21st Century** Richard Eugene Hanley, 2004      **Moving People, Goods and Information in the 21st Century** Richard E. Hanley, 2003      **Moving People, Goods and Information in the 21st Century** Richard Hanley, 2004-08-02 Globalisation and technological innovation have changed the way people goods and information move through and about cities To remain or become economically and environmentally sustainable cities and their regions must adapt to these changes by creating cutting edge infrastructures that integrate advanced technologies communications and multiple modes of transportation The book defines cutting edge infrastructures details their importance to cities and their regions and addresses the obstacles to creating those infrastructures      **Moving People, Goods, and Information in the 21st Century** New York Academy of Sciences, 2004 This book explores all the issues behind the creation of new infrastructures and examines the effects they will have on the shape of the cities in the twenty first century      **Personal Mobilities** Aharon Kellerman, 2006-11-22 Personal Mobilities provides a systematic study of personal movement focusing on the dimensions of space individuals societies and technologies Kellerman examines a variety of personal mobilities including air transportation through several perspectives examining the human need for movement their anchoring within wider societal trends commonalities and differences among mobility technologies and international differences Although spatial mobility seems geographical by its very nature the topic has been so far treated only partially and mainly by sociologists Personal Mobilities highlights geographical as well as sociological aspects and is the first book to focus solely on personal mobilities      **Mobile Technologies of the City** Mimi Sheller, John Urry, 2006-04-18 Mobile communications technologies are taking off across the world while urban transportation and surveillance systems are also being rebuilt and updated Emergent practices of physical informational and communicational mobility are reconfiguring patterns of movement co presence social exclusion and security across many urban contexts This book brings together a carefully selected group of innovative case studies of these mobile technologies of the city tracing the emergence of both new socio technical practices of the city and of a new theoretical paradigm for mobilities research      *Green Technologies: Concepts, Methodologies, Tools and Applications* Management Association, Information Resources, 2011-03-31 Green Technologies Concepts Methodologies Tools and Applications assembles the most up to date collection of research results and recent discoveries in environmental and green technology This comprehensive anthology covers a wide range of topics i      *Sustaining Urban Networks* Olivier Coutard, Richard Eugene Hanley, Rae Zimmerman, 2005 Considering sustainability in its economic environmental and social contexts the contributors take stock of previous research on large technical systems and discuss their sustainability from three main perspectives uses cities and rules and institutions      *The Enriched Field* Leonardo Ramondetti, 2022-04-19 Today s China is experiencing massive urban growth new towns are built extensive suburbanization processes occur in many

regions and agricultural spaces are radically altered by the construction of new rural settlements This publication considers these processes for the Central Plains of China the previously mostly agricultural region comprising the lower reaches of the Yellow River

**Developing Living Cities** Kallidaikurichi Seetharam,Belinda K. P. Yuen,2010 This is an important and timely book With half of humanity living in cities our future will depend on how well we manage our cities This book poses six inter generational challenges to cities If a city deals successfully with them it will become a living thriving prosperous and delightful place to live work and visit Prof Tommy Koh Chairman Governing Council Asia Pacific Water Forum

**City Competitiveness and Improving Urban Subsystems: Technologies and Applications** Bulu, Melih,2011-10-31 Cities are becoming the wealth producing centers of national economies Increasing the operational efficiency of the city will bring a competitive edge to the whole system Yet many city subsystems cannot work together creating significant problems and inefficiencies City Competitiveness and Improving Urban Subsystems Technologies and Applications uses information science perspectives to improve working subsystems in transportation sewage electricity water communication education health governance and infrastructure since their efficient and synchronized operation is vital for a competitive city This pioneering approach will interest researchers professionals and policymakers in urban economy regional planning and information science disciplines who wish to improve the competitiveness of their cities

**Consuming the Entrepreneurial City** Anne Cronin,Kevin Hetherington,2008-04-07 This collection offers a global perspective on the changing character of cities and the increasing importance that consumer culture plays in defining their symbolic economies Increasingly forms of spectacle have come to shape how cities are imagined and to influence their character and the practices through which we know them from advertising and the selling of real estate to youth cultural consumption practices and forms of entrepreneurship to the regeneration of urban areas under the guise of the heritage industry and the development of a WiFi landscape Using examples of cities such as New York Sydney Atlantic City Barcelona Rio de Janeiro Douala Liverpool San Juan Berlin and Harbin this book illustrates how image and practice have become entangled in the performance of the symbolic economy It also argues that it is not just how the urban present is being shaped in this way that is significant to the development of cities but also that a prominent feature of their development has been the spectacular imagining of the past as heritage and through regeneration Yet the ghosts that this conjures up in practice offer us a possible form of political unsettlement and alternative ways of viewing cities that is only just beginning to be explored Through this important collection by some of the leading analysts of consumption cities and space Consuming the Entrepreneurial City offers a cutting edge analysis of the ways in which cities are developing and the implications this has for their future It is essential reading for students of Urban Studies Geography Sociology Cultural Studies Heritage Studies and Anthropology

**The Connected City** Zachary P. Neal,2012-08-06 The Connected City explores how thinking about networks helps make sense of modern cities what they are how they work and where they are headed Cities and urban life can be examined as networks and these urban networks can

be examined at many different levels The book focuses on three levels of urban networks micro meso and macro These levels build upon one another and require distinctive analytical approaches that make it possible to consider different types of questions At one extreme micro urban networks focus on the networks that exist within cities like the social relationships among neighbors that generate a sense of community and belonging At the opposite extreme macro urban networks focus on networks between cities like the web of nonstop airline flights that make face to face business meetings possible This book contains three major sections organized by the level of analysis and scale of network Throughout these sections when a new methodological concept is introduced a separate method note provides a brief and accessible introduction to the practical issues of using networks in research What makes this book unique is that it synthesizes the insights and tools of the multiple scales of urban networks and integrates the theory and method of network analysis

Creating Smart Cities Claudio Coletta, Leighton Evans, Liam Heaphy, Rob Kitchin, 2018-10-26 In cities around the world digital technologies are utilized to manage city services and infrastructures to govern urban life to solve urban issues and to drive local and regional economies While smart city advocates are keen to promote the benefits of smart urbanism increased efficiency sustainability resilience competitiveness safety and security critics point to the negative effects such as the production of technocratic governance the corporatization of urban services technological lock ins privacy harms and vulnerability to cyberattack This book through a range of international case studies suggests social political and practical interventions that would enable more equitable and just smart cities reaping the benefits of smart city initiatives while minimizing some of their perils Included are case studies from Ireland the United States of America Colombia the Netherlands Singapore India and the United Kingdom These chapters discuss a range of issues including political economy citizenship standards testbedding urban regeneration ethics surveillance privacy and cybersecurity This book will be of interest to urban policymakers as well as researchers in Regional Studies and Urban Planning

The Digital Economy Edward J. Malecki, Bruno Moriset, 2007-12-07 Information technologies IT shape economic space but we have no clear map of the cyber economy since the digital revolution began in the early 1970s The Digital Economy offers an up to date critical synthesis that links the various aspects of the digital or cyber economy from the perspective of real firms A geographic approach emphasizes how IT has made businesses less dependent on locational constraints and the tangible effects on places and regions are placed at the core of the analysis Case studies of companies including Amazon Dell Li Fung and Volvo demonstrate that the geography of digitally driven production is the outcome of both dispersion and agglomeration dynamics Global corporations are shown to have footprints that ignore to some degree distance and time yet creative and coordinating activities remain anchored in urban innovative ecosystems such as Silicon Valley and Bangalore These trends have been made possible by the development of a worldwide and integrated telecommunications network whose unequal presence dictates the capabilities of places and communities to be connected to the global economy However the threat of the digital divide must not be overstated In cities rural areas and emerging

countries local development is wrapped up in human capital rather than technology This engaging and accessible text describes and explains the patterns and dynamics of today s digital economic space The effects on places and regions and the people in them are at the core of the authors analysis illustrated by many real examples This book will be useful to anyone studying business and management geography and information and communication studies     Decentralizing Governance G. Shabbir Cheema,Dennis A. Rondinelli,2007-08-01 The trend toward greater decentralization of governance activities now accepted as commonplace in the West has become a worldwide movement This international development largely a product of globalization and democratization is clearly one of the key factors reshaping economic political and social conditions throughout the world Rather than the top down centralized decisionmaking that characterized communist economies and Third World dictatorships in the twentieth century today s world demands flexibility adaptability and the autonomy to bring those qualities to bear In this thought provoking book the first in a new series on Innovations in Governance experts in government and public management trace the evolution and performance of decentralization concepts from the transfer of authority within government to the sharing of power authority and responsibilities among broader governance institutions This movement is not limited to national government it also affects subnational governments NGOs private corporations and even civil associations The contributors assess the emerging concepts of decentralization e g devolution empowerment capacity building and democratic governance They detail the factors driving the movement including political changes such as the fall of the Iron Curtain and the ascendance of democracy economic factors such as globalization and outsourcing and technological advances e g increased information technology and electronic commerce Their analysis covers many different contexts and regions For example William Ascher of Claremont McKenna College chronicles how decentralization concepts are playing out in natural resources policy while Kadmeil Wekwete United Nations outlines the specific challenges to decentralizing governance in sub Saharan Africa In each case contributors explore the objectives of a decentralizing strategy as well as the benefits and difficulties that will likely result     **Encyclopedia of Transportation** Mark Garrett,2014-08-13

Viewing transportation through the lens of current social economic and policy aspects this four volume reference work explores the topic of transportation across multiple disciplines within the social sciences and related areas including geography public policy business and economics The book s articles all written by experts in the field seek to answer such questions as What has been the legacy not just economically but politically and socially as well of President Eisenhower s modern interstate highway system in America With that system and the infrastructure that supports it now in a state of decline and decay what s the best path for the future at a time of enormous fiscal constraints Should California politicians plunge ahead with plans for a high speed rail that every expert says despite the allure will go largely unused and will never pay back the massive investment while at this very moment potholes go unfilled all across the state What path is best for emerging countries to keep pace with dramatic economic growth for their part What are the social and financial costs of

gridlock in our cities Features Approximately 675 signed articles authored by prominent scholars are arranged in A to Z fashion and conclude with Further Readings and cross references A Chronology helps readers put individual events into historical context a Reader's Guide organizes entries by broad topical or thematic areas a detailed index helps users quickly locate entries of most immediate interest and a Resource Guide provides a list of journals books and associations and their websites While articles were written to avoid jargon as much as possible a Glossary provides quick definitions of technical terms To ensure full well rounded coverage of the field the General Editor with expertise in urban planning public policy and the environment worked alongside a Consulting Editor with a background in Civil Engineering The index Reader's Guide and cross references combine for thorough search and browse capabilities in the electronic edition Available in both print and electronic formats Encyclopedia of Transportation is an ideal reference for libraries and those who want to explore the issues that surround transportation in the United States and around the world

*Mobilities: New Perspectives on Transport and Society* John Urry, 2016-04-22 Bringing together the leading authors currently working at the intersection of social science and transport science this volume provides a companion to the well established and extensive international Transport and Society series Each chapter and the volume as a whole offers closer and richer consideration of the issues practices and structures of multiple mobilities which shape the current world but which have typically been overlooked or minimised What this approach seeks to do is not only draw attention to many new areas of research and investigation relating to mobile lives but also to point to new theories and methods by which such lives have to be researched and examined Such new theories and methods are relevant both to rethinking transport studies as such but are also recasting societal studies as transport so that it comes out of the ghetto and enters mainstream social science

**Hub Cities in the Knowledge Economy** Ben Derudder, Frank Witlox, 2016-05-13 The overarching research topic addressed in this book is the complex and multifaceted interaction between infrastructural accessibility connectivity of city regions on the one hand and knowledge generation in these city regions on the other hand To this end the book brings together chapters analysing how infrastructural accessibility is related to changing patterns of business location of knowledge intensive industries in city regions The chapters in this book specifically dwell on recent manifestations of and developments in the accessibility knowledge nexus with a particular metageographical focus on how this materializes in major city regions In the different chapters this shifting relation is broached from different perspectives seaports airports brainports at different scales ranging from global scale analyses to case studies and by adopting a variety of methodologies straddling the wide variety of methodological approaches currently adopted in human geography research Researchers contributing to this edited volume come from different scholarly backgrounds sociology human geography regional planning which allows for a varied treatise of this research topic
