Divided School Peter Woods, 2012-05-16 In this ethnographic study of a secondary school in the UK the author presents an incisive account of school life from the various points of view of the pupils teachers and parents He describes and analyses major areas of experience and methods of adapting to school for both the children and their teachers school experience is shown to be widely varying from boredom despair and humiliation to gaiety exultation and comradeship some of it officially and some of it unofficially sponsored The description reveals a number of marked and interpenetrating divisions within schools between teachers and pupils parents and teachers parents and children and between pupils themselves These divisions are explored analysed and related both to institutional factors and to factors outside the school The study suggests how these factors influence pupil and teacher strategies and hence how the details of school life relates to wider society

[Learning Without Limits](#) Susan Hart, Annabelle Dixon, Mary Jane Drummond, Donald McIntyre, 2004-03-16 The style and language used by the authors make the book readable and therefore a book that practising teachers can actively use as a guide to improve their practice it is amply demonstrated that teaching can and should be an activity whose primary focus is to enhance students learning capacity and not limit it Journal of Inservice Education Why do some teachers insist on teaching without recourse to judgements about ability What are the key principles on which they draw as they organize and provide for learning What is the significance of their alternative approach for classrooms in the 21st century This book explores ways of teaching that are free from determinist beliefs about ability In a detailed critique of the practices of ability labelling and ability focussed teaching Learning without Limits examines the damage these practices can do to young people teachers and the curriculum Drawing on a research project at the University of Cambridge the book features nine vivid case studies from Year 1 to Year 11 that describe how teachers have developed alternative practices despite considerable pressure on them and on their schools and classrooms The authors analyze these case studies and identify the key concept of transformability as a distinguishing feature of these teachers approach They construct a model of pedagogy based on transformability the mind set that children s futures as learners are not pre determined and that teachers can help to strengthen and ultimately transform young people s capacity to learn through the choices they make The book shows how transformability based teaching can play a central role in constructing an alternative improvement agenda This book will inspire teachers student

School Leadership and Education System Reform Toby Greany, Peter Earley, 2021-08-26 How can school leaders shape organisations that offer consistently high quality, rounded and equitable education in the context of rapid change? How can wider education systems support and encourage all schools to succeed in this way? What are the challenges and opportunities involved? What can we learn from existing evidence and research? *School Leadership and Education System Reform* considers the ways in which school leadership and its practice has changed and developed in response to a rapidly changing educational context over the last decade. This new edition is substantially revised and updated with ten completely new chapters. It includes contributions from a range of leading thinkers and researchers in the field of educational leadership and management. Theoretically and conceptually informed, the contributors draw on recent empirical research studies into leadership, learning and system reform in England and more widely to explore the key issues for contemporary school leadership and management in high autonomy, high accountability systems. New chapters look at system governance and lateral accountability in self-improving school systems, leading curriculum development and accelerating progress for disadvantaged children in schools, effective deployment of teaching assistants, leadership for inclusion, school collaboration, partnerships and system leadership, securing improvement at scale across multiple schools and across localities, new conceptions of leadership including ethical and invitational leadership. *School Leadership and Education System Reform* provides accessible but research and theory informed chapters, each of which includes summaries and suggestions for further reading.
