Arber, 2006-07-20 This book provides a highly illustrated and comprehensive account of the diseases of the human bone marrow. It will help experienced clinicians and those in training to answer the practical diagnostic questions that arise during the routine analysis of bone marrow core biopsy specimens. Throughout the text, histologic interpretation is integrated with clinical and laboratory findings. Emphasis is placed on the evaluation of peripheral blood aspirate smear, clot section and core biopsy as well as ancillary techniques including flow cytometry and immunohistochemistry in the diagnosis of hematologic disorders of the marrow. The text is illustrated with numerous color figures, charts and tables and descriptions of real case situations using the most up to date classification systems. *Illustrated Pathology of Bone Marrow* should be read by all pathologists, hematologists and laboratory technicians involved in the analysis of bone marrow specimens.

Bone Marrow Biopsy Pathology Christine Beham-Schmid, Annette Schmitt-Graeff, 2020-08-05 This comprehensive superbly illustrated reference is designed to provide practical diagnostic assistance for hematopathologists when dealing with common and uncommon lesions in bone marrow trephine biopsies (BMTBs). At the heart of the book is a systematic analysis of neoplastic hematological and non hematological disease entities with concise identification of the key features of myeloproliferative neoplasms, myelodysplastic syndromes, acute and chronic leukemias, eosinophilia, associated myeloid lymphoid neoplasms, lymphoproliferative disorders and selected non hematopoietic malignancies. Relevant examples of BMTBs are presented with microscopic description, high quality photomicrographs and clinical data. The book also explains how to assess hematopoietic and stromal components of normal BMTBs, identifies the heterogeneous patterns that may be observed in healthy individuals and analyzes reactive conditions with particular attention to diagnostic problems and pitfalls.
