Reflections And Definitions:

Reflection-in-Motion Jaclyn Fiscus-Cannaday, 2025-05-23 Reflection in Motion considers how reflective practice is embedded in daily course happenings centering the experiences of students and teachers in Minority Serving Institutions to amplify underrepresented viewpoints about how reflection works in the writing classroom Jaclyn Fiscus Cannaday examines how its availability is subject to teacher student power dynamics the literacies welcomed or not in the class the past and present pedagogies that students are engaging with and attending to and the interactions among humans materials and emotions within the rhetorical context She adopts an intersectional feminist perspective for an inclusive view of how practitioners name identify and practice reflection in the everyday moments of writing classrooms Fiscus Cannaday invokes a Black feminist qualitative research method that Venus Evans Winters calls a mosaic When researchers collect both traditional and nontraditional texts to create a full view of students and teachers interviews at three institutions a Hispanic Serving Institution a Historically Black College and University and an Asian American Native American Pacific Islander Serving Institution she finds that practitioners often build definitions from past experiences with reflection and then use those definitions as terministic screens to decide if an activity can be named identified and practiced as reflection These definitions hold different rhetorical effects reflection for introspection reflection for learning reflection for mindfulness and reflection for awareness Reflection is used for these different rhetorical effects but because classrooms so often focus on the Westernized view and its emphasis on growth reflection has the underused and undertheorized potential rhetorical effect of helping students investigate their identities and positionalities acknowledge deep rooted ideologies and consider new perspectives so they can better work across difference Reflection in Motion will inspire teachers and writing program administrators to listen to how students define and practice reflection and why thus making room for more capacious definitions of reflection and student centered practices of what reflection can do and be

The Mathematics of Shock Reflection-Diffraction and von Neumann's Conjectures Gui-Qiang G Chen, Mikhail Feldman, 2018-02-27 This book offers a survey of recent developments in the analysis of shock reflection diffraction a detailed presentation of original mathematical proofs of von Neumann's conjectures for potential flow and a collection of related results and new techniques in the analysis of partial differential equations PDEs as well as a set of fundamental open problems for further development Shock waves are fundamental in nature They are governed by the Euler equations or their variants generally in the form of nonlinear conservation laws PDEs of divergence form When a shock hits an obstacle shock reflection diffraction configurations take shape To understand the fundamental issues involved such as the structure and transition criteria of different configuration patterns it is essential to establish the

global existence regularity and structural stability of shock reflection diffraction solutions This involves dealing with several core difficulties in the analysis of nonlinear PDEs mixed type free boundaries and corner singularities that also arise in fundamental problems in diverse areas such as continuum mechanics differential geometry mathematical physics and materials science Presenting recently developed approaches and techniques which will be useful for solving problems with similar difficulties this book opens up new research opportunities

Possibilities, Challenges, and Changes in English Teacher Education Today Heidi L. Hallman, Kristen Pastore-Capuana, Donna L. Pasternak, 2019-05-24 This book focuses on English teacher educators experiences concerning professionalization and teacher identity The term professionalization itself can be problematized Popkewitz 1994 as it connotes adherence to realities to professional norms that are based within particular histories Yet teacher educators must confront how to mentor prospective teachers into the field and how changes to the field manifest changes to what it means to be a professional In research about changes in English teacher education over the past twenty years Pasternak Caughlan Hallman Renzi and Rush 2017 presented five distinct foci of ELA programs that have evolved 1 changes to field experiences within teacher education programs 2 altered conceptions of teaching literature and literacy within the context of ELA 3 increased adherence to standardization 4 changing demographics of students in K 12 classrooms and 5 increased expectations for use of technology within ELA These foci impact how professionals in ELA are viewed both from inside and outside the profession and how they navigate these tensions in teacher education programs to define what it means to identify as an English teacher Throughout the book chapter authors articulate dilemmas that focus around professionalization and teacher identity questioning what it means to be an English teacher today While some chapters suggest methods for increased awareness of tensions within practice other chapters approach professionalization and teacher identity by asking what the limits of methods classes and teacher education might be in preparing ELA teachers and supporting them to remain in the profession Today s political environment devalues teachers and teaching a situation that

has critics deriding the educational standards at institutes of higher education while concurrently lauding alternative programs that do not have to adhere to the same rigorous teacher certification requirements English teacher educators are now being asked to design programs soften requirements and recruit and mentor teacher candidates to a profession that in the past certified more new English teachers than it could employ The chapters in this book explore what it means to educate and be an English teacher educator under these conditions

The Role of Reflection in Managerial Learning Marilyn W. Daudelin, Kent W. Seibert, 1999-09-30 Challenging work experiences are the richest source of learning for today's managers Yet lessons embedded in these experiences are not always obvious This comprehensive book describes a critical yet under researched element of how managers learn from these experiences reflection Today's workplace demands continual learning which in turn requires reflection While this book supports the prevailing view that reflection is central to experiential learning it challenges the traditional views that it is the same as contemplation that it is incompatible with management and that it is time consuming and unnatural for managers Original quantitative and qualitative research reported in this book indicates that two different yet complementary modes of managerial reflection exist active and proactive Active reflection is something that managers naturally engage in during challenging job experiences whereas managers must be prompted to engage in proactive reflection Both modes involve processes of intentional inquiry Different forces are necessary to stimulate each type of reflection Based on these findings the claim is made that the potential to learn from experience is greatest when managers intentionally engage in both modes Accordingly a holistic model that integrates active and proactive reflection is presented This model has important implications for theorists and researchers of managerial learning by identifying previously unreported aspects of reflection It is also relevant to practitioners and

companies who desire to enhance what their managers learn from their workplace experience

Rational Numbers to Linear Equations Hung-Hsi Wu, 2020-06-18 This is the first of three volumes that together give an exposition of the mathematics of grades 9-12 that is simultaneously mathematically correct and grade level appropriate. The volumes are consistent with CCSSM Common Core State Standards for Mathematics and aim at presenting the mathematics of K-12 as a totally transparent subject. The present volume begins with fractions then rational numbers then introductory geometry that can make sense of the slope of a line then an explanation of the correct use of symbols that makes sense of variables and finally a systematic treatment of linear equations that explains why the graph of a linear equation in two variables is a straight line and why the usual solution method for simultaneous linear equations by substitutions is correct. This book should be useful for current and future teachers of K-12 mathematics as well as for some high school students and for education professionals.

Improving Learner Reflection for TESOL Li-Shih Huang, 2021-06-03 Presenting comprehensive research conducted with learners and educators in a range of settings, this volume showcases self-reflection as a powerful tool to enhance student learning. The text builds on empirical insights to illustrate how language professionals can foster critical self-reflection amongst learners of English as an additional language. This text uses ecologically sensitive practitioner research that addresses issues of both practical and pedagogical significance in the fields of TESOL, language teaching and learning, and teacher education. By synthesizing interdisciplinary research and theory, chapters show how various types of self-reflection, including guided and non-guided group and individual forms and written, oral, and technology-mediated reflection, can promote autonomous self-regulated learning amongst students at various levels. Whilst offering readers a strong grounding in the theoretical and empirical knowledge that supports self-reflection, the volume gives constant attention to praxis with a focus on effective pedagogical strategies and tools needed to implement, encourage, and evaluate critical learner reflection in readers' own teaching or research. This volume will be a critical resource for language teaching professionals interested in critical learner reflection, including in-service, pre-service, and teacher educators in the field of TESOL. Scholars and researchers in the fields of applied linguistics and language education more broadly will find this volume valuable.
