Rapid Response Manufacturing:

Rapid Response Manufacturing Jian (John) Dong, 2012-12-06 Recently many new technologies have been developed for engineers to reduce the time required to design and manufacture products in response to rapidly fluctuating market demands This book addresses a variety of contemporary methodologies technologies and tools for rapid response manufacturing The contributions to this volume focus on two major RRM areas desktop manufacturing and computer and information technologies Rapid Response Manufacturing is an invaluable resource for research engineers product design and manufacturing engineers graduate engineering students and all those concerned with concurrent engineering □□□□ 1988, □□□□-□□□□ □□□□□□ *Rapid Response Manufacturing* Jian (John) Dong, 1997-11-01 *Rapid Response Manufacturing (RRM). Final CRADA Report*, 1998 US industry is fighting to maintain its competitive edge in the global market place Markets fluctuate rapidly Companies have to be able to respond quickly with improved high quality cost efficient products Because companies and their suppliers are geographically distributed rapid product realization is dependent on the development of a secure integrated concurrent engineering environment operating across multiple business entities The way products are developed and brought to market can be improved and made more efficient through the proper incorporation of emerging technologies implemented in a secure environment This documents the work done under this CRADA to develop capabilities which permit the effective application incorporation and use of advanced technologies in a secure environment to facilitate the product realization process Lockheed Martin Energy Systems LMES through a CRADA with the National Center for Manufacturing Sciences NCMS worked within a consortium of major industrial firms Ford General Motors Texas Instruments United Technologies and Eastman Kodak and several small suppliers of advanced manufacturing technology MacNeal Schwendler Corp Teknowledge Corp Cimplex Corp Concentra Spatial Technology and Structural Dynamics Research Corp SDRC to create infrastructure to support the development and implementation of secure engineering environments for Rapid Response Manufacturing The major accomplishment achieved under this CRADA was the demonstration of a prototypical implementation of a broad based generic framework for automating and integrating the design to manufacturing activities associated with machined parts in a secure NWC compliant environment Specifically methods needed to permit the effective application incorporation and use of advanced technologies in a secure environment to facilitate the product realization process were developed and demonstrated An important aspect of this demonstration was the implementation of a Product Information Management System that supports secure concurrent engineering in an open environment **Rapid Response Manufacturing** Nabil N. Analysieren der Kundenbasis und das stete Bemühen die Kundenerwartungen effektiver zu erfüllen und zu übertreffen als die Konkurrenz sind der Schlüssel zu langfristigem strategischem Erfolg. Nur wenige Lehrbücher konzentrieren sich direkt auf den Kunden. Die meisten folgen entweder dem traditionellen Marketing Mix Ansatz der auf den 4 Ps beruht und gehen kaum auf das Marketing in einem weiter gefassten Kontext ein. Fazit: Diese Lehrbücher sind in der Regel viel zu umfangreich und nicht ganz zeitgemäß. Strategic Marketing ist anders. Das Buch ist kundenorientiert und konzentriert sich im wesentlichen auf die drei Gründe warum ein Unternehmen existiert: um den Kunden Wert bereitzustellen, zu kommunizieren und zu vermitteln. Prägnant, anschaulich und praxisnah.

Proceedings of the XV International Scientific Conference on Industrial Systems (IS'11), *Direct Engineering: Toward Intelligent Manufacturing* Ali K. Kamrani, Peter R. Sferro, 2012-12-06

Direct Engineering (DE) is the creation of a product development cycle into a single unified process. The design process in most industries is an evolutionary one, i.e. incremental changes to some existing design. DE is a manufacturing process that seeks to improve the design processes by providing complete archival documentation of existing designs. It uses three dimensional geometric models with integrated manufacturing information throughout the design process. DE reduces the design cycle and the variety and number of engineering changes. This process decreases the design cycle time, increases productivity and provides a higher quality product. The required technologies and methodologies that will support the development of the DE environment are: 1) product representation using feature based modeling, 2) knowledge based applications that will support the entire product development cycle, 3) an engineering environment implemented around distributed computing and object oriented systems, 4) direct manufacturing techniques using rapid prototyping. *Direct Engineering: Toward Intelligent Manufacturing* addresses the following recent topics related to the development, implementation and integration of the DE environment: 1) the current scope of the research in intelligent manufacturing, 2) the results of the technologies and tools developed for integrated product and process designs and 3) examination of the methodologies and algorithms used for the implementation of direct engineering.

Equipping Tomorrow's Military Force National Research Council, Division on Engineering and Physical Sciences, Board on Manufacturing and Engineering Design, Committee on Integration of Commercial and Military Manufacturing in 2010 and Beyond, 2002-04-01. Owing to the expected nature of combat in 2010, U.S. military forces face a pressing need to transform themselves for rapid response to an unpredictable threat. Rapid advances in commercial technology, particularly in electronics, coupled with the easy access to commercial technology enjoyed by potential adversaries, will compel DOD and defense contractors to excel at integrating commercial technology into defense systems. This integration of commercial and military manufacturing (ICMM) has begun on a small scale. By 2010 it needs to increase substantially if U.S. forces are to retain a technological edge. This report assesses the

opportunities for increased ICMM in 2010 and beyond identifies barriers and recommends strategies for overcoming them
