**The Politics of Attention and the Promise of Mindfulness** Lawrence Berger, 2023-09-27 It is evident from recent political campaigns such as that of Donald Trump that the deployment of attention is crucial for political outcomes. Indeed, Trump's presidency came about in part due to realities that were produced by the media themselves, which required in turn the engagement of public attention. The implication is that the instability and capriciousness that is often associated with attention can be an important influence on the outcomes that are so produced. Drawing on the thought of Martin Heidegger, Lawrence Berger puts forward a new conception of attention as human presence, showing how its state determines the efficacy of public spaces in articulating and achieving visions of the common good. As politicians seek to amass power by capturing attention, citizens can engage in disciplines of attention such as mindfulness in producing a public power that is more appropriately oriented to the welfare of all. Berger argues that the practice of mindfulness can enable enhanced ontological bonds to form between individuals, which can be the basis for more stable and effective political realities. Such bonds are not given structures but are rather contingent upon the state of attention, which comes about holistically by way of a hermeneutical circle of attention, language, and bodily understanding. This book is a valuable resource for scholars and students of philosophy of mind, political philosophy, phenomenology, and cognitive science.

**Humanistic Psychology** Joseph Royce,2012-12-06 THE FORMATIVE TENDENCY I have often pointed out that in my work with individuals in therapy and in my experience in encounter groups I have been led to the conviction that human nature is essentially constructive When in a therapeutic climate which can be objectively defined a person becomes sharply aware of more of his or her internal experiencing and of the stimuli and demands from the external world thus acquiring a full range of options the person tends to move in the direction of becoming a socially constructive organism But many are critical of this point of view Why should such a positive direction be observed only in humans Isn't this just pure optimism So quite hesitantly because I have to draw on the work and thinking of others rather than on my own experience I should like to try to set this directional tendency in a much broader context I shall draw on my general reading in the field of science but I should like to mention a special indebtedness to the work of Lancelot Whyte in *The Universe of Experience* Harper and Row 1974 the last book he wrote before his death Though the book has flaws in my judgment this historian has some thought provoking themes to advance I have learned from many others as well

in designing my courses in the philosophy of science I naturally gravitated to the works of Hanson Kuhn Polanyi and Toulmin without at first fully realizing why I felt such a strong kinship with them beyond their common anti positivism
