Committee on Interior and Insular Affairs. Subcommittee on National Parks and Recreation, 1967 **The Wild Trees** Richard Preston, 2008-02-12 Hidden away in foggy uncharted rain forest valleys in Northern California are the largest and tallest organisms the world has ever sustained the coast redwood trees *Sequoia sempervirens* Ninety six percent of the ancient redwood forests have been destroyed by logging but the untouched fragments that remain are among the great wonders of nature The biggest redwoods have trunks up to thirty feet wide and can rise more than thirty five stories above the ground forming cathedral like structures in the air Until recently redwoods were thought to be virtually impossible to ascend and the canopy at the tops of these majestic trees was undiscovered In The Wild Trees Richard Preston unfolds the spellbinding story of Steve Sillett Marie Antoine and the tiny group of daring botanists and amateur naturalists that found a lost world above California a world that is dangerous hauntingly beautiful and unexplored The canopy voyagers are young just college students when they start their quest and they share a passion for these trees persevering in spite of sometimes crushing personal obstacles and failings They take big risks they ignore common wisdom such as the notion that there's nothing left to discover in North America and they even make love in hammocks stretched between branches three hundred feet in the air The deep redwood canopy is a vertical Eden filled with mosses lichens spotted salamanders hanging gardens of ferns and thickets of huckleberry bushes all growing out of massive trunk systems that have fused and formed flying buttresses sometimes carved into blackened chambers hollowed out by fire called fire caves Thick layers of soil sitting on

limbs harbor animal and plant life that is unknown to science Humans move through the deep canopy suspended on ropes far out of sight of the ground knowing that the price of a small mistake can be a plunge to one's death Preston's account of this amazing world by turns terrifying moving and fascinating is an adventure story told in novelistic detail by a master of nonfiction narrative The author shares his protagonists passion for tall trees and he mastered the techniques of tall tree climbing to tell the story in *The Wild Trees* the story of the fate of the world's most splendid forests and of the imperiled biosphere itself

The Arbournaut Meg Lowman, 2021-08-10 An eye opening and enchanting book by one of our major scientist explorers Diane Ackerman author of *The Zookeeper's Wife* Nicknamed the Real Life Lorax by National Geographic the biologist botanist and conservationist Meg Lowman aka CanopyMeg takes us on an adventure into the eighth continent of the world's treetops along her journey as a tree scientist and into climate action Welcome to the eighth continent As a graduate student exploring the rain forests of Australia Meg Lowman realized that she couldn't monitor her beloved leaves using any of the usual methods So she put together a climbing kit she sewed a harness from an old seat belt gathered hundreds of feet of rope and found a tool belt for her pencils and rulers Up she went into the trees Forty years later Lowman remains one of the world's foremost arbournauts known as the real life Lorax She planned one of the first treetop walkways and helps create more of these bridges through the eighth continent all over the world With a voice as infectious in its enthusiasm as it is practical in its optimism *The Arbournaut* chronicles Lowman's irresistible story From climbing solo hundreds of feet into the air in Australia's rainforests to measuring tree growth in the northeastern United States from searching the redwoods of the Pacific coast for new life to studying leaf eaters in Scotland's Highlands from conducting a BioBlitz in Malaysia to conservation planning in India and collaborating with priests to save Ethiopia's last forests Lowman launches us into the life and work of a field scientist ecologist and conservationist She offers hope specific plans and recommendations for action despite devastation across the world through trees we can still make an immediate and lasting impact against climate change A blend of memoir and fieldwork account *The Arbournaut* gives us the chance to live among scientists and travel the world even in a hot air balloon It is the engrossing uplifting story of a nerdy tree climber the only girl at the science fair who becomes a giant inspiration a groundbreaking ground defying field biologist and a hero for trees everywhere Includes black and white illustrations

Heather McNeil, 2025-07-10 Experts agree that it's essential for children to spend time exploring and enjoying the outdoors when they come back in. Librarians and teachers can supplement their adventures with nature storytimes. In this comprehensive book full of storytime plans, veteran children's librarian Heather McNeil recommends storytime books that encourage respect for nature and an understanding of the fragility of ecosystems. Each chapter includes crafts, games, songs, and rhymes that focus on learning about and appreciating nature. Some crafts use items from the outdoors; others represent nature's beauty or mystery. Storytime plans include all the components of a successful storytime: books, songs, movement, and creative participation. Librarians and early elementary teachers will enjoy using this book to support literacy and social-emotional goals while helping children develop an appreciation of the natural world. *Agriculture Handbook*, 1977. Set includes revised editions of some issues.
