*Muddling Toward Frugality* Warren Johnson, 2010-07 Mr Johnson's thesis can be summarized without much difficulty after generations of extravagant and reckless industrial expansion we are clearly entering an age of economic scarcity While human demands continue to rise natural resources especially the non renewable kind become harder to find and more expensive to extract process transport and distribute This simple brute fact is the basic cause of inflation despite the inability of most professional economists to see it The dismal science has never been more dismally obtuse than it is today The law of diminishing returns is coming into effect Technological developments can delay the process but not halt or reverse it nor can we rely on government or big business to save us Planning for further growth delays the adjustments that must be made makes a fair sharing of necessary sacrifices more troublesome and if carried too far will make more severe and painful because rapid the inevitable decline of the international economic machine The best way to deal with the end of affluence is to accept it not fight it and to begin here and now the unavoidable adaptations on an individual family and community basis Piecemeal experimental and muddling

**The Law and Ecology of Pesticides and Pest Management** Mary Jane Angelo, 2016-03-03 Although concerns over the ecological impacts of pesticides gave rise to the environmental movement of the late 1960s and 1970s since that time pesticide use and its effects have been largely ignored by the law and by legal scholars This book addresses this omission by providing a unique and serious treatment of the significance of pesticide issues in environmental law and takes an ecological perspective on the legal issues Dealing with a wide range of questions relating to pests and pesticides the book focuses primarily on agricultural pesticide use as the largest contaminator in the US It also examines the legacy of past pesticide use and analyzes how recent developments in ecological science can inform the law and increase our understanding of ecology Interdisciplinary in its approach the book will be of interest to academics lawyers scientists and environmental and agricultural professionals

**Redefining Prosperity** Isabelle Cassiers, 2014-08-27 Society today faces a difficult contradiction we know exactly how the physical limits of our planet are being reached and exactly why we cannot go on as we have before and yet collectively we seem unable to reach crucial decisions for our future in a timely way This book argues that our definition of prosperity which we have long assimilated with the idea of material wealth may be preventing us from imagining a future that meets essential human aspirations without straining our planet to the breaking point In other words redefining prosperity is a necessary and urgent task This book is the fruit of a long debate among 15 scholars from diverse fields who worked together to bring the depth and nuance of their respective fields to questions that affect us all The result is a rich transdisciplinary work that illuminates the philosophical and historical origins of our current definition of prosperity identifies the complex processes that gave rise to the problems we face today elucidates the ways in which our contemporary environmental social nutritional economic political and cultural crises are interconnected and explores why a half century of economic growth has neither increased life satisfaction in the West nor vanquished world poverty Approaching these broad ranging questions from the specific standpoints of their disciplines each of the authors offers thoughts for the future considering possible escape routes and proposing changes to the way we live behave and organise society and public action changes that actually respond in an equitable way to our deepest aspirations Ultimately in laying the groundwork for a public debate on this subject this book poses a question to its readers what is your definition of prosperity and what can be done to promote it

**Good Farmers** Gene C. Wilken, 1990

For Everything a Season Warren Johnson, 2019-02-01 Warren Johnson's important book takes rereaders on a journey into the medieval way of life when the edict of Do unto others as you would yourself was the rallying cry that helped people work together for a common good So where did it all go so wrong What happened to caring for our fellow human Our land Our resources Warren argues that much was lost with the Age of Enlightenment While the age gave us reason and science it distanced us from the sacred leaving us with little more than an insatiable appetite for the new the

bigger the faster the shiner and the shallower For Everything a Season reignites the sacred flame Warren urges us to recommit to faith while maintaining our reason Guided by traditional principles embedded in the great teachings of the New and Old Testaments he offers a hopeful path to creating a modern eco system where every individual consumes and creates in balance with the sacred whole In this way we do away with excess make reparations for our past and ultimately lead a happier healthier life There is more meaning to the simple life than has been understood This book offers the map to true eternal treasure     Ecocritique Timothy W. Luke,1997     The Ecotechnic Future John Michael Greer,2009-10-01 How to survive and thrive in the post industrial age In response to the coming impact of peak oil John Michael Greer helps us envision the transition from an industrial society to a sustainable ecotechnic world not returning to the past but creating a society that supports relatively advanced technology on a sustainable resource base Fusing human ecology and history this book challenges assumptions held by mainstream and alternative thinkers about the evolution of human societies Human societies like ecosystems evolve in complex and unpredictable ways making it futile to try to impose rigid ideological forms on the patterns of evolutionary change Instead social change must explore many pathways over which we have no control The troubling and exhilarating prospect of an open ended future he proposes requires dissensus a deliberate acceptance of radical diversity that widens the range of potential approaches to infinity Written in three parts the book places the present crisis of the industrial world in its historical and ecological context in part one part two explores the toolkit for Ecotechnic Age and part three opens a door to the complexity of future visions For anyone concerned about peak oil and the future of the industrial society this book provides a solid analysis of how we got to where we are and a practical toolkit to prepare for the future     *Ranching, Mining, and the Human Impact of Natural Resource Development* Raymond L. Gold,2017-07-28 In *Ranching Mining and the Human Impact of Natural Resource Development* Raymond L Gold observes and reports on people whose lives have been significantly affected by the industrialization of rural communities in the American West Such community change research is rarely done so this classic study is invaluable for its real world groundings applicable to a variety of social science theories The study evolved out of ethnographic research on Western communities done over a full decade This was the first work of its kind to examine and account for the rise of local citizens groups on the sense of being a community Its account of this process covers both ordinarily slow and extraordinarily rapid areas of change in the American West In this regard it is a contribution to basic social theory showing clearly the interrelation between small community and large society elements of the structure and functioning of community life No other book brings together the story of social effects of natural resource development projects in the American West This book shows how to implement a social policy concerning resource development and public agencies It is intended for people interested in the environment American society rural and urban affairs social impact assessment and urban structures generally It is also aimed at industrial and community planners and natural resource development firms     Regarding Nature Andrew McLaughlin,1993-01-01

McLaughlin philosophy City U of New York argues that industrialism is the cause of our current environmental crisis and that the solution requires a fundamental change in how we understand nature and humanity He reviews the capitalist socialist industrial and scientific views of nature the ideology of control anthropocentrism and other topics Paper edition unseen 16 95 Annotation copyright by Book News Inc Portland OR

**The Dance with Community** Robert Booth Fowler,1991-07-25 Contemporary intellectuals have rushed to embrace the concept of community What does this tell us about American political thought Why are intellectuals uneasy with modern liberal individualism and its institutional policy results Why is political intellectual discourse dominated today by complaint In *The Dance with Community* Robert Booth Fowler reflects upon these and related questions My goal he writes is to present contemporary political thought about community for what it is a conversation interactive spirited and sometimes tough There have been many interpretations of the much discussed decline in community spirit Rather than offer another Fowler steps back to look at the debate itself He examines from the perspective of an intellectual historian the attention to community in current American political thought and explores the setting of that attention He also identifies five alternative models of community integral to the current debates and sketches a clear image of each its relationship to others the logic of its appeal and its emphases and problems In each instance he places the model into the larger conversation over alternative communities and the value of community itself

**Texas Wildlife Resources and Land Uses** Raymond C. Telfair,2011-01-20 Natural habitats for wildlife in Texas and the many species they support are dwindling at an alarming rate as an ever growing population continues to develop the land for commercial industrial and agricultural uses To take stock of our current wildlife and land resources identify challenges facing them and offer strategies for future management and conservation this book presents over twenty five essays by experts from a wide range of governmental and private organizations involved in wildlife policy and management Modeled on the proceedings of a 1982 wildlife symposium published by the Texas Chapter of The Wildlife Society this book updates and expands the issues involved in wildlife and land use The chapters are grouped into five sections perspectives on Texas wildlife resources future expectations in land use the public and future demands for wildlife wildlife management and research and wildlife management on public lands The diverse and sometimes competing viewpoints presented here will be important reading for everyone concerned with managing land for wildlife

*Technology and the Character of Contemporary Life* Albert Borgmann,2024-05-31 Blending social analysis and philosophy Albert Borgmann maintains that technology creates a controlling pattern in our lives This pattern discernible even in such an inconspicuous action as switching on a stereo has global effects it sharply divides life into labor and leisure it sustains the industrial democracies and it fosters the view that the earth itself is a technological device He argues that technology has served us as well in conquering hunger and disease but that when we turn to it for richer experiences it leads instead to a life dominated by effortless and thoughtless consumption Borgmann does not reject technology but calls for public conversation about the

nature of the good life He counsels us to make room in a technological age for matters of ultimate concern things and practices that engage us in their own right
