The Origins of Capitalism and the "Rise of the West" Eric Mielants, 2008-03-15 In this study Eric Mielants provides a novel interdisciplinary interpretation of the origins of modernity and capitalism in particular. He argues that contrary to popular thinking the Rise of the West should not be analyzed in terms of the Industrial Revolution or the colonization of the New World but viewed from long term developments that occurred in the Middle Ages. A fascinating overview of different civilizations in East Asia, South Asia and Northwestern Africa is provided and systematically compared and contrasted with Western Europe. This book addresses some of the major debates that have recently unfolded in world history, comparative sociology, political economy, sociological theory and historical sociology. Mielants indicates how many existing theories such as Marxism, World Systems Theory and Smithian Modernization Theory have suffered from either Eurocentric or limited temporal and spatial analyses which prevents them from a complete understanding of why the origins of capitalism and citizenship emerged in Western Europe.

Difference and Identity in Francia and Medieval France Meredith Cohen, Justine Firnhaber-Baker, 2016-12-05 Difference in medieval France was not solely a marker for social exclusion provoking feelings of disgust and disaffection but it could also create solidarity and sympathy among groups. Contributors to this volume address inclusion and exclusion from a variety of perspectives ranging from ethnic and linguistic difference in Charlemagne's court to lewd sculpture in Bern to prostitution and destitution in Paris. Arranged thematically, the sections progress from the discussion of tolerance and intolerance through the clearly defined notion of foreignness to the complex study of stranger identity in the medieval period. As a whole, the volume presents a fresh intriguing perspective on questions of exclusion and belonging in the medieval world.

Santé et société à Montpellier à la fin du Moyen Âge Geneviève Dumas, 2014-11-27 This book examines the social institutional and cultural setting of medical practices in the medieval town of Montpellier which boasted one of the first universities of the middle ages and a famous school of medicine. Some of its most celebrated masters and their medical works have been thoroughly studied but few of them try to put these in context with a thriving urban community of merchants and craftsmen that were at the core of the city council. Their concurrent efforts will endow Montpellier of a rich health care system featuring not only the university masters but also the city's barber surgeons and apothecaries. Their collective fate is revealed here in an integrated picture of health and society in the middle ages.

The Medieval Drama Sandro Sticca, 1972-06-30 The religious medieval drama like the Church which produced it was international. As such from its earliest beginnings in the tenth century *Quem quaeritis* to the thirteenth century *Ludi Paschales* and *Passion Plays* it exhibits a cultural and thematic unity binding the various plays. A thematic unity from the fabric of Christian thought and a cultural unity from the fact that these productions at least up to the end of the thirteenth century generally share a technical philological medium the Latin language. In later centuries this religious drama expressed in the vernacular remained an act of faith its purpose being to strengthen the faith of the worshippers and to express in visible dramatic terms the facts and values of Christian belief. These essays were in their original form addressed to the third annual conference of the Center for Medieval and Early Renaissance Studies at the State University of New York at Binghamton. The work of international authorities on the medieval drama they span many centuries and bear witness to the growth of the religious dramatic form and of the dramatic movement and temper of the liturgy in which that form finds its origin. Omer Jodogne establishes a difference on the aesthetic level between dramatic works and their theatrical performance by pointing out that the surviving texts whether they were meant for reading or for a theatrical performance reproduce only what was said on the stage and succinctly what was done. Wolfgang Michael suggests that the first medieval drama did not originate in a slow growth from the Easter trope *Quem quaeritis* but was rather an original creation of the author or authors of the *Concordia Regularis*. He indicates that subsequent dramatic endeavors in their slow process of change and expansion reflect the working of tradition rather than an original spirit and form. Sandro Sticca examines the creation of the first *Passion Play* and shows that Christ's passion became increasingly popular in the tenth century and that the new forces which allowed a more eloquent and humane visualization and description of Christ's anguish first appeared in the eleventh and twelfth centuries. He also refutes the traditional view that the *Planctus Mariae* is the germinal point of the Latin *Passion Play*. V. A. Kolve seeks to account for certain central facts about *Everyman* which have never had close critical attention. He analyzes the Biblical and Patristic references within which the story is shaped and which are central to the understanding of other actions and to determining the meaning of the play. Glynn Wickham after exploding on the evidence of reference alone the old categorizing of English Saint Plays as by products or late developments of Mysteries and Moralities turns to a critical discussion of the three surviving texts of English Saint Plays and of their original staging by means of diagrammatic illustrations providing a vivid visualization of their performance. William

Smolden takes an unaccustomed approach to the controversial question of the origins of the *Quem quaeritis*. He maintains that when musical evidence is called on it brings about on a number of occasions a confutation of the theory of a textual writer. From a detailed consideration of the two earliest *Quem quaeritis* he feels convinced that the place of origin of the trope was the Abbey of St Martial of Limoges. Multiculturalism and Representation John Rieder, Larry E.

Smith, 1996-01-01 *Women Medievalists and the Academy, Volume 2* Jane Chance, 2018-05-22 Long overlooked in standard reference works pioneering women medievalists finally receive their due in *Women Medievalists and the Academy*. This comprehensive edited volume brings to life a diverse collection of inspiring figures through memoirs, biographical essays and interviews. Covering many different nationalities and academic disciplines including literature, philology, history, archaeology, art history, theology or religious studies and philosophy, each essay delves into one woman's life, intellectual contributions and efforts to succeed in a male dominated field. Together these extraordinary personal histories constitute a new standard reference that speaks to a growing interest in women's roles in the development of scholarship and the academy. The collection begins in the eighteenth century with Elizabeth Elstob and continues to the present and includes among more than seventy profiles such important figures as Anna Jameson, Lina Eckenstein, Georgiana Goddard King, Eileen Power, Dorothy L. Sayers, Dorothy Whitelock, Susan Mosher Stuard, Marcia Colish and Caroline Walker Bynum among others. **Villard's**

Legacy Marie-Thérèse Zenner, 2017-05-15 Villard's Legacy is in memory of the celebrated iconoclastic historian Jean Gimpel and represents a fundamental contribution to the new AVISTA series with Ashgate Publishing. AVISTA was the brainchild of Gimpel, a genius at making the right people meet to advance knowledge through a confluence of ideas drawn equally from the practical and scholarly domains. Sixteen papers and a tribute to Gimpel underscore this confluence of technology, science and art within medieval culture. Appropriately, six papers offer new interpretations on aspects of Villard de Honnecourt's portfolio which Gimpel rightly recognized and promoted as a unique and precious record of pre-modern technology and culture. This thirteenth-century manuscript is now known to a wider public as the earliest testimony left by a master builder in Gothic Europe. Of particular significance for the first time in eight centuries, a *Compagnon du Devoir* initiated in the same oral tradition as Villard opens the door to interpreting these remarkable drawings. Three papers address previously ignored aspects in the construction of French and English Gothic churches: from the engineering of aerodynamic spires to the elastic materials of vault webbing to the social conventions of formal design. Three other contributors treat essential elements of a broader technological culture such as the horse harness and the minting of coins as well as the applicability of medieval technology to the modern world in particular third-world countries, a project pioneered by Gimpel. Four papers conclude the volume by treating the sciences of measure and their cultural expression in medieval Europe, embracing both the concepts of space and time, geometry as a mathematical discipline and the graphic expression of scientific data. These interdisciplinary studies are comprehensive in chronological and geographic range, extending from the 8th to 15th centuries from Ireland
