Reflecting On Research Practice Issues In Health And Social Welfare:

Reflecting on Research Practice Pam Shakespeare, Dorothy Atkinson, Sally French, 1993 Charts some of the hidden from view aspects of social research and explores many of the complex processes involved The chapters range from developing ideas and negotiating with funders to building research relationships and disseminating findings **Observation and Its Application to Social Work** Pat Le Riche, Karen Tanner, 1998 Karen Tanner and Pat Le Riche have brought together a range of contributions from practitioners and social work academics in order to discuss the application of ideas about observation to social work education and practice The authors focus on how observation can be used to counteract oppressive and dehumanising practices **Do It Yourself Social Research** Yoland Wadsworth, 2016-06-16 With the rapid growth of collaborative indigenous and community based research one of the key challenges researchers face is finding an effective way of involving non researchers in the research process Do It Yourself Social Research has been a best selling methodology guide for action research projects and community groups in Australia for almost three decades Always emphasizing the importance of a spirit of inquiry it demystifies the research process covering where to start how to manage a research project what methods techniques and resources to use and interpretation analysis and reporting This third edition has been thoroughly revised adding the use of narrative and dialogue in research rich research design and what digital technology can and can t contribute to the research process With its hands on no nonsense approach Do It Yourself Social Research is an essential resource for community groups college students and other novice researchers in health social welfare education and related areas Issues in Deaf Education Susan Gregory, 1998 First Published in 1998 Routledge is an imprint of Taylor Francis an informa company **Qualitative Research Practice** Clive Seale, David Silverman, Jaber F Gubrium, Giampietro Gobo, 2006-11-15 This book is jam packed with a wide range of material related to qualitative research T his is a quality text and has much to offer the reader especially the novice researcher Nurse Researcher This comprehensive collection of almost 40 chapters each written by a leading expert in the field is the essential reference for anyone undertaking or studying qualitative research It covers a diversity of methods and a variety of perspectives and is a very practical and informative guide for newcomers and experienced researchers alike John Scott University of Essex The best ways in which to understand the issues and processes informing qualitative research is to learn from the accounts of its leading practitioners Here they come together in what is a distinctive and wide ranging collection that will appeal to postgraduates and social researchers in general Tim May University of Salford This excellent guide engages in a dialogue with a wide range of expert qualitative researchers each of whom considers their own practice in an illuminating and challenging way Overall the book constitutes an authoritative survey of current methods of qualitative research data collection and analysis Nigel Gilbert University of Surrey This concise paperback edition of the best selling handbook Qualitative Research Practice is particularly aimed at the student reader The chapters are written by leading internationally distinguished qualitative researchers who recount and

reflect on their own research experiences as well as others past and present from whom they have learned It demonstrates the benefits of using particular methods from the viewpoint of real life experience This is also a good philosophy for students to adopt in planing research work to begin from a practical conception of the research process and to treat a book like this as an opportunity to learn a valuable craft From the outside good research seems to be produced through practitioners learning and following standard theoretical empirical and procedural formats But from the inside we learn that qualitative research like other forms of scientific endeavour is also a biographical engagement rendering its scholarly and practical contributions in its own terms Standards take on practical meaning as the distinct activities of qualitative research resonate throughout the enterprise complicating its accountability to itself and to others In an authoritative yet accessible manner Qualitative Research Practice reveals the special features of this engagement teaching us that qualitative research is as much a craft and practice as it is a way of knowing Presenting a comprehensive examination of contemporary and traditional varieties of qualitative research practice Qualitative Research Practice will be an invaluable resource for advanced students and researchers in any discipline It is an essential and definitive guide to the major forms of qualitative methods in use today written by leaders in the relevant fields of research practice *Fieldwork, Participation and Practice* Marlene de Laine,2000-12-19 This timely and topical look at the role of ethics in fieldwork takes into account some of the major issues confronting qualitative researchers The main purposes of this book are twofold to promote an understanding of the harmful possibilities of fieldwork and to provide ways of dealing with ethical problems and dilemmas To these ends examples of actual fieldwork are provided that address ethical problems and dilemmas and posit ways of dealing with them Feminist Research in Theory and Practice Gayle Letherby,2003-02-16 an extremely welcome addition to the field of feminist research British Journal of Educational Studies This is a clear and accessible exploration of feminist method methodology and epistemology After situating herself and her work Gayle Letherby charts the debates concerned with the epistemological political and practical issues involved in doing feminist research and places the debates within a wider consideration of the status of knowledge The main focus of the book is then the particular and practical issues for feminist researchers It examines how the process of research affects the results of that research and explores the relation between politics and practice in terms of research and knowledge production Throughout the book there is a practical emphasis on specific examples of feminist research in action and as well as summarizing current theoretical debates Gayle Letherby adds to them Feminist Research in Theory and Practice is designed and written as a textbook for students at advanced undergraduate and postgraduate level but will be a valuable resource for any researcher or individual interested in women s studies feminism and in researching in the social sciences *Research Methods For Nurses And The Caring Professions* Pamela Abbott,Roger Sapsford,1998-05-16 Praise for the first edition of Research into Practice and Research Methods for Nurses and the Caring Professions These books provide a good introduction for the uninitiated to reading and doing research Abbott and Sapsford

provide a clearly written and accessible introduction to social research One of their aims is to demystify research and in this they succeed admirably After reading the text and the articles in the reader and working through the various research exercises readers should have a clear appreciation of how to evaluate other people's research and how to begin their own David Field *Journal of Palliative Medicine* This book now substantially revised in its second edition is about the appreciation evaluation and conduct of social research Aimed at nurses social workers community workers and others in the caring professions the book is particularly focused on research which evaluates and contributes to professional practice The authors have provided many short practical exercises in the text and the examples are drawn mostly from projects carried out by one or two people rather than large research teams The clear accessible style will make this the ideal introductory text for those undertaking or studying research for the first time The book may be used in conjunction with *Research into Practice* Open University Press a reader of useful examples selected by the same authors

An Auto/Biographical Approach to Learning Disability Research Dorothy Atkinson, 2018-12-07 First published in 1997 Dorothy Atkinson collects testimonies of the personal perspectives of people with learning disability in order to rediscover the histories of people with learning disabilities Calling on the importance of auto biographical research as a mode to encourage social historical awareness and potential understanding of the commonalities as well the differences between people with learning difficulties

Post-Qualifying Child Care Social Work Gillian Ruch, 2008-11-13 The first text to systematically address the learning needs of post qualifying child care social workers Soundly organized and engagingly written with useful summaries and reflective exercises for students it is a very fine text that will be widely used Nick Pike Principal Lecturer in Social Work University of Gloucestershire This textbook provides an overview of the Post Qualifying Child Care Award in social work Written in response to recent policy and training guidelines it provides the underpinning knowledge for candidates following the Post Qualifying curriculum It helps child care social workers acquire and develop the breadth of knowledge and understanding that characterise best practice Key features include Chapters on reflective collaborative and critical practice child development child observation case management and managing risk working in partnership with children and families inter professional working and practice education Links to the relevant post qualifying standards for social work Contributions from a team of practice assessors and programme candidates A practice based approach clearly links theory research and practice An inter professional perspective Case studies activities and points for reflection that encourage the reader to develop ways of challenging and improving their own practice The book equips social workers with the relevant

training knowledge and skills to improve the quality of services and their delivery With an emphasis upon continuing professional development this text is suitable for social workers studying for the Child Care Award those already in practice and other social care professionals working with children

The Discursive Construction of Intercultural Understanding in China Wang Xi, 2015-11-11 This book represents an ethnographic study of an International Baccalaureate Diploma Program in a school in mainland China serving Chinese students and staffed by teachers from a variety of origins It offers in depth descriptions of the way in which students teachers and managers interact and communicate with one another in a variety of school activities Through the communication process cultural experiences and understandings are negotiated constantly among school participants The ethnographic study also has a critical intention Going beyond description the author discusses the extent to which networks of social relationships in the case are imbued by asymmetries in power and how this leads to people's inability unwillingness and unawareness to interact with those from different cultural backgrounds As research findings reveal where the construction of meaning is less equally available to each participant prejudice and exclusiveness are more likely to be assumed impeding individuals intercultural learning The key is to empower those less privileged giving them legitimacy to come to voice in an institutional context on the one hand and protecting their reflections on hegemonic discourse meticulously on the other hand Since the research explores the complexities and subtleties of the communication process that are bound to particular contexts like most ethnographic studies it aims at adding a body of experience and humanistic understanding of cultures rather than testing theories Although the IB Program being studied can hardly be representative of the overall development of international education in China the detailed description of contextual issues of the case and the research procedures could facilitate the readers to vicariously experience these events thus they can make their own decisions about the transferability of the research to their own unique situations
