Redefining Politics People Resources And Power:

Redefining Politics Adrian Leftwich, 2009-10 The book provides a clear framework for analyzing politics in all human groups from families to multinational companies and from villages to modern nation states Throughout it is concerned to extend the range of politics beyond its usual institutional focus to stress its interdisciplinary requirements and to expand the conception of politics in societies

Redefining Politics Adrian Leftwich, 2013-04-15 This book challenges conventional conceptions of politics which focus largely on the institutions of government and the associated struggles for power around them It argues that politics is involved in all the activities of cooperation and conflict whereby people organize the use production and distribution of human natural and material resources Found in all human groups institutions and societies politics everywhere influences and reflects the structures of power social organization culture and ideology These central themes are illustrated by drawing on a wide range of societies including the Kung hunter gatherers the pre Columbian Aztecs and the Pastoral Maasai as well as modern Britain and Third World societies from Chile to China Other examples of village communities a typical university department and the World Bank show how institutions may also be analyzed in terms of the definition of politics used here It is equally central to the argument that many of the most critical problems occurring in societies can be attributed to their politics and this theme is explored looking at such problems as poverty famines epidemics violence and unemployment in Britain and throughout the world

Rethinking Resource Management Richard Howitt, 2002-01-31 This book offers students and practitioners a sophisticated and convincing framework for rethinking the usual approaches to resource management It uses case studies to argue that professional resource managers do not take responsibility for the social and environmental consequences of their decisions on the often vulnerable indigenous communities they affect It also discusses the invisibility of indigenous people values and knowledge within traditional resource management It offers a new approach to social impact assessment methods which are more participatory and empowering The book employs a range of case studies from Australia North America and Norway

The Politics of Social Conflict Andy Wood, 1999-09-16 This book provides an alternative approach to the history of social conflict popular politics and plebeian culture in the early modern period Based on a close study of the Peak Country of Derbyshire c 1520 1770 it has implications for understandings of class identity popular culture riot custom and social relations A detailed reconstruction of economic and social change within the region is followed by an in depth examination of the changing cultural meanings of custom gender locality skill literacy orality and magic The local history of social conflict sheds light upon the nature of political engagement and the origins of early capitalism Important insights are offered into early modern social and gender identities civil war allegiances the appeal of radical ideas and the making of the English working class Above all the book challenges the claim that early modern England was a hierarchical pre class society

Language and the Complex of Ideology Mohamed Douifi, 2018-06-26 This book undertakes a systematic analysis of the workings of ideology in discourse

using an interdisciplinary approach that links language cognition and society Through examination of two corpora a collection of British newspaper articles and a set of political speeches the author examines Britain s involvement in the Iraq War 2003 and critically assesses the language practices which constructed a pro war ideology under Tony Blair s premiership Drawing on a constellation of concepts from van Dijk s socio cognitive model this book carries out both qualitative and quantitative analyses and conceptualises discourse as a nonlinear highly discursive and socio cognitive phenomenon This innovative work will appeal to students and scholars of Cognitive Linguistics Quantitative Linguistics Social Constructivism Critical Discourse Analysis Political Sciences and Communication Studies **Encyclopedia of**

of the Excluded, c. 1500-1850 Tim Harris,2017-03-14 This collection of essays seeks to shed light on the politics of those people who are normally thought of as being excluded from the political nation in early modern England If by political nation we mean those who sat in parliament the governors of counties and towns and the enfranchised classes in the constituencies then the excluded would be those who were neither actively involved in the process of governing nor had any say in choosing those who would rule over them the bulk of the population at this time Yet this volume shows that these people were not in fact excluded from politics Not only did the masses possess political opinions which they were capable of articulating in a public forum but they were also often active participants in the political process themselves and taken seriously in that capacity by the governmental elite The various essays deal with topics as wide ranging as riots rumours libels seditious

words public opinion the structures of local government and the gendered dimensions of popular political participation and cover the period from the eve of the Reformation to the Industrial Revolution They challenge many existing assumptions concerning the nature and significance of public opinion and politics out of doors in the early modern period and show us that the people mattered in politics and thus why we as historians cannot afford to ignore them Politics was more participatory in this undemocratic age than one might have thought The contributors to this volume show that there was a lively and engaged public sphere throughout this period from Tudor times to the Georgian era

Innovations for Land Management, Governance, and Land Rights for Sustainable Urban Transitions Ahmed M. Soliman, Ramin

Keivani, 2024-07-27 The transformation of the built environment during the last few decades has placed enormous demands for land About 7.7 billion people live on the planet which is expected to increase by 2.53 billion in just 30 years with the highest growth projected to be in less developed regions The spreading of urban informality in cities of the Global South leads to chaotic informal economies and an inability to capitalize on urban rural economies of scale and exchange The combination of socioeconomic and climate change vulnerability in urban centres is having a double impact on already poverty stricken and marginalized groups especially women racialized and ethnic minority groups leading to what has come to be known as climate injustice Land constitutes a main component of urban development and is the main asset for informal urban communities in the Middle East region The State and urban planners can aim to regulate the growth of informal land markets or represent the interests of the citizens However in reality the increasing retreat or absence of the public authorities the crisis of confidence between the governed and governing and the deficit of urban policies to address the multitude of generated challenges cannot be concealed This volume examines three main themes land management and governance in the era of sustainability Legal informal and illegal land tenures and the broader socioeconomic changes impacting land and housing delivery It investigates the correlations transitions and interactions between the various forces and multi stakeholders that control and adjust the land delivery system for low income groups and the urban poor This includes exploring mechanisms for correcting urban inequalities between central and peripheral quarters and the modes of shared governance Finally the volume also discusses developing national land policies based on legal instruments that connect the implementation of the SDGs land and tenure security as critical drivers for more sustainable land delivery realization

Environment and Politics Timothy Doyle, Doug McEachern, 2004-08-02 Published in the year 2001 *Environment and Politics* is a valuable contribution to the field of Geography *Locating Agency* Fiona Williamson, 2011-10-18 In the latter half of the twentieth century historians came to consider politics to mean more than simply the formal institutions and apparatus of government run by a small minority of wealthy educated elite men The word has been adopted by historians of different genres as synonymous with power or agency and the scope for political activity has been widened to incorporate a variety of everyday events and ordinary people These collected essays explore the quotidian experience of politics in the form of popular politics religion and popular culture The contributors consider for example the politics of the alehouse the politics of Methodism the interrelationship between plebeian agency custom and memory the politics of economics dramatic agency and the politics of the spiritual parish Collectively they suggest that political activity was embedded in almost every aspect of life In addition they draw on interdisciplinary theory in particular the spatial turn and how it can be used to better

understand popular agency **Social Relations and Urban Space** Fiona Williamson, 2014 This book offers an insight into the social relationships and topographies that fashioned both city life and landscape and serves as a useful counterpoise in a field that has largely focused on London This is a book about seventeenth century Norwich and its inhabitants At its core are the interconnected themes of social topographies and the relationships between urban inhabitants and their environment Cityscapes were and are shaped and given meaning during the practice of people's lived experiences In return those same urban places lend human interactions depth and quality Social Relations and Urban Space uncovers manifold possible landscapes including those belonging to the rich and to the poor to men to women to strangers and foreigners to political actors of both formal and informal means Norwich's inhabitants witnessed the tumultuous seventeenth century at first hand and their experiences were written into the landscape and immortalised in its exemplary surviving records This book offers an insight into the social relationships and topographies that fashioned both city life and landscape and serves as a useful counterpoise in a field that has largely focused on London FIONA WILLIAMSON is currently Senior Lecturer in History at the National University of Malaysia **Key Ideas in Politics** Moyra Grant, 2003 Designed for AS and A2 students Key Ideas in Politics focuses on both historical and contemporary political themes and ideas providing the reader with the background to analyse important political questions It provides quick and easy to read summaries of key ideas and key thinkers enabling students to attain and assimilate knowledge quickly Features track the history of each idea the idea in action today the debate that surrounds it and its practical application **After Politics** Glen Newey, 2000-12-18 Why do political philosophers why away from politics After Politics The Rejection of Politics in Contemporary Liberal Philosophy offers a challenging and original critique of liberalism the dominant political philosophy of our time tackling key issues like state legitimacy value pluralism neutrality the nature of politics public reasons and morality in politics Analyzing major liberal theorists like Rawls Habermas Rorty Barry Gray Raz Larmore Ackerman and others Glen Newey argues that liberalism bypasses politics because it ignores or misunderstands human motivation and elevates academic system building over political realities of conflict and power **Redefining Diversity and Dynamics of Natural Resources Management in Asia, Volume 1** Ganesh Shivakoti, Ujjwal Pradhan, Helmi Helmi, 2016-09-01 Redefining Diversity and Dynamics of Natural Resources Management in Asia Volumes 1-4 brings together scientific research and policy issues across various topographical areas in Asia to provide a comprehensive overview of the issues facing the region Sustainable Natural Resources Management in Dynamic Southeast Asia Volume 1 pulls together regional experts in the field to look specifically at sustainability issues across the region to see what has been implemented what the impacts have been and what other options are available In the race to be a developed region many Southeast Asian countries have foregone natural resources through haphazard use As a result the people are faced with numerous environmental challenges particularly deforestation and forest degradation biodiversity loss and ecosystem degradation reduction in soil quality and decreases in the quantity of available

water Community based forest management is the involvement of local communities in the protection conservation and management of public forests to prevent degradation through sustainable practices while still responding to the basic social and economic needs of local populations When the people who depend on forest resources for their livelihoods are jointly responsible for managing and protecting them they tend to do so in a more sustainable manner by focusing on the long term benefits rather than the immediate short term gains However when tenure rights are weak unclear or insecure or offer limited benefits people are incited in extracting more immediate benefits resulting in suboptimal forest management and the reduction of carbon stocks Features case studies that cover issues such as rising levels of deforestation forest degradation regional food security ecosystem degradation biodiversity loss conflicts over natural resource use water management issues and impacts on local communities Includes contributions from local researchers who are dealing with these issues first hand and on a daily basis Includes a comparative review on REDD implementation in different communities Focuses on sustainability issues across the region

Political Analysis Colin Hay, 2017-03-14 Political Analysis provides an accessible and engaging yet original introduction and distinctive contribution to the analysis of political structures institutions ideas and behaviours and above all to the political processes through which they are constantly made and remade Following an innovative introduction to the main approaches and concepts in political analysis the text focuses thematically on the key issues which currently concern and divide political analysts including the boundaries of the political the question of structure agency and power the dynamics of political change the relative significance of ideas and material factors and the challenge posed by postmodernism which the author argues the discipline can strengthen itself by addressing without allowing it to become a recipe for paralysis

The Permanence of the Political Joseph M. Schwartz, 1995-11-13 Why have radical political theorists whose thinking inspired mass movements for democracy been so suspicious of political plurality According to Joseph Schwartz their doubts were involved with an effort to transcend politics Mistakenly equating all social difference with the harmful way in which particular interests dominated marketplace societies radical thinkers sought a comprehensive set of true human interests that would completely abolish political strife In extensive analyses of Rousseau Hegel Marx Lenin and Arendt Schwartz seeks to mediate the radical critique of democratic capitalist societies with the concern for pluralism evidenced in both liberal and postmodern thought He thus escapes the authoritarian potential of the radical position while appropriating its more democratic implications In Schwartz's view a reconstructed radical democratic theory of politics must sustain liberalism's defense of individual rights and social pluralism while redressing the liberal failure to question structural inequalities In proposing such a theory he criticizes communitarianism for its premodern longing for a monolithic virtuous society and challenges the politics of difference for its failure to question the undemocratic terrain of power on which difference is constructed In conclusion he maintains that an equitable distribution of power and resources among social groups necessitates not the transcendence of politics but its democratic expansion
