**Genius Loci** John Dixon Hunt, 2022-10-24 From literature to landscape architecture an expansive contemplative exploration of the significance of place For ancient Romans genius loci was literally the genius of the place the presiding divinity who inhabited a site and gave it meaning While we are less attuned to divinity today we still sense that a place has significance In this book eminent garden historian John Dixon Hunt explores genius loci in many settings including contemporary land art the paintings of Paul and John Nash travel writers such as Henry James Paul Theroux and Lawrence Durrell on Provence Mexico and Cyprus and landscape architects who invent new meanings for a site This book is a nuanced thoughtful exploration of how places become more significant to us through the myriad ways we see talk about and remember them

*Transitions: Concepts + Drawings + Buildings* Christine Hawley, 2017-03-02 Most architectural books written by practising architects fall into two categories theoretical texts or monographs that describe and illustrate the author's projects This book combines both as it explores and illustrates the methodological journey required to translate a concept to a drawing and a drawing to a building While the term methodological might imply an Aristotelian logic there is no attempt here to rationalise the process of conception but instead an acknowledgement of an experimental approach that presupposes a subtle knowledge of the projects It shows the architect's fascination with the opaque and the not said and illustrates how architecture works through agreement and contradiction e.g. the built and the un built material and immaterial Organised into three essays Urban Collage Ground Surface Shadows and Lines the book examines how conceptual threads begin to compose a specific architectural design language and how they interweave from one direction to another Importantly the projects that illustrate the text also demonstrate how imperative or marginal the original ideas become and to an extent they demonstrate the design process its successes illogicality and failures The essays also discuss the importance of iteration through time where ideas may occasionally be developed as a linear process but more often emerge through a series of creative digressions Although the essays and the projects have dominant themes these should not be regarded as autonomous as throughout the development of both drawings and buildings ideas inevitably segue from one domain to another Ideas have both fluidity and the ability to transform
